

JUNE 15, 1876.

We are authorized to announce ISAAC M. SHAW, Esq., for the office of Sheriff of the County of Rowan, at the November elections, 1876, subject to the decision of the County Convention to meet in August next.

Gen. Hood, was in the city last Sunday.

Heavy rains on Monday evening last, the black and heavy clouds continuing to drip on Tuesday morning.

McMullish's Taylor shop was broken in to last Friday night and a good deal of valuable clothing taken out.

See ad of Finley High School. This is one of the most flourishing schools in North Carolina.

Cherries are very scarce this year, and some people don't mind getting over the fence for a taste. One unfortunately found a very big one for a single person.

The fruit which seemed to have escaped the late frosts is mostly very imperfect, much of it falling from the trees before fully grown.

The Oxford Torch-Light has reached its fourth volume. It is one of the best papers published in the State, and we hope it may be liberally sustained.

Wharton the photographer, respectfully announces that those wishing pictures should call within the next three weeks, as after that time he will be absent a few months.

JOHN D. CAMERON, Esq., has retired from the editorial chair of the Raleigh News, and the place made vacant will hereafter be filled by JOHNSTON JONES, Esq.

Mr. George Woodson, has erected a dwelling on Innes street, below the R. R. Bridge, and offers the one formerly occupied by his father, Obadiah Woodson, for sale. See ad.

He was a handsome fellow, as he passed on the street, he grabbed our hand and said; "tell them I was here." We will do so. "He was here."

ANOTHER EXCURSION.—See announcement of a arrangement for going to Richmond, and almost any place else you want to. It is understood rates will be low.

All work in our shop, having been delayed for 8 months, will be sold for repairs if not called for in 30 days. June 13, 76. It. BELL & BRO.

D. R. Julian and W. L. Rankin, will run an excursion train to Henry's on the 29th, and return next day. Arrive at Henry's at 1:15 p. m.; and returning, at Salisbury 3 p. m. next day.

LAST WEEK.—Mr. Wharton's stay in Salisbury will end at the close of next week. Persons who desire pictures will do the favor to call without delay.

He sang "Molly darling" to her and then proposed that she sing the answer, she complied and sang "Over the hills to the poor house." When she finished, she turned, and her soft eyes met his, a disensed smile played delicately round his enormous mouth as he remarked: "busted, and taking his hat walked leisurely out never to return.

LOOK HERE.—We have a great many goods that have accumulated on our hands and must be sold. They are handsome and desirable and you can buy them at your own price. Come and see them for our mean business.

Hon. Wm. M. Robbins passed through the city on his way to Washington last Friday night. Our hand honored him with a serenade, after which he was called out and made an able speech, explaining our political condition and telling when and where we must work that victory might light on our standard in the coming election.

Stocking the Catawba.—A. M. L. Kumlien, U. S. Fish Commissioner, and Dr. Tarleton Bean, of the Smithsonian Inst. Washington, D.C., passed through Salisbury Monday morning, on their way to the Catawba River with 75,000 young shad.

We learn that many of the rivers of North Carolina are being stocked by the government.

A petition sent by the citizens of this city to the Secretary of war asking that the order issued by Belknap, afterwards revoked by Taft, be reassued. The order was that the soldiers monument at this place should be formally dedicated and unveiled by the government. The petition was not granted, because it was thought not expedient to incur the expense of moving troops, &c., &c.

The biggest excursion of the season will be run from Henry's on the Western Road to Beaufort, N.C. on the 11th of July. In the interest of the new College building at Happy Home. Our readers remember that some time ago the College building was blown down in a violent storm. Arrangements will be made for all persons who wish to remain at Beaufort for a week or so, to return on the same ticket. The fare from Henry's will only be \$5.00 or \$6.00. This will doubtless be the most pleasant trip of the season, and we hope that Salisbury and the surrounding country will avail themselves of this splendid opportunity to visit the sea shore, and see the surging waves lash the sandy shore.

Members of Rowan Eneop. No. 14, I. O. O. F. are requested to be present at next regular meeting. Business of importance to be attended to.

