The Fate of the Megro. "Experience is the best teacher," so runs the old saw. But for whom? Was any one ever benefitted by the experience

of another ! We doubt it. These interrogations suggest themselves from the increase of crime among the ne groes in this neighborhood, recentlyespecially among the younger portion of them. During the past week, three negro boys in this Township were arrested and bound over to Court for offences, that will doubtless consign them to the Peni-

tentiary-all of them under 14 years of

All three of them, doubtless, with their parents, were present and attentive listeners to Dr. Palmer, when be addressed the colored people, but a few days before and warned them so strongly against idleness and its accompanying vices-We say attentive, for the negro is the best listener, and so say all public speakers who bave addressed them. But their attentiveness is no evidence of the impression being made.

The conclusion is being irresistibly forced upon our mind, that the future Leave Richmond ... , 148 PM of the negro in these Southern States is to be as dark as his own ebony hue.

This simple fact forecasts his doom, that by designing men of his own and whiter skin the impression has been made upon his mind, that the emancipation proclamation freed him and his offspring from all obligation to labor. Consequently he is bringing up his children in idleness and laziness We venture the assertion, that there is not a solitary negro boy under fifteen years of age engaged in any out an excep ion they spend their time in basking in the sun on the cellar doors by their noises by night.

We claim and can show that it is the CHEAP est, most beautiful, delicately arranged, nicely adjusted, easily operated, and smoothly running of all the Pamily Sewing Machines. It is remarkable not only for the range and variety of its sewing, but also for the variety and different kinds of texture which it will sew with equal facility and perfection, using silk twist, linen or cotton thread, fine or coarse, making the INTER-LOCKED-ELASTIC-STITCH, alike on both sides of the fabric sewn. Thus, beaver cloth, or leather, may be sewn with great strength and uniformity of stitch; and, in a moment, this willing and never-wearying instrument may be adjusted for fine work on gauze or gossamer tissue, or the tucking of tarlatan, or ruffling, or almost any other work which delicate fingers have been known to perform. And with its simplicity of construction; case

of operation; uniformity of PRECISE action at any speed; capacity for range and variety of work, fine or coarse-leaving all rivals behind it.
