For the Watchman.

EXTRAORDINARY FARMING. MR. BRUNER: Seeing the subjoined letter of Mr. Hardaway in the Raleigh News, and being struck with its remarkable statements, I wrote at once to Mr. Malcolm Johnston, Secretary of the State Agricultural Society of Georgia, to ascertain whether or not they were reliable. I append his answer which fully avouches Mr. Hardaway. He also sent me the two addresses referred to, which I shall be thing nice, whatever it may cost. All pleased to show to any who feel interested in progressive farming and its grand Very respecfully, THEO. F. KLUTTZ

Salisbury, July 5, 1877.

Georgia State Agricultural Society. SECRETARY'S OFFICE.

ATLANTA, GA., July 2, 1877. MR. THEO, F. KLUTTZ, Salisbury, N. C., Dear Sir: - I mail you with this, copies of our proceedings at Stone Mountain and Thomasville, in which you will find the addresses referred to of Mr. R. H. Hardaway, who is one of our most progressive farmers and esteemed citizens, and a gentleman in every way reliable.

Very respectfully, etc., MALCOLM JOHNSTON, Sec'y.

MR. HARDAWAY'S LETTER.

THOMASVILLE, GA., June 11, 1877. B. B. Lewis, Esq.:-In reply to your letter of the 8th instant, I will state that my little farm comprises 15 acres and is within the corporate limits of Thomas-

Last year I left out five acres to rest it. and cultivated only ten acres with the following results, viz: I gathered 328 bushels of corn, 18 bushels of wheat, 267 bushels of oats, 3 bales of cotton, average 438 ped to Washington county for seed oats. I with a watering pot. have a genuine warranted rust proof oat, For cabbage-worms apply dry salt if rust head in all that time. I have careful- are dry. ly selected my seed from them since 1871. At the late Fair I exhibited 12 cabbage, ed lime, dusted over the field. sowed Jan. 15, 1877, weighing, (aggregate) inches long, sowed March 27, 1877; White sowed Jan. 29, 1877. In 1875, I had 7 plans, and assist her if she fails. acres of oats, yielded and sold 525 bushels; 3 acres of corn, yielded and sold 158 bushels; 5 acres of cotton, yielded 3 bales weighing 1560 lbs., also potatoes, peas, pumpkins, kershaws and fodder, &c., &c., not counted. This year, 1877, I have 5 acres corn, 5 acres oats, 12 acres in wheat, gathered, and I will sell 400 bushels and keep seed for my next crop. What my corn will make the season alone will determine, the prospect now points to a say how much wheat, it is not threshed,

stubble land as usual. I find sowing peas, 2 bushels to the acre: acre, on my stubble land, produces an immense-vine crop, which turned under en- Clover and Timothy, 7 to 9 " riches the land yearly, and I have been Alsike, or Luzern, pursuing this plan with rotating the crops | Orchard Gr. Blue Grass, annually for many years, and I attribute German Millet, much of my success to the pea as a renovater in the quantity of nitre they contain. I will state further, the annual crops of my little farm, since 1866, of which I have 721.44; in 1869, \$1,614.02; in 1870, \$1,-

but looked fine when it was cut. I will

plant potatoes and peas this month on my

have enriched it annually by putting back more than the exhaustion; until it has gin with, a pasture which is so short that a cow reached a very high state of productive- cannot get all the feed she needs in half the ness-having made as much as 119 bushels of corn on one acre; I pursued the "in- by ten, and the time from then until three or tensive system" entirely, usually gatheras much from 15 acres as most farmers get from 100 acres, what they term fair land and crops, and as much as the yield of 150 acres of poor land. I am glad to say the intensive system is getting more in vogue, and that Mr. E. L. Neil, of this county, profiting by my example, the year 1875, made 615 bushels of oats on five acres. My usual oat crop, is about 75 to business. 90 bushels per acre, and have never made less than 60 bushels to the acre. I have been trying to add my mite of experience to the success to be attained by patient, practical, improved culture in the garden and field; and by request, delivered two addresses before the Georgia State Agricultural Society, at Stone Mountain, 1874, and Thomasville, 1875, which gives a full iness. detailed account of crops annually. You can obtain them by application to Malcolm Johnston, Secretary, Atlanta Ga.

My statements may seem overstrained to strangers, but my crops, on inspection, and my neighbors, will verify all I have written. We are having good rains after nearly one month drought.