Meisner, of Rowan, charged with the murder of his mother-in-law, Mrs. Heilig, was put upon his trial at Iredell court, last week, and after a patient trial, running through about four days, was convicted. He has appealed to the Supreme Court, so that a finality of the case will not be reached until in the fall.

Col. W. F. Avery the editor of the Morganton Blade has been presented with twins. A very good crop. Two little blades now grow where only one grew before.—Raleigh News.

Somebody will get a fight on their hands yet about this twin business. There is but one and it a boy or a girl.—Watchman.

The house is reported as damaging the wheat crop in Lincoln county. It damaged the oats crop in this county and may have injured the wheat. It was discovered on the oats here before the last snow and subsequent cold weather; but though it looked very tender it survived the severity of cold, and went on with its ravages as if nothing had happened. Its appearance here was a new thing, and the farmers were much concerned about it.

Printer's Ink.—There are two things that seem to rule the world at present, and they are Iron and Printer's Ink. They are going into everything everywhere, and everything bends before them. There are many wise men in this country who have taken full cognizance of this, and shape their affairs accordingly. JOHN ROBINSON, the great show man, for instance, knows the value and the force of printer's ink, and is using it more vigorously than any other man in the United States. Already he is announcing his annual fair throughout the Southern States. He has favored us with his "trumper," &c., which announces his visit to this place sometime in October next. Our fair Association had better arrange with him.

COMMENCEMENT AT DAVIDSON COLLEGE will take place on the 23rd & 29th, inst. Rev. Dr. Bryson, of Columbia, S. C. will preach the annual sermon, and Rev. Dr. Witherspoon, of Petersburg, Va., will deliver the annual address. Prof. J. H. Hill, of Charlotte, will deliver the address before the alumni, on Wednesday afternoon. On Wednesday night the alumni expect to have an entertainment, where addresses, social intercourse, and sentiments will fill up the hour of social reunion. The steward's Hall will be in full running order this year, under the direction of Mr. Barclay, of the St. Charles, Statesville, who promises good accommodations and good fare. It is expected that this will be a most interesting occasion.

On Saturday the 24th of June the committee on the 4th of July Celebration will meet the township committees of this County at the Court House in Salisbury at 4 o'clock, P. M. The committees on arrangements, &c., will at the same time make final reports. The committee on transportation, report that all trains on Railroads running to and from this place have been chartered and that there will be ample accommodations in the way of transportation for all parties who desire to come to Salisbury on the 4th. With regard to the formal dedication of the Soldiers' monument at this place by the Government, letters from official sources at Washington decline it on the score of expense. The Volunteer Military and Fire Companies, and also the Cornet Bands of the State will receive formal invitations.

THIRD GRAND COERCED.—This concert came off as advertised, on Tuesday night last. We certainly expected something beyond the usual run of musical entertainment, but were not prepared for the rich and exceedingly rare productions brought out on that occasion. Great care, patience and long continued efforts will accomplish wonders, and truly this concert was a most brilliant musical feat, accomplished with the Cornet, Trombone, Flute and voice. Among those most admired, we find "La Dame Blanche" Overture by the Band, "Hallalujah Chorus," by the Band. Alto solo, "Think of me," with Cornet obligato, flute and piano acc. Overture, "Pique Dame," two cornets and slide Trombone. Vocal solo, "Sing Sweet Bird," with Orchestral acc., &c. &c. We might enumerate the whole programme and not overdo the thing, for all were admired. A good audience attended and left, feeling very proud of the talent displayed.

Since the preceding concert, the Messrs. Meroney have wrought great changes in the Hall, particularly in the adornment of the stage, which, with its pretty opera boxes and splendid scenery, can scarcely be excelled by any play house in the South. They propose other improvements in future having more direct reference to the comfort of the audience, in the matter of seats, &c.

WOODLAND ACADEMY. The exercises of this excellent school, in Unity township, closed Wednesday, June the 7th. For two years past it has been under the charge of Mr. Geo. R. McNeil, A. B., who by his accurate scholarship, unwearied industry and mild firm, and decided discipline, has proved himself a proficient in his business. At 2 1/2 o'clock P. M. the patrons of the school and others assembled at the academy to witness the closing exercises. These did not differ materially from those usual on Friday afternoon—spelling, compositions, and declamations. The spelling was not on a special lesson, but words

were selected from what had been passed over by the classes during the session. The two advanced classes were combined, and a spelling match engaged in. Then the careful training received was manifest, especially in accurate syllabication so essential to correct and intelligent pronunciation.

