During the year ending with June last there was taken up under the homestead law 1,875,900 acres. New land taken up under the homestead law is fur actual cultivation, and is generally taken in lots of 160 acres. It would appear therefore, that more than 17,000 new farms were commenced last year under the homestead law alone. But this is not all. There were sold during the year 640,961 acres for cash, and 137,370 acres were allotted on military land warrants. It is no doubt true that a portion of these 778,331 acres were bought or entered by other persons who made investments of this nathe 778,331 acres were purchased or entered for the purpose of immediate settlement or cultivated; and this calculation would give us 2,432 more new farms of 160 acres each. There were also 21,048 taken up under the timber culture law. about 19,500 new farms commenced du- tells this story: ring the year. This means 19,500 new homes.
