

LOCAL.

Apples, peaches, pears, plums, melons, etc., in great abundance.

Another visit from our great friend, Mr. W. Best, of the Raleigh Observer.

Our devil says he can hear the strikers beating the sides of the cars with their clubs every time a train passes.

The Rev. A. D. Hepburn, D. D., President of Davidson College, will preach in the Presbyterian Church of this city next Sabbath, morning and evening.

A gentleman of our town has brought out a Washing Machine which promises to be worth something. More of it hereafter.

Rev. J. RUMPLE, in obedience to an appointment of Presbytery, will preach at Albemarle, in Stanly, Thursday night next; also spend two or more days at Norwood, preaching there on Sunday and Sunday night.

Rain—in great abundance, mostly in moderate showers, with long enough intervals between to give the water a chance to soak in or run off without much damage. Corn, and vegetables generally, very luxuriant and growing rapidly.

The Junior is still in the mountains, planning deer we learn; but Nimrod's are things of growth, just what he lacks. The gay buck of the blue hills may show his cotton brush and antlers and clear away from novices without much danger of harm.

Our thanks are due Messrs. Ludden & Bates, Music Dealers, Savannah, Ga., for several pieces of new music, among which is "Gov. Hampton's March," "Away Down South," "Whar de Orange Blossoms Grow," "Good-bye Old Cabin Home," &c. They are got up in beautiful style.

Gone to Old Point.—Salisbury will be represented at the Old Point Comfort mail service Convention by Maj. S. W. Cole, S. H. Wiley, Col. P. N. Heilig, J. F. Ross, W. H. Crawford, Luke Blackmer, Esq., Theo. F. Klutz and W. S. Negas.

We learn our fellow townsman, I. P. O'NEAL has the contract for repairing or extending the Newberry (S. C.) College, and is now making brick for that purpose. Mr. O'Neal is a capable man in his line, and we remember no instance in which he has failed to work up to his contract.

Asleep.—Men who have to "watch the shop" after dinner, these hot days, with no customers to keep them lively, have a hard struggle between sleeping and waking. Sleep got two of them Tuesday, each with a book in his hand, well settled in a split-bottom, with heads against the counter.

Breaking Down.—The heavy crop of fruit is breaking down thousands of trees. A severe wind, just now, would be fearfully disastrous to many an orchard. Even the limbs which are propped up after break off at the prop. The only remedy is to take off some of the fruit, a practice our people have not yet learned to perform.

The "Big Seed Wheat" advertised in this paper, is a new and striking thing as a wheat. Its merits depend on the yield and the quality of the flour, which can only be known by a trial. But those who try it will of course do so cautiously, for it is not every big thing that is the best, and the advertiser is silent on that point.

Mayor Stewart has a dog that eats peaches. He goes under the tree and picks them off the ground. The other day he took in a honey bee with one and got stung, which made him cavort round a little. Since then he is more cautious and turns over the peach with his paw before taking it into his mouth. It is expected he will climb the trees when the fruit becomes a little scarce.

Peaches.—We are indebted to Mr. A. L. Johnson for a present of fine peaches. Indeed, several of our friends have kindly remembered us in this line, for which we thank them. The fruit crop is very abundant and unusually fine. "The curculio did less damage to the fruit this year than for many years past. We suppose the fruit failure of two or three years, and the late hard winter had something to do with destroying this pest.

Mail Robber Arrested.—A Howerton was arrested at this place, Wednesday last, on the charge of robbing the mail. He has occasionally acted as a sub-rotor agent on the Western N. C. Railroad where the regular agents have had occasion to be off duty for a trip or two; and his depredations were committed while acting in this capacity. Some six or seven losses have been sustained within the last year or two by persons sending goods and money packages over this line, and it had been observed by parties deeply interested in such failures that they always occurred about the time Howerton was sub-agent. United States detectives were notified of these facts, and very soon the offender was caught. Subsequent developments have shown that Howerton did not confine himself to money packages alone, but seized small packages of goods as well. In default of bail he stands committed to await his trial in the U. S. Circuit Court at Greensboro or Stateville.

Another Kicking Mule.—What's got into the mules and horses? They seem to have become strangely combative. Only last week a man in this county died from the kick of a horse; and another, Mr. Kestler had his jaw-bone broke. And now, just

in front of our office, last Friday afternoon, Geo. Wiseman, a colored lad of some 14 or 15 years, while about to hitch up a mule to a buggy, most unexpectedly received from it a kick in his right side, which sent him sprawling some feet away. Accidents of this nature have frequently occurred of late in other counties, reports of which have come to us through the newspapers. The subject of this notice was suffering great pain a few moments after the kick. His injuries, if serious, are internal, the extent of which can only be ascertained after some hours. He was shortly afterwards removed to his home in the country. But who can account for all these accidents crowding upon each other in such rapid succession. It is certainly very unusual.