Very truly, R. H. HARDAWAY, P. S .- I will state that my farm was originally very poor, and yielded before I bought it only eight bushels of corn per

The youngman of the Wadesboro Herald who evidently speaks as one having authority and not as the scribes, agonizingly observest "There's nothing makes a man feel worse than getting off a spree."

BUTTER IN FRANCE.

If our dairymen need a spur, an eyepener, a lesson which speaks volumes in three words, here is one at the head of this article. Butter is actually brought from France and sold by the New York dealers. This is because there is an actual scarcity of good butter in the market, put up in an attractive shape for small consumers. When we know that one dairyman gets \$1.15 a pound for his products, another \$1, and another 75 cents the year round, at his dairy door, it is easily seen that it will pay to bring butter across the ocean from France, if it is only good and shapely enough to suit the fastidious purchasers who will have somethis butter is made from choice cows, choicely fed on clean sweet food; the milking is done in the cleanest manner. The milk is handled as carefully as though it were nectar, the cream is churned with clock and thermometer, the butter is worked with skill, and is made up in shapely cakes, which do not require to be cut when brought to the table. Compare then, this cake—hard, golden yellow, sweet, fragrant and tempting to all the senses-with an unsightly chunk, which is cut of a greasy keg, and smells of old age and rancidity, and is made from illkept cream from cows filthily lodged and carelessly milked, and is churned anyhow, and the difference is amply accounted for. -N. Y. Tribune.

REMEDIES AGAINST WORMS AND INSECTS.

The insect question is a very important one; they destroy us if we don't destroy them. The following modes I used as

occasion demands and never fail: Melon and cucumber bugs like radish leaves better than any other kind. I sow a few radish seeds in each hill and never

AN ALPHABET OF GOOD COUNSEL.

Attend carefully to the details of your

Be prompt in all things. Consider well, then decide positively. Dare to do right, fear to do wrong. Endure your trials patiently. Fight life's battle bravely, manfully. Go not into the society of the vicious. Hold your moral integrity sacred. Injure not another's reputation or bus-

Join hands only with the virtuous. Keep your mind from evil thoughts. Lie not for any consideration. Make few acquaintances. Never try to appear what you are not.

Observe the Sabbath day. Pay your honest debts promptly. Question not the veracity of a friend. Respect the counsels of your parents. Sacrifice money rather than principle. Touch not, taste not, handle not intoxi-

cating drinks. Use your leisure time for improvement. Venture not upon the threshold of sin. Watch carefully over your passions. 'Xtend to every one a kindly salutation. Yield not to discouragements. Zealously labor for the right. And success is certain.

HOW DIAMONDS ARE MINED.

The diamond fields are in the Orange free states, about seven hundred miles north of Cape Town, and were first discovered by a Dutch schoolmaster, who saw his children playing at jack stones with brilliant pebbles, and, thinking they might be valuable, sent one of them to Cape Town. It is needless to state that ne soon discovered their value. When first discovered they could be found on the surface, and some of the best diamonds found were picked up on the sur-

They are now mined in this manner: Imagine, if you please, a large hole covering an area of twenty or thirty square acres, two hundred feet deep, from which every particle of the dirt taken out has been sifted and the diamonds taken out. struck a vein of hard clay soil, which is parration. estimated to be five hundred feet thick. The soil is lifted out in baskets by means of pulleys and ropes and soaked in water until soft, when it is worked to the consistency of cream, and then strained through fine seives, thus separating the diamonds from the "mash."

Last year a scientific gentlman discov ered that the clay thus sifted made excellent brick when pressed and burned, and a stock company was organized to work it. I have a specimen brick in my possession, and it is studded in several places with minute diamonds that passed through

Struggle as we would to widen the space, no man can, at any time go further from death than the thickness of a sheet of pa-