The declamation was very praise-worthy, especially by the advanced pupils, calling for a marked recognition on the part of the audience. At the close of these exercises Rev. E. W. Byrd was called upon, and spoke earnestly of the advantages of intellectual training, and the duty of parents to provide this to the best of their ability for their children. With thanksgiving for God's blessings upon the school, the assembly was dismissed.

The patrons and principals will well look with satisfaction and pride upon their school. Its past success is complete and future prospects bright. Under the present principal the exercises will be resumed Aug. 21st, and continued through nine months.

UNITY. MR. PODS' PREDICAMENT.

BY G. E. V.

Mr. Pods weighs about two hundred pounds, is a young bachelor, in good circumstances, and consequently takes things easy. The hot weather greatly affects him, and he is in the habit every day, just after he eats his dinner, of divesting himself of his outer garments, and lying his mammoth form on the bed to cool off and take a nap.

Now it happened that on last Monday Mr. Pods' chamber maid took the bed covering and put it out for an airing, leaving the feather bed, a mattress and the pillows remaining on the bedstead. Mr. Pods, as usual, disrobed all but his shirt, threw himself on the bed, and was just beginning to doze when he was aroused by hearing female footsteps approaching his room, and the next instant he heard them stop at the door; then it occurred to him that he had forgot to lock the door when he layed down.

Presently he saw the door-knob turn, and jumping up he crawled between the feather bed and mattress just in time to avoid being seen by his niece and another young lady, who had come to solicit a contribution from him for some charitable purpose. The young ladies thinking that Mr. Pods was out, and that he would return soon, seated themselves to await his arrival.

Now here was a nice predicament for Mr. Pods to be in; there sat the two young ladies in his room, while he, in a nearly nude state, was lying under the feathered, nearly smothered, while the perspiration was oozing out at every pore, and running into his eyes almost blinded him.

"Confound those girls, I wish they would leave," muttered Pods to himself as the feather bed began to settle more closely about him.

But the young ladies had no idea of leaving until they saw Mr. Pods: and to while away the time, they proposed to "straighten up" his room, and setting to work, the very first thing they began to "straighten up" was the bed. They took hold of the feather bed to remove it from off the mattress, but great was their surprise to find that something held it fast. Their curiosity now being excited, they redoubled their efforts, and each taken a stronger hold on the feather bed gave it a smart pull, when, off came! Mr. Pods' hold gave way and off came the feather bed.

The young ladies gave a scream and rushed out of the room, while Mr. Pods bounded out of the bed and made the hastiest toilet that he ever did in his life.

In future when Mr. Pods' niece calls on him for contributions she will send in her card before entering his room, and Mr. Pods will be careful to lock his room door or when he goes through the cooling off process.

PHILADELPHIA, June 9th, 1876.

Dear Watchman:—We left Salisbury, N. C., on 5th inst., on the 8 30 A. M. train, and reached this city next day at 1 o'clock P. M. Our traveling companions, two little girls, stood the trip well. To-day, we visited the Centennial grounds, went through the Main Exhibition Hall, which is over 1800 feet long and 400 feet wide, and in which we saw woolen, cotton, linen and silk goods, in great variety, from different nations. Also, glass and other ware. Hardware cutlery, silvery ware, jewelry, clocks, cabinet furniture, and other like handiworks and all in great variety. Here we also noticed carpeting and other house-furnishing goods of foreign as well as of American works. Implements of different kinds from different nations: Organs, Pianos, and other musical instruments; printing, printing presses in full blast; fire-arms, mechanical tools and other things useful as well as ornamental too numerous to specify. The whole was a grand display, and must be seen to be appreciated. Next we went into the Machinery Hall: here we saw a great variety of articles of fine workmanship, of foreign as well as of domestic manufacture, among other things the long Engine of 25,000 horse power. It was a big thing; and many other machines and other articles of usefulness. In Government Hall we seen Machinery, complete outfits of war implements, such as cannons, guns, swords, sabers, pistols, &c. Also, Minerals of iron, coal, granite, mica, lead, silver, copper, gold and other ores; wild beasts of the forest, and birds of the air stuffed, fishes and animals of the sea, stuffed; of all of which there were a great variety. In the Turkish Bazaar found people dressed in their fine arabic costume, dealing out coffee, cakes, lemonade, ice cream, and other mild drinks. We were also in another of their Halls when they danced to music which we did not happen to notice, but saw them, male and female, finely clad in their Country costume sitting (like tailors) on their sidans smoking and