A Raleigh paper denounces the mean act of persons throwing dead chickens and cats into the streets of the city. It is indeed a mean thing, and if the Mayor could find out the persons doing it he ought to make them tote the carcasses to a suitable burial. We hope our town officers will keep a particularly sharp stick for this class of offenders, and indeed for every defilement of the public streets and back lots. With the abundance of fruit, rain, luxuriant vegetation, hot suns, cool nights, and after a little while, decaying vegetation, we shall have need to suppress all nuisances if we would preserve the public health. Let the citizens constitute themselves in a committee of the whole to secure the enforcement of every sanitary measure from now until frost.

Obey the Ordinance.—The town ordinance requiring cows to be stabled at night is constantly violated by a few citizens whose thoughtlessness, more than anything else, thus subject them to trouble and loss. We learn the town authorities have determined to enforce the ordinance more rigidly hereafter, so that those concerned should take warning and be on their guard. It is better for the owners and for the community to have all stock off the streets at night, and the requirement is not generally burdensome.

Yet really there is less objection to cattle on the streets in the night time than in the day. The public is less annoyed by them, the only danger being that some traveller may stumble over them as they lie lazily in the road ways. There are always a few cows at this season slow to come up in the evening, and their owners are frequently at much trouble to get them in, and sometimes fail to find them. Should the police come upon them, however, and impound them, it subjects the owners to a fine, and altogether makes up such a case of hardship as rendered this ordinance very unpopular and inoperative only last year. We have never known a night traveler damaged by cows in the street, but they are a constant offense by day in more ways than one, and sometimes vicious animals have pursued and frightened women and children who happen to be passing near them. Occasionally a wretched poor cow has been sent out on the street. She is no offense by night, for she can't be seen; but if there is anything more offensive to an acute sense of decency than one of these unclean, suffering creatures, we do not know what it is.

TO PHYSICIANS OF ROWAN CO. There will be a meeting of the Physicians of Rowan county, in Salisbury, on Saturday, August 11th, to take into consideration the organization of our County Medical Society. The law passed at the recent session of the General Assembly making the State Medical Society a Board of Health for the State—enacts also that each County Medical Society organize in accordance with the constitution and laws of the State Society, shall be a County Board of Health. In order, therefore, that the profession of Rowan may aid this movement, it is proposed that we meet in Salisbury, on the 11th of August, and take such action as may enable us to furnish some assistance to the Committee appointed at the recent meeting of the State Society, in carrying out the law in this regard.

J. G. RAMSAY, M. WHITEHEAD, F. N. LUCKEY, J. J. SUMMERALL, For the Watchman.

DEAR WATCHMAN: "Patiently have I been waiting for some leisure hour to come when I might write you somewhat more about our great "Teachers' School" up here at Chapel Hill, but to the busy "Normal" such hours seem destined never to come; so I shall put down my Phonetic Spelling book (not Webster's blue backed) and hastily note some of the principal features of this new enterprise. It will not be out of place to speak first of the institution itself. It is an institution of which every North Carolinian should be proud, unrivalled in the South, if indeed in America, in beauty of situation, in magnificence and grandeur of building, having eight large collegiate structures, in hospitality of the citizens, in salubrity of climate, situated on a pleasant 800 feet above sea level, and conducted by a corps of able Professors under the guidance of Hon. K. P. Battle, who seems to have been permanently fitted for the position of President. Success to the noble old University, and may she soon regain the high prestige so worthily attained in ante bellum times.

Now for the Normal. There are over two hundred (200) pupils on the roll, five regular Professors, three regular classes or sections, with several sub-sections, having sub-teachers. The studies pursued are, Arithmetic, Grammar, Geography, Reading, Spelling, and Vocal Music, each of which is carefully recited, and conducted by all the pupils; besides these, there are extra classes studying Latin, Intellectual Arithmetic, and Music. We have daily two regular Lectures on some Educational subject, and generally one at night by some one from abroad. Whilst very many new methods of teaching and fresh views of the different subjects are evoked in the daily recitation drill, it is of the Lectures I would more especially speak. Prof. Ladd and Owens, both complete masters of the subject of Teaching, in their lectures divide their work. Prof. Owens treats of Pedagogics, or Pedagogics, teaching considered as a Science. Prof. Ladd considers it as an Art, as actually practiced in the school-room by day.

