

LOCAL.

Good fortune, of which they are very proud, has recently befallen our highly respected citizens ED. NEAVE and P. N. HELLIG. "Doing as well as could be expected."

There are, by actual count, one dozen schools in this city: Three male and nine female. None, we are sorry to say, are largely attended, though the patronage will, no doubt, increase as the season advances.

John Whitehead and W. L. Crump leave this week for the University of Penn., in Philadelphia, where they propose to finish their medical studies. These are promising young men and bid fair to adorn the profession they have chosen.

See Mrs. Neave's advertisement. Her music school will reopen on the 27th inst. Those taught in her school have, besides thorough training, the advantage of playing in company with other instruments, which is very important in the matter of correct time keeping.

Bull.—The dining hall of the Boyden House presented a brilliant scene last Friday night. Our young ladies were out in fancy dress, and with matchless grace gliding through the mazy dance they seemed beautiful above all others. The Raleigh Italian Band furnished the music.

And now, since Col. Heilig's cow tale is told, there comes along a man who requests us to state that he knows of and has seen a cow that gives 10 gallons of milk per day. He is willing to make affidavit, if necessary, to satisfy a scrutinizing public of the correctness of the statement. We make the announcement wholly on his responsibility.

Burr's Oceanicon, referred to last week as failing to come to hand as advertised, and leaving bills unpaid, have explained the failure to come as owing to change of programme in routes of which the advance agent was not advised at the time he was here. They have ordered unpaid bills to be sent to Wilmington.

The charades given by the young people of Thyatira Church, last Tuesday night, at J. S. McCubbin's residence, was an enjoyable affair. They had the room tastefully decorated and the plays were conducted in a style that could not be complained of. The after-part—supper—was very interesting and wholesome, and was truly appreciated by all. Band No. 2, furnished the music and was numerous-ly complimented.

Scared.—A green chap with his wife and a dog, accredited by the Charlotte Observer to Rowan county, stopped at the Charlotte Hotel, Wednesday night of last week, and about 10 o'clock at night put his head out of a window and cried murder. It very soon brought a crowd into his room, when he was found standing in the middle of the floor trembling like an aspen, his wife lying on the bed, his dog tied to the bed post, and his rifle standing in a corner. The only account he could give of his fright was that somebody knocked at the door of his room!

New Goods.—The usual hurry and bustle on the receipt of New Goods is beginning to be seen and heard in our stores. Manney & Ross seem to have got the start by a little, and are now opening a large stock. Merocys & Rogers are also coming in and others will be on hand directly. But if you want a beautiful hat in the latest style—soft light and nice—go to Manney & Ross by all means. They have them and are letting them go mighty cheap. They gave us one just for the pleasure of fitting us, and we have no doubt they intend to do the handsome to all their customers. There are quantities of goods in town and coming which will be sold in very short profits, and those wishing to buy should come and try the market.—Come and try it.

Apples.—There are several gentlemen in this vicinity who have paid more than ordinary attention to the cultivation of fruits for a number of years past, and many who are just beginning to do so. Mr. Alfred Johnston, it is conceded, stands at the head of the list in the extent of his orchards, the number and variety of his trees, and probably in the excellence of his fruit. He has two hundred "magnanim bonum" trees now dropping their beautiful and unsurpassed fruit, besides large numbers of the "king" and "queen," "pippins," "rusty coats," and other varieties beyond our naming. He is able to supply a large demand and does principally supply our market, leaving a large quantity to be made into cider and vinegar and to be fed to stock.

Mr. John C. Miller stands next to Mr. Johnston, and as is his wont, never brings to market an indifferent thing, whether it be fruit, mutton, beef, or other farm product; and as a consequence he always obtains the highest prices. But there are evident signs of improvement amongst our farmers in reference to orchards, vineyards, and other interests of the farm which must ere long till well on their prosperity.

The quantity of pork and other improper food consumed is enormous and produces its inevitable results in innumerable types of disease, especially those of the blood, exhibited in Pimples, Blotches, Sores, etc., all of which, however, yield rapidly and surely to Dr. Bull's Blood Mixture.

Specimens Sent In.—Col. Polk received by express yesterday, some splendid specimens of corn, millet, oats, &c., from Person county, to be laid up in the Agricultural Museum.