chatting, females as well as males. We saw in another place their various articles made of (as they said) olive wood, such as beads, smoke pipes, match boxes, spectacle cases, card trays, &c. center tables, and many other articles, all of which were of fine workmanship. Visited the Chinese: they have their place in the main building. Saw the English House, the Spanish House, and the Japanese and their house, which from outside appearance we admired more than the others. No nails were used in the building of it. I heard it said here by officers in the Centennial grounds that the Japanese were the most civil and gentlemanly foreign people here.

So far as we had an opportunity to see and examine we are pleased with the Centennial. No disappointment as to its dimensions and magnitude. It must be studied to be appreciated, and to do this well, will require the whole term of opening. Persons not seeing this big thing can have no conception of it. I write you from memory.

Yours truly, MARTIN RICHWINE.

The Evil Fruits of Weak Digestion.

There is no pathological fact more clearly ascertained than that the most formidable phases of nervous disease is directly traceable to imperfect digestion. Insomnia, with its train of direful consequences, proceeds more frequently from weakness of the stomach than from any other cause. Mere sedatives are powerless to cure nervousness, and soon cease to palliate its symptoms. The true way to strengthen the nervous system is to invigorate the digestive and assimilative organs, upon whose unobstructed action its equilibrium is absolutely dependent. The daily use of Hostetter's Stomach Bitters will do more to brace and soothe the weakened and irritated nerves, and induce sound, refreshing sleep than any other medicine than all the so-called nervines to be found in the pharmacopoeia or out of it. A single glass of the Bitters should be taken before each meal.

A FLOWER THAT CHANGES ITS COLOR.

Botany is a division of natural science which treats of plants, and a study of Vegetable Physiology must be the foundation of botanical knowledge—a study only possible by the improvements in the microscope and organic chemistry. As plants are not scattered haphazardly over the earth, but are arranged in regular belts, and with this, plant-histories. Botany may be applied to the wants of every-day life, as in Agriculture, Horticulture, or Medical Botany. Animals often exhibit a marvelous instinct in selecting medicinal herbs, and an observation of their habits has often, even in the present time, led to most valuable discoveries. And should man, with his knowledge and appliances, fail to discover less than the brute? It is of Medical Botany we would speak, or of the HEPATINE PLANT, discovered in Southern Nubia. The Flower of which changes its color with every change of the atmosphere. The remarkable changes and variations of this Plant and Flower have been for years our special study, resulting in the discovery of its possession of wonderful medicinal properties, the existence and value of which have heretofore been entirely unknown to medical science. After much labor and scientific investigation, we have succeeded in extracting its peculiar medicinal principles, which is a specific and cure for all diseases of the Liver, Stomach and Bowels—a permanent cure for Dyspepsia, Indigestion, Splenic, Constipation, Jaundice, and all Bilious Complaints. Of course we cannot send a living Flower of this Plant to all who read of Hepatine; but to all who will send their address to MERRELL & CO., Philadelphia, Pa., with a three-cent stamp for return postage, we will send you a free sample of the Flower, that will change its color just the same as the real Hepatine Flower.

The Medicine, MERRELL'S HEPATINE, for sale by Theo. F. Kluttz, Salisbury, N. C., will cure all diseases of the Liver.

