We have also received a copy of the did gentleman, A. O. BUNNELL, Esq. Secretary of the Association.

We join with the News in its commendation of the pamplilet.

We call attention this week to our article on the Revenue Law. Since writing that we have received a communication from the Treasury Department at Raleigh, enclosing a circular letter from the State Treasurer, dated "Raleigh, May 5th, 1869," from which we extract the following t

"Merchants pay tax in two ways: First, they pay amud valorem tax on their property, no matter whether invested in merchandise or not, privilege of carrying on business as merchants, doing the latter is pointed out in sec. 15, Sched-

No merchant ought to complain of this double only one-fifth of one per cent., which is far less than it was in 1860, when it was one-half of one per cent. It would be unconstitutional to exempt the merchant from the property tax. He does not pay on his net Income derived from merchandizing, as the property from which it is derived is taxed. So keepers of billiard tables, &c., pay a property tax on the tables, &c., and a license tax for using them."

This extract sustains our views upon the subject. The Revenue Law for 1868-69, required a tax of 1 5 of one per centum on purchases, whereas the Revenue Law of one per centum on purchases. If our merchants have not hitherto paid an ad valorem tax on their merchandise besides a privilege tax on their purchases it is not because they were not required to do so by law...

THE REVENUE LAW.

The question has been propounded us, whether merchants are required by law to list for taxation their stock of goods on hand, and also to make regular returns from time to time of their purchases We think this question is easily answered

in the affirmative. The Constitution of the State (Article 5 Section 3) declares : That laws shall be passed taxing by a uniform

rule all hierelys, credits, investments, &c.; and also all restrand personal property according to its for, we think it is deserving of no censure true value in money. The General Assembly may on this score. also tax trades, professions, franchises, &c.

From this provision of the Constitution it will be seen that the Legislature is required to levy an ad valorem tax upon all real and trades, professions, and franchises. "There shall be an ad valorem tax ofcents on theope hundred dollars value of real and personal property levied and collected," and the Machinery Act (Section 9) in specifying the subjects to be listed for taxation by the tax-pater enumerates (subdivision 7 of Section 9) will other personal property whatever, including therein cutton, tobacco, goods, wares and merchandize. It is apparent from the reading of these sections, taken from the "Act to raise Revenue," that the merchant is required to list for taxation his stock of goods, wares and merchandize. Now, as to the tax on purchases. The "Ast to raise Revenue' (Schedule B) declares, "That the taxes in this Schedule Imposed are a license tax for the privilege of carrying on the business, or doing the act named, and nothing in this schedule contained shall be construed to relieve any person from the payment of the ad valorem tax on his property;" And further on (Section 12 of the same Act.) "every druggist/ merchant, &c., who carries on the business of buying or selling goods, wares or merchandize of whatever name or description, shall in addition to his ad valorem tax. pay one eighth (1) of one per centum as a privil-

These provisions of the Revenue Law, in reference to the tax on mitted like a weve to distant regi purchases, are too plain to require any ex-planation, and are only carrying out the power conferred mon the Legislature by the The Raleigh Era is again out - this Constitution, to tax trades, professions and franchises, The tax of } of one per centum, or (\$1.25) one dollar and twenty-five cents on the one thousand dollars of purchases, is

As your readers have learned through various reports published in your paper, it seems that Bald Mountain, some 20 miles distant from Asheville, has presented some un-mistakable signs of internal disturbance, accompanied with heavy rumbling sounds or noises like distant thunder, and considerable shaking or trembling of the ground and rocks houses, e.c., on its sides and contiguous valleys.