A TRUE BILL.

Two Sunday School lads have some fun. Ed and John were good boys—they attended Sunday school regularly and were considered by dotting parents and Sunday school teachers as pious boys. They had learned their lessons well and left their home with light hearts. John met Ed at a corner and hollered:

"Hayo Ed!" "Hayo yourself, where did you get that cheeroot?" "I got 'em yesterday." "Got any more?" "Not here—got some more 'round at the grave yard fence, and, by golly, I've got a bottle of lemon syrup 'round there covered up in the leaves; how's that?" "Is that so? Let's go 'round?" "What, leave Sunday school?" "Yes, we can go to Fisher's field to that spring and have a good time, what do you say?"

"What will you tell the old folks?" "O, they won't know—we can watch and go home just as Sunday school lets out." "All right, I'm your pard." Off they went to the grave yard, got the cheeroots and bottle from the fence corner and made for the fields. They found the spring and opened the bottle, when the stubborn truth presented itself: They had no drinking vessel.

"What will we do, Ed?" "By ganny, I don't know." "Can't you go home and get a cup?" "No, by jacks, they'll catch me."

"Well, what you going to do?" "I tell you, John, pour a little out in your hand and dip in the water—let's try it." "All right." "It's bully, ain't it Ed?" "Yes." "John, how would it do to drink some out of the bottle and then drink water, that would make lemonade." "That's so, let's try it!" "You do it first." "No, you, 'cause you are the biggest." "Well," They finished the bottle in that way, then lit their cheeroots and started home. Sunday school was just out, and they got home about the right time, but both very sick. Ed was compelled to "fess" up, which he did manfully, and took his whipping. But John played his role through.

"John what's the matter with you?" "I'm sick ma." "What made you sick?" "I don't know."

"Yes you do—out with it!" "I—I was running home from Sunday school—an—an—I caught a fly in my mouth and swallowed it before I could stop and get it out, and it made me so sick ma I'm so sick now—I must-er swallowed three or four—please let me go to bed!"

"John you have been smoking, I smell tobacco!" "No mam, I never."

"Now sir, I want the truth, you can't fool me, I smell tobacco."

"Well—er—I—some of the big boys bet me a blue agate I could not smoke a roll of paper, and they had it full of tobacco, and I did not know it—and I smoked it—here's the agate—ain't it a head taw?"

"Yes sir, I'll taw you."

And she gave him a good flogging and sent him to the upstairs closet till supper.

TO THE INDUSTRIAL CLASSES OF NORTH CAROLINA.

NORTH CAROLINA, DEPARTMENT OF AGRICULTURE, RALEIGH, N. C., Sept. 17, 1877.

The Department of Agriculture has made an arrangement with a responsible party to begin the publication of a weekly journal to be devoted exclusively to the agricultural and industrial interests of the State.

While the Board acknowledges with pleasure the very cordial and uniform support of the press of the State, and avails itself of this opportunity to express its high appreciation of the same, yet in the progress of the work of the Department it was found absolutely necessary to have a more available medium of communication with the farmers, than was afforded even by the generous aid of the State papers. The plan of publishing all matter from this office in job form, was found to be very expensive and consequently, with our limited means, very inefficient, for the publication could not reach the masses, for whom they are chiefly designed. In the onward movement, which has been inaugurated for building up the material interests of our State, the Department earnestly desires to have the continued support of the Press, and that a journal devoted exclusively to this noble work will be favored with its co-operation and the encouragement of the people.

It is to be an eight page, forty-eight columns weekly, and styled "The Farmer and Mechanic." It is to be conducted under the general supervision of the Board of Agriculture. Its existence, for at least twelve months is guaranteed by proper bond. It will have no political affiliation or bias, or be connected with any other paper.

BUSINESS LOCAL COLUMN.

BELL, THE JEWELER, Has stopped selling his stock at cost and has gone North to purchase

A NEW STOCK. Will return very soon with the Largest and Finest Stock ever exhibited in this market. 49: 1t.