Prof. Owens comes forward with his psychological polysyllables, and tells us for example, that Education is "the e-

tiological action of opposites," or that it is "developing in man his theoretical and practical rationality," or, "the conscious working of one will on another so as to produce itself according to some definite aim," &c. He especially delights in considering education as a trinity, indeed he has several trinities. Education, he says, mental, moral and muscular, or wit, worth, and weather, or intellectual, practical and physical, and of each of these he makes a trinity; intellectual, includes perception, analysis and synthesis, practical education includes social, moral and religious, and physical includes the repairing, motor, and nervous activities, in other words, dietetics, gymnastic and sexuality. From this brief synopsis of a part of one of his lectures, you may form some idea of his work. Prof. Ladd on the other hand, takes you quietly into your own school room, and surrounding you with forty or fifty unusually unruly boys (in imagination of course) proceeds to tell you how to preserve order, excite interest in work, and make good and useful men of every pupil. Let me give the subjects of some of his lectures: "School room trials—whispering or communication—loud study—prompting—shuffling of feet—abuse of furniture—speaking out in school—going home before school is out—low talking in recitation—detection of crime—elements of success in a teacher, &c., &c. These are continually interspersed with experiences taken from his thirty-six years of school-room work, full of interest and instruction to the practical teacher.

Prof. Alex. McIver, of Greensboro, one of our Professors, is also delivering a series of lectures on "Physiology," which are practically interesting. And now I fear I have not room left to speak of Gov. Vance's address on "America the Granary of the World," of Prof. W. C. Kerr's addresses on "Climatology" and "the formation of coal," of Hon. A. M. Waddell, A. M., who eloquently told us of "Samuel Finley Reeves Morse, and Mathew P. Manny," of Prof. John Moffat, and others, who either have addressed or will address us during the next three weeks. Surely all will agree that the Normal is a grand success.

NORMAL.

BUSINESS LOCAL COLUMN.

Mr. John Y. Rice will run an Excursion to Henry City, August 4th, returning on the 6th. He has secured ample accommodation, will preserve good order and provide for the comfort of all. Will take on passengers here and at the six mile tank. Round trip, one dollar. 40:2t.

Brown's Horse Eye Water for sale at Theo. F. Klutz's Drug Store, Salisbury. 2t.

Yard wide A sheeting at 7 cents per yard by the bolt at Meroneys & Rogers'.

Ladies' Hose at 5 cents a pair at Meroneys & Rogers'.

Floor Sacks, ready-made at 10 cents apiece at Meroneys & Rogers'.

Wall Paper and Window Shades at Meroneys & Rogers'.

Best Calicoes 7 1/2 cents per yard at Meroneys & Rogers'.

SOMETHING NEW.

In order to introduce our Big Seed Fall Wheat, THE W. in your locality—single grains measuring 1/4 inch in length—I propose to send a sample of the wheat FREE OF CHARGE, to every subscriber to this paper who will name this paper and send a 3 cent stamp to pay postage.

Agents wanted in every county to sell this NEW WHEAT. Address without delay, L. L. OSMENT, Cleveland, Tenn.

Imported buff Piques at 15 cents per yard (very cheap) at Meroneys & Rogers'.

Coates' and Clark's Spool Cotton at 75 cents per dozen at Meroneys & Rogers'.

CANE MILLS & EVAPORATORS—the Blymyer Patent, best in use—prices reduced. Sole agency at Meroneys & Rogers'.

AN ENGLISH MECHANIC ON AMERICAN MACHINES.

Dr. John Anderson, C. E. contributes the report on machines and tools for working wood, metal and stone, at the Centennial to the recently issued volume of reports of the British Commissioners and Judges. As one of the most eminent of English mechanics and engineers, and besides an observer of much acuteness and intelligence, Dr. Anderson is capable of pronouncing a just opinion of our productions—one indeed which Americans will look for with interest and read with respect. Most of Dr. Anderson's report is taken up with descriptions of machines which especially impressed him, and which need not be noted here. He has a straightforward way, however, of telling what he thinks, that enables us to convey pretty clearly the drift of his opinions by a sentence now and then abstracted.

As was the case with most of our foreign mechanical visitors, Dr. Anderson was first struck by our multiplicity of special and labor-saving devices. The invention of these he thinks are our "natural forte and worthy of the old stock probably quickened by the peculiarly favorable circumstances under which they live. It was the display made in this section of the exhibition which most conspicuously brought out the enormous strength of America as a producing power." "No mere word," he says, can convey an idea of the high standard of excellence of American watch making machinery. Sellers' tools were without parallel in the history of exhibitions either for extent, money value, or for originality and mechanical perfection." For torsional, tensional, and malleable qualities the samples of American iron and steel "were equal to the best of any country." "The impression is left upon the minds of European visitors, that American competition in machine tools will soon be upon us, that the competition will not be in regard to price, but rather for high quality and pro-

ductiveness and the capabilities of doing more work with a given expenditure on labor." The concluding paragraph of the report which is the conclusion drawn from the whole, is suggestive.

