FRANKLIN TOWNSHIP.

JULY, 16th 1875. MESSES EDITORS

The speaking at Franklin Academy on last Friday, came off very pleasantly. John L. Henderson Esqr. first addressed the people, a speech of about an hour's, length, in which heset forth many reasons why the present Constitution should be changed. He showed up its many defects and its total unsuitableness to the spirit and genius of our people and State. He argued that the people should not be willing to live under it because it was not a constitution made by themselves, but that when it was framed, very many of our best and most influential citizens were disfranchised and could take no part in the framing of the constitution hat consequently it was the production of Yankees, scalawags and negroes, all of which was perfectly true. The writer of this article, remembers well that he was disfranchised, together with a number of others in this Township and a large number in Rowan county, and election for Convention in 1868. I had several the election for the reason that I was dis- House. franchised. I had no part nor parcel in making the present Constitution, and I am not willing that I and my prosterity should live under it, provided it can be amended by any proper, legal means. Hon. F. E. Shober, followed Mr. Henderson, endorsing his views in a masterly speech of over an hour's length. None of the opposition spoke. Dr. I. W. Jones was on the ground early in the morning, but having a call to visit a patient went away before the speaking, authorizing Mr. Shober to announce him as a candidate, which he did in a very handsome manner. By the way, Dr. Jones is in very feeble health, and being a personal friend of his, I regret to see it. I think it unreasonable in his party to expect him to canvass the County, in his present state of health. Though I feel entirely certain that Messrs Shober and Henderson will be glad to meet him or any candidate they can send out in the discussion.

Messra. Editors.—Our people were so very busy on their farms that there was not a large audience, but it need not be set down as an index of the feeling of our people, or as an indi-cation of luke-warmness. When the votes are counted in August, you will see that old Franklin, as ever, will be, right side up. I will guarantee that not a single white man in this Township will vote for the opposition candidates.

Messrs. Shober and Henderson had nothing to say about the Rail Road question. This is proper and right, and they should not be cate-chised on that subject at all.

Messrs, Mauney, and T. F. Kluttz, followed in very spirited speeches in favor of the Yadkin there? He has good fare, good lodging, good R. By the way, we learn that the radicals taking it for granted that the Rail Road project was unpopular, have instructed their candidates to do, although the said candidates and negroes were all in favor of it ten days ago. But it von't do them any good. They will find that, "the best laid plans, of mice and men, gang aft aglee." By the way, I would not wonder, if this very move of theirs don't add strength to the Rail Road party. There are some people expected to be present. The Public Confidence Well Placed. Although the world has been seeking specifics for diseases for many centuries, few indeed have been found. Prominent among these who have no opportunity of knowing bet | few is Hostetter's Stomach Bitters, which years ago received the endorsement of the medical profession, and was hailed by press and public as the great renovant and preventive of the age. And with good reason, since to the weakened stomach it gives strength, to their customers and the community at large the torpid liver activity, to the disordered that they are now in recepts of a large stock of bowels regularity, and to the shaken nervous Spring and Summer Goods selected with great system firmness and tone. The doctor bears the veloped upon the attenuated frame. There is name of being a good-natured man, full of no exaggeration in this statement. It is as true as that the system is subject to diseas ality of the comprehensive effects of the Bitters, there is probably not in existence a medicine in favor of which such a mass of concurrent testimony, from the most respectable sources, could be adduced. But the effiough and practical; and although he is yet but cents worth of "syrup squills and pollygol- tions of the North and South American Continents, Mexico, and the West Indies, in which atmostpheric influences prejudicial to health exists, proves what confidence is felt in its remedial and protective virtues. In localities where fevers of an intermittent type prevail. especially, it has come to be regarded as an indispensable necessity.