"When thou art old and rich, Thou hast neither heart-affliction, limbs or beauty." It is surprising how few books have been written on the disease incident to old age. We know of no work that would be more generally read by the medical world, or in fact by all classes, than a "Treatise on the medical management of old age," written in a plain style and free from all technicalities, nor do we know of any medicine that is more happily adapted to the alleviating of the pains and affections of old age than the GREAT CURATIVE PILLS. While they act promptly they do not wrench the system or shock the most enfeebled constitution. In cases of gout, rheumatism, kidney diseases, torpid bowels, indigestion, loss of appetite, their healing properties are truly wonderful. Their effect on the nervous system is prompt, quieting restlessness, imparting refreshing sleep and vigor to the whole system. The old and young will be alike benefited by the use of this truly estimable medicine.

IS YOUR LIFE WORTH TEN CENTS?

Sickness prevails everywhere, and everybody complains of some disease during their life. When sick, the object is to get well, now to say plainly that no person in this world that is suffering with Dyspepsia, Liver Complaint and its effects, such as Indigestion, Costiveness, Sick Headache, Sour Stomach, Heart Burn, palpitation of the Heart, Depressed Spirits, &c., can ever take GILES' ACETIC PILLS. While they act promptly they do not wrench the system or shock the most enfeebled constitution. In cases of gout, rheumatism, kidney diseases, torpid bowels, indigestion, loss of appetite, their healing properties are truly wonderful. Their effect on the nervous system is prompt, quieting restlessness, imparting refreshing sleep and vigor to the whole system. The old and young will be alike benefited by the use of this truly estimable medicine.

SALISBURY MARKET,

[Corrected by McCUBERTS, BEALL & DEAN.] June 8, 1876.

Table of market prices for various commodities in Salisbury, including Cotton, Flour, Wheat, Corn, Meal, Oats, Butter, Chickens, Eggs, and Onions. Prices are listed in cents and dollars.

RALEIGH MARKET.

WHOLESALE CASH PRICES. [Raleigh, May 29, 1876.] FLOUR—North Carolina \$6.00 a \$6.25. CORN—75 a 80c. MEAL—moderate demand at 75 a 80. OATS—45 to 50. BUTTER—20 to 25. CHICKENS—per dozen \$2.00 to \$3.00. EGGS—12 a 13. ONIONS—no demand.

These Chemicals are for sale by J. H. ENNIS, Salisbury, N. C. Agents wanted in the several townships to sell farm rights.

TO FARMERS. MAKE YOUR OWN FERTILIZER. USE HARRIS' EMPIRE COMPOST OR HOME-MADE FERTILIZER.

You can with these chemicals make your own fertilizer at home, and thereby save the money paid for high-priced commercial Guano. The cost is about one-fourth the price of commercial fertilizers. We will show by the following certificates, from parties who have used chemicals for the past three years, that the result is much greater and therefore more satisfactory. Four hundred pounds of this compost sown broadcast over one acre will produce you a double yield of wheat, and two hundred pounds per acre, under corn planted exactly three feet each way, will give fifty bushels of shelled corn to the acre on the poorest land. One horse in one year will produce enough manure, which with the aid of our chemicals making it a concentrated manure, to go over twenty acres of land. These chemicals should be bought in August and September for wheat, and from December to March for cotton and corn, as it requires from thirty to sixty days to make the compost perfect. Read the following certificates from the best farmers in the country:

[Telegram from Charlotte.] CHARLOTTE, N. C., June 12, 1876.

To J. W. HARRIS. Farmers highly pleased. Will sell thousands of tons this season. WILSON & BLACK.

YORK COUNTY, S. C., December, 1876. Messrs. Wilson & Black—Gentlemen: We have sold and used Harris' Empire Compost in large quantities, and cheerfully say that it has given us greater satisfaction than any sold or used. We intend to use it the coming season. Yours truly, CARROLL & CAMPBELL.

MECKLENBURG COUNTY, 1876.

J. W. Harris—Dear Sir: I take pleasure in stating that I used your Empire Compost this past season by the side of other first-class fertilizers, and state that it beat all of them. Yours truly, A. J. HOOD.

UNION COUNTY, N. C., December, 1876.

I used your two tons of Harris' Empire Compost, and am so well pleased with it that I consider the formula alone worth \$100 to me, and I shall use a double quantity the next season. The cheapness of it, and the general utility, makes it indispensable to farmers. I never expect to use any other kind. A. HENBY.

