The strongest propensity in woman's nature, says a cynical editor, is a desire to know what is going on, and the next to manage the job.

Ex-Minister Nelson says of Maximilian : "This tall and graceful scion of the house of Hapsburg had not one single quality of mind or character that fitted him to govern the Mexican people, or to engage in so large an undertaking as that of the founding an empire on the rains of the republic. Vain, vacillating and shallow he was wholly destitute of common sense, and never seriously considered, the duties and obligations of his exalted position. When the life of the empire was suspended by a thread, he found time to chase butterflies, study heraldry, devise coats-of-arms for the newly fledged nobility, and produce volumes of court etiquet-

REVIVAL OF THE IRON TRADE .- The indications of a revival in domestic iron trade continue to multiply. The Philadelphia Ledger says :

THE MODERN PULPIT.—The Chicago Tribune publishes alletter from Rev. G. C. MULLINS, which undertakes to show that the pulpit is losing much of its oldtime power, and inquires into the causes. Mr. MULLINS attributes the waning influences of the pulpit to the decided change from the kind of preaching we used to hear to that we listen to now-a-days. Formerly, he says, it was the duty of the minister of the gospel to preach the word, pure and simple, and now the preacher has been metamorphosed into the moral essayist the religio-philosophical lecturer and a professional, who must send up a rocket and make a sensation once a week if he expect to succeed.

Seven years ago Mrs. Jennette E. Robinson, in attempting to alight from a street car in Chicago was thrown violently from the platform by the horses starting suddenly, and struck on her head. She was taken up insensible and carried to a neigh-boring dwelling to be cared for. In the course of a few hours she became conscious, but found a peculiar tightness about her jaws, an inability to use her tongue, POOLE & HUNT, Blatimore and complete paralysis of her left side .-About two years ago she came to Campville, N. Y., to live near her brother, a farmer in the town, and during that time her jaws were so completely closed that she was obliged to use liquid food entirely ; her tongue so confined and useless that no one could understand her talk. For this reason she has always answered questions by writing on a slate; and from the

But seven years after the accident to a day, almost to a minute, she was fully in possession of health and vig-or; and of the means to regain it let her own story tell. She says: "On that day I was feeling much worse than usual, having less strength to walk, was more weak and desponding; but near night, after this day of sadness and gloom, the thought came to me suddenly, and peculiarly strong, that if I should pray I could get help from a higher power than human hands. I retired to an adjoining room, kneeled on one knee, not being able to bend the other, and commenced to say the Lord's Prayer, and in doing so, to my surprise, I found my jaws immediately opened, tongue unloosed, and was audibly repeating the prayer. Frightened at the sound of my own voice, I arose, and crossing the room hurriedly, forgot my crutch and cane, but soon learned that And Cotton King Cook Stoves, they were of no use to me, for strength was fully restored to my limb, and I sould walk and run even as well as I ever done at short notice and in the bestmanner.

### Drinking Water.

Dr. Hall is opposed to the immoderate use of water for a drink. He says : The longer one puts off dirnking water in the morning, especially in summer, the less will be required during the day; if much is drank during the forenoon the thirst often increases and a very unpleasant fulness is observed, in addition to a metallic taste in the mouth.

The less water a man drinks the better for him, beyond a moderate amount. The more water aman drinks the more strength he has to expend in getting rid of it, for all the fluids taken into the system must be carried out-and as there is but little nourishment in water, tea, coffee, beer and the like, more strength is expended in conveying them out of the system than they impart to it. The more a man dinks the more he must perspire, either by lungs or through the skin ; the more he perspires the more carbon is taken from the system; but this carbon is necessary for nutrition, Leave Rihmmu..... hence the less a man is nourished the less strength he has.

The more liquids used the greater must be the amount of urination, but this detracts a proportional demand of albumen from the system, and it is the albumen in the food that strengthens us. Drinking water largely diminishes the strength in it not for the scarcity of water. This is two ways, and yet many are under the indeed encoraging. Dr. J. Walker's California Vinegar Bitters are a purely Vegetable preparation, made chiefly from the native herbs found on the lower ranges of the Sierra Nevada mountains of California, the medicinal properties of which are extracted therefrom without the use of Alcohol. The question is almost daily asked. "What is the cause of the unparalleled success of VINEGAR BIT-TERS?" Our answer is, that they remove the cause of disease, and the patient recovers his health. They are the great blood purifier and a life-giving principle, a perfect Renovator and Invigorator of the system. Never before in the history of the world has a medicine been compounded possessing the remarkable qualities of VINEGAR BITTERS in healing the sick of every disease man is heir to.