"In past times England has been the nursery ground of the manufacturing system, her factories have been visited and her system of cotton textile manufactures copied by all nations, but the time seems to have arrived when we shall have to visit America in the same way and for the same purpose, in regard to the production of other things, and there is no time to be lost if we mean to hold our own in the hardware trade of the world, at least in regard to the class of things that are required in large number or quantity."

When we consider the enormously greater area of the American continent, it is a matter of vast importance, that tools have taken such a hold on the American mind which will influence the civilization of the Western world for ages to come, and will exercise a powerful effect not only on that continent, but on Australia, China, and the world generally: this therefore has a profound significance which can scarcely be overrated."

Franklin correspondent Raleigh Observer: There are perhaps 300,000 worthless dogs in the State—mongrels, curs, hounds, bench-legged fies, and others of a thousand grades and mixtures that would defy classification; even Huxley would find himself at sea should he attempt it. A good, substantial tax—not less than \$3—would pay the tuition of the poor children of the State, while the farmer could then raise mutton enough to board them, and wool enough to clothe them while at school. One of my neighbors has lost his last sheep of a large flock, while at least fifty others have been killed within a mile of me recently. I lost a fine ewe last week by a negro's dog that would not sell for 37 1/2 cts at any guano mill in the country. We have asked for a dog tax, but our unoffending legislators tell us that it is 'unconstitutional.' How is it that nearly every sheep raising State in the Union has a dog tax?

Receipt for Hog Cholera.—Take one teaspoonful pulverized coppers and mix with one gallon of salt; and salt the hogs twice a week regularly. This is said to be a sure preventive, and has been known to cure in many instances after the disease has commenced.—Scientific American.

Mr. Willie Kerr, one of the fish experts, arrived yesterday evening from Massachusetts with 100,000 young fish and left for the west at 2 o'clock this morning to distribute them in the waters of the Yadkin and Catawba.—Eal. News.

When you see a young fellow who a year ago used to step up and order larger feed for the crowd with the utmost sang froid patiently trundling a baby carriage along the street on Sunday afternoon and looking chop-fallen in his last season's hat, don't it speak volumes for the reforming influence of woman's society?

DIED.

Near Greensboro, N. C., July 29, 1877, SAMUEL CLARK, in the 60th year of his age.

TUTT'S PILLS A Noted Divine says They are worth their weight in gold.

READ WHAT HE SAYS: Dr. TUTT.—Dear Sir: For ten years I have been a sufferer from Dyspepsia, Constipation, and Piles. Last spring your pills were recommended to me, and I took them (not with late success). I am now a well man, and can give you the most glowing testimonials for your pills. I have gained forty pounds solid flesh. They are worth their weight in gold.

Dr. TUTT has been engaged in the practice of medicine thirty years, and is a thoroughly qualified and successful physician. He is the author of a treatise on the "Dyspepsia," and is a member of the Medical College of Georgia. His pills have the guarantee of being purely vegetable, and are free from all quackery.

His pills succeed in curing the most obstinate cases of Dyspepsia, Constipation, and Piles. They are a true and reliable remedy, and are free from all quackery.

How it is Done. The first object in life with the American people is to "get rich"; the second, how to retain good health. The first can be obtained by energy, honesty and saving; the second, (good health), by using GREEN'S AUGUST FLOWER. Should you be a dependent sufferer from any of the effects of Dyspepsia, Liver Complaint, Indigestion, such as Sick Headache, Palpitation of the Heart, Sour Stomach, Habitual Costiveness, Dizziness of the Head, Nervous Prostration, Low Spirits, &c., you need not suffer another day. Two doses of AUGUST FLOWER will relieve you at once. Sample Bottles 10 cents. Positively sold by all first-class Druggists in the U. S.

ADVICE GRATIS. The Hon. Alexander H. Stephens says:—"The Globe Flower Cough Syrup has proven a most valuable remedy to me."

Gov. James M. Smith of Georgia says:—"I shall always use it with perfect confidence, and recommend it to the public as a remedy which will afford that satisfaction experienced by me and mine. It exceeds everything for coughs, colds and obstinate lung affections."

Ex-Gov. Brown, of Ga., says:—"He finds the Globe Flower Cough Syrup a most excellent remedy."