Sad and Distressing Occurrence. A very sad case of accidental drowing occurred vesterday. Mr. H. J. Mints, of this city, who lost his wife by death about a week ago, has been engaged for some time on some government work at Big Island, about nine or ten miles below Wilmington, and yesterday, feeling lonely on account of his recent loss, he took his little son, James Henry, between 6 and 7 years of age, with him on the boat, because, as he said, he thought the little fellow would be some comfort to him. The 31 acres in cotton. My oats have been all cases. Rich land requires less seed steamer Emma Dunn, upon which he is at work, is aground on the shoals at Big Island, and he had a yawl attached to the side of the steamer next to the river, in pletely, makes less seed necessary; when which his little boy was fishing for crabs. good yield, say 300 to 350 bushels. Can't well put in with a good drill less seed is when, about 12 o'clock, he (Mr. M.) decided to go on the steamer and take a shave, preparatory to going over to the mainland to stroll about, gather whortlberries, &c. tities will be about the right quantity, per He carried out his intentions, and was about finishing his shave when he heard his child call him, in a few moments after which he descended into the boat and discovered that his boy was missing, upon which he looked over the side of the yawl and saw his hat floating on the surface of the water. He immediately plunged into the river and quickly drew the body of his darling from the briny depths and pail than her bodily comfort. She needs a took him on the steamer, where he resorted record, will average full up to the crops good bed to sleep on, good quarters to live in, to every conceivable means in his knowledge to resusitate him, but without avail, all cotton, surpassed them largely, to wit: that it would be better to have her out of doors and he was finally constrained to give up in 1868 I sold my cotton crop for cash, \$1,- all winter, because she would then eat more the effort in dispair, life no doubt having been entirely extinct before the body was removed from the water, though he could not have been in it exceeding ten minutes. Nothing was now left to the almost heartbroken father but to perform the sorrowful task of placing the remains of his little one, so lately instinct with the life and vigor of its childish nature, into the boat and bring them to this city, thence taking them to his now desolate home on Fifth, between Castle and Queen streets. Much sympathy is felt for Mr. Mints in the great loss he has sustained by this double be-

reavement .- Wilmington Star. Paying the Bonds .- The Raleigh and Gaston Railroad first loan bonds amounting to \$50,000, became due the first day of the present month, and W. W. Vass, Treasurer of the road, is ready to pay them off upon presentation. These bonds draw no interest after the day of maturi-

Dr. R. B. Hayes, LL. D., of Harvard College, and Dr. Wm. A. Wheeler, LL. D., of Union College, are the latest additions to the world of letters. Neither one of them knows much law, and to give them the degree of LL. D. is absurd. It hurts nobody, however, except the universities that confer the degrees. It is a cheap sort of fraud, but not so bad as some others in the history of Hayes or Mr. Hayes or Mr. Wheeler .- Baltimore Ga-

Confederate Archives Burnt .- Twentyseven boxes of Confederate archives, left at Union, S. C. by Jefferson Davis, were recently destroyed by fire. The Federal troops were pressing Mr. Davis so hard during his retreat Southward that he was compelled to leave the archives with Col. Young, at Union. The latter had carefully preserved them, and was about to send them to the Southern Historical Society at Richmond, when they were de-

A SINGULAR BOOK .- We have on our table a singular publication, in the form of a pamphlet, from the publishing office of John Nichols, of this city, entitled "A Wonderful Revelation of Heaven by an Angel sent from God to Luzene Chipman." The authoress, Luzene Chipman, is a Quaker lady, living in the county of Guilford, and, we are told, is highly respected by all who know her as a pious, christian woman of more than ordinary intelligence. She says in the preface, that she publishes the book because she was commanded

Whether in or out of the flesh, as Saint Paul says, we cannot tell, but it is certain she professes to have seen some wonderful things, and she tells them in a manner to convince the reader that she, At a depth of one hundred feet there was at least, is convinced of the truth of the 37:6t

by the Angel to "take this and publish it

to the world for the sake of the Lord

We believe the book-sellers of the city have the pamphiet for sale,—Ral. News.

A TOUCHING WAR INCIDENT. [Raleigh News.]

In one of the hotly-contested fights in Virginia, during the war, a Federal officer fell wounded in front of the Confederate breastworks. While lying there wounded and crying piteously for water, a Confederate soldier, (James Moore, of Burke county, N. C.,) declared his intention of supplying him with drink. The bullets were flying thick from both sides, and Moore's friends endeavored to dissuade him from such a hazardous enterprise. Despite remonstrance and danger, however, Moore leaped the breastwork, canteen in hand, reached his wounded enemy, and gave him drink. The Federal, under a sense of gratitude for the timely service, officer then asked the name of the man who had braved such danger to succer

They saw nothing more of each other. ery of life and death is within us. The Virginia, and returned to his home in Ball Steel and Cast Plows. Burke county. A few days ago he received a communication from the Federal soldier to whom he had given the "cup of same as if a cannon ball had struck us. cold water" on the occasion alluded to, announcing that he had settled on him the sum of ten thousand dollars, to be paid in four equal annual installments of twenty-five hundred dollars each. Invesgation has established the fact that there is no mistake or deception in the matter.