BEAVER DAM, Union County, N. C., November, 1876.

I certify that I have used Harris' Empire Compost, and find it as good as any Guano I ever used under Cotton, at about one-fourth of the price. One ton goes over ten acres. T. L. DOSTER.

BEAVER DAM, Union County, N. C., 1876.

I certify that I have used Harris' Empire Compost, and find that it paid me as well as any Guano I have ever used under Cotton. I have used Bahama, Navassa, Carolina, Zella, Am. Acid Phosphate, and find Harris' Empire Compost equal, if not superior, to any on my lands. JAS. F. MARSH.

KING'S MOUNTAIN, N. C.

Messrs. Wilson & Black—Gentlemen: We certify that we used Harris' Empire Compost last season, for making Harris' Empire Compost, and take pleasure in saying that they have given entire satisfaction to all that have used them, and all intending large quantities of it this season. The cheapness of it makes it the most desirable fertilizer sold. Yours, very truly, MAUNEY BROS. & ROBERTS.

CABARRUS COUNTY, N. C., 1876.

We, the undersigned, have used Harris' Empire Compost the past year, and take pleasure in saying that it is by far the best and cheapest fertilizer we know of. We intend to use more largely this season. F. A. ARCHIBALD, E. C. MORRISON, WM. L. SAPP, JACOB BARRINGER, DR. D. W. FLOW.

CLENSCOVE, N. C., November 30, 1876.

This is to certify that I have used five tons of the Harris' Empire Compost, and find it is equally good if not better than any other fertilizer I have used or noticed used, even at the cost of sixty dollars per ton, making an increase of about 100 per cent. on stubble lands. I expect to buy more largely next year. W. A. ARCHIBALD.

PLEASANT VALLEY, Lancaster County, S. C., November, 1876.

This is to certify that I have used Harris' Empire Compost and am very well pleased with it, as it not only prevents rust, but is as good as any of the high priced Guanos, and cost per ton making it the cheapest fertilizer sold. W. D. HAYATT.

GREENVILLE COUNTY, S. C., 1876.

This is to certify that I used Harris' Empire Compost last year on my and on Wheat, and though I did not give it a fair trial, I left my mind open to its merits, but must say that where it was used it was never better, and where I did not use it I find that it is very indifferent. I shall use six tons this Spring. I consider the formula invaluable to farmers. Yours respectfully, W. F. PENNINGTON.

GASTON, N. C., May, 1876.

Messrs. Wilson & Black—Gentlemen: I give me much pleasure to state that I used the Compost bought of you last winter, and must say that I am highly pleased with it. I left it on an old broom sedge field that would produce nothing, and must say the result is astonishing. I consider it an invaluable compost, and just the thing needed to bring out our old, worn-out lands. Yours, very respectfully, DR. J. F. SMYER.

MECKLENBURG CO., N. C., 1876.

I take pleasure in stating to my brother farmers all over the country that I used, last year, Harris' Empire Compost, under both corn and cotton, and the result was astonishing to all my neighbors. The cost was only one-fourth of what I had been paying for commercial fertilizers. LENS HOOK.

MECKLENBURG CO., N. C., 1876.

This is to certify that I used Harris' Empire Compost last year side by side with several other commercial fertilizers, and I find that the yield from Harris' Compost was one-fourth greater and the quality better than any. It makes the cotton mature better, and, in my judgment, it is preferable in every respect. The cost was one-tenth the price of high priced Guano, and one ton will go over ten acres of land. Yours truly, D. C. ROBINSON.

AGENTS. make no engagements till you see our NEW BOOK, Which in thrilling interest, sterling merit, elegance and cheapness, has absolutely no equal. It is "THE TRIUMPH" for the Centennial period—takes on sight. THE North American Review says it is "dearer than gold." The Dubuque Times says "Just such a work as thousands of the American People will be glad to possess." The Detroit Advertiser calls it "preferable to any yet published." Any active Man or Woman of good address insured large profits and steady work for a year. For full particulars, address, J. B. FORD & CO., 27 Park Place, New York 29:2m.

J. & H. HORAH, JEWELERS, MAIN STREET, SALISBURY.