Such endorsement by our great and good men deserves the attention of the afflicted. Those suffering from cough, colds and lung affections should use the Globe Flower Cough Syrup. It will positively cure consumption.

For sale by Theo. F. Klutz.

The following note was picked up on the street yesterday, can be had by calling at this office: DEAR JOH: Please come home. We need you very much, as several sad accidents have befallen us. John sprained his ankle badly, and Sarah's frosted feet are troubling her. My cows are increasing in number and severity, and the knots on our mule's back are growing larger. Uncle Dick is laid up with the Rheumatism, so do come home, and bring a bottle of Cousens' Lightning Liniment, which is successfully used by our neighbors for each of the above afflictions. You can buy it at any drug store for 50 cents a bottle.

For sale at Dr. Trantham's Drug Store.

On meeting a friend the first inquiry is always regarding his health. Why? Because health is of the first consideration; yet many will sit in a cold, damp theatre, regardless of weak lungs and hacking cough. Discard some of the ephemeral pleasures of the day, such as theatre-going, cigar-smoking, &c., and invest your money in something that will be a lasting benefit. For instance, Cousens' Compound Honey of Tar costs only 50 cents, and will cure your Cough, Cold, and all diseases of the Throat and Lungs. Try it. For sale at H. T. Trantham's Drug Store. 40:3u.

Theo. F. Klutz is giving away a handsome book entitled "Pearls for the People," containing much valuable information and many interesting articles. It also contains a history of the discovery of the "Hepaticus," for diseases of the liver, dyspepsia, constipation and indigestion, &c., and gives positive assurance that when the Hepaticus is used it effects a permanent and lasting cure of the diseases, which prevail to such an alarming extent in our country. Take the Hepaticus for all diseases of the liver.

HIGHEST HONORS AT THE UNITED STATES CENTENNIAL World's Exposition, 1876

MASON & HAMLIN CABINET ORGANS Unanimously assigned the "FIRST RANK" IN THE "SEVERAL REQUISITES" Of such Instruments!

The MASON & HAMLIN ORGAN CO. have the honor to announce that the organs of their manufacture have been unanimously assigned the "FIRST RANK" in the SEVERAL REQUISITES of instruments of the class" by the Judges at the CENTENNIAL EXHIBITION at Philadelphia, 1876, and are the ONLY INSTRUMENTS OF THIS GENERAL CLASS AWARDED THIS RANK. This is the severest commendation by the best makers, before one of the most competent juries ever assembled.

They have also received the MEDAL, but, as it well known, medals of equal merit have been awarded all articles deemed worthy of recognition so that it will be easy for many makers to advertise that they have received "first medals."

The differences in competing articles, and their comparative excellence, are recognized in the Reports of the Judges, from which the following is an extract:

"THE MASON & HAMLIN ORGAN CO.'s exhibit of Reed Organs and Harmoniums shows instruments of the FIRST RANK IN THE SEVERAL REQUISITES OF INSTRUMENTS OF THE CLASS—viz.: Smoothness and equal distribution of tone, scope of expression, resonance and singing quality, freedom and quickness in action of keys and bellows, with thoroughness and workmanship, combined with simplicity of action." (Signed by all the Judges.) The Mason and Hamlin Organs are thus declared to rank first, not in one or two respects only, but in the SEVERAL REQUISITES of such instruments, and are the ONLY ones assigned this rank. This triumph was not unexpected, for the Mason & Hamlin Cabinet Organs have uniformly been awarded the highest honors in competitions in America, there having been scarcely six exceptions in hundreds of competitions. They were awarded highest honors and

FIRST MEDALS Paris 1867; Vienna '73 Santiago '75; PHILADELPHIA, 1876, and have thus been awarded highest honors at

Every World's Exposition at which they have been exhibited; being the ONLY AMERICAN ORGANS which have ever obtained ANY AWARD

at any competition with best European makers, or in any European World's Exposition. At the CENTENNIAL, with improvements, exhibited at NEW YORK, the Mason and Hamlin Organs were awarded highest honors for their material and workmanship. Organs sold for cash or on installment, or rented until rent paid. Every Organ warranted to give entire satisfaction in every respect. A liberal discount to Teachers, Ministers, Churches, etc. Sheet music at half price. HORACE WATERS & SONS, Manufacturer & Dealers, 40 East 14th St., Union Square, N. Y.

A GREAT OFFER!! We will during the month of August, dispose of 100 PIANOS & ORGANS, new and second-hand of first-class makers including WATERS' at lower prices for cash or on installment or to let until paid for than ever before offered.