Richmond Enquirer: A gang of tramps numbering about twenty made a descent upon the depot at Warrenton Junction, Va., on the Virginia Midland railroad, on Tuesday, and robbed the building of everything portable it contained, amounting in value to about \$400. They next attempted to board the pay-train near Manassas, but were kept at bay until the engine could be reversed and the train run back to Manassas. Then a number of citizens organized a posse and succeeded in capturing six of the gang, who are now in jail at Brentsville, Va.

UNDER TWO FLAGS.

A correspondent of the Petersburg Index-Appel informs that paper that "a son of the lamented John V. Mason is a captain in the French army. At thirteen years of age he was the bearer of dispatches from Napoleon's Court to this Government, and subsequently served on Gen. Hampton's staff during the civil war." We can add something to this. George Mason, the young soldier referred to, served throughout the Confederate war as a private in a cavalry company, and was severely wounded in the ankle. After the war he was employed as a clerk in the Tredegar Iron Works at Richmond. While there he wrote to the Emperor Napoleon, who had the highest regard for Judge Mason, and asked for an appointment of officers in the line of the French army are made from civil life. The officers are graduates of the military academies, or are promoted from the ranks. This is the rule. The Emperor, with characteristic kindness, made an exception in Mr. Mason's favor, and gave him a commission as sous-lieutenant in a line regiment on service in Algeria. Lieut. Mason joined his regiment in 1866, served with distinguished valor in the Franco-Prussian war, was desperately wounded, was promoted, step by step, to the rank of Captain, and decorated with the legion of Honor. The youthful Confederate has made a record of which his old comrades in Virginia may well be proud. Under two flags he has been devoted, gallant, and true!—Charleston News and Courier.

TELEGRAPHIC BRIEFS.

Gen. McClellan accepts the Democratic nomination for the Governor of New Jersey. The Fidelity Savings Bank, of Chicago, closed its doors yesterday, evening. An injunction having been served, a receiver will be appointed for it. Rev. Jas. A. Duncan, a distinguished divine of the M. E. Church, South, and President of Randolph Macon College, Va., died at Ashland.

The Chicago grand jury yesterday indicted certain officers of the State Savings Bank for embezzlement of \$700,000. None of them are in the city, nor are their whereabouts known.

Stately as a Wheat County.—While Chatham produces the largest amount of wheat of any co., in the State, yet Stately produces the finest quality of commercial wheat. Not satisfied, however, with this honor, this proud little Stately is now stepping to the front for the laurels of the largest producer, and we warn our neighbor Chatham to look out! Mr. G. T. Dunlop, of Centre township, Stately county, raised 60 bushels of wheat from 2 bushels of seed, and then intimates that it was not an extraordinary wheat year at that. Hurrah, for Stately; hurrah! Chatham, don't let 'em catch you.—Raleigh Observer.

A Mecklenburg Boy Ahead.—Mr. Wm. Barney, a young man of Davidson College, who having graduated about two years ago at that institution, and then went to Heidelberg, Germany, where he has been ever since, is taking a splendid stand in this world-famed university. He is devoting the whole of his attention to the study of chemistry, and we are informed that he has already distinguished himself as any other student of the university. Prof. Latimer, of Davidson College, who went to Heidelberg at the same time, upon his return brought the most gratifying reports of the progress which Mr. Barney was making, and the news concerning him which has since that time been received, is not only highly gratifying to his family and friends, but to the State, who bears a reputation as the finest chemist in the world, is said to have taken a great interest in the young American, from the first, regarding him as a young man of more than ordinary intellectual endowments.—Char. Observer.

THE CONFEDERATE SOLDIERS' HEROES, OR THE LOST CAUSE.—A magnificent picture, beautiful in design and artistic in execution. It represents a Confederate soldier after the war returning to his home, which he finds ruined by a mob of soldiers, looting and burning. The scene is set in a ruined town, with a single house standing amidst the ruins. The artist has done his work with a masterly hand, and the picture is a masterpiece of art. It is a noble work, and one that will do much to keep the memory of our brave soldiers alive. It is a noble work, and one that will do much to keep the memory of our brave soldiers alive.

Joseph A. Harris, late of the Raleigh city government, and who was made to retire, being a defaulter for over \$700, publishes a card in the News in which he says: "I propose to ventilate the city government from March 1, 1876; I propose to acknowledge my faults and misdoings; I propose to tell the finance committee some things that they suppose is not known outside of their little private meetings. I shall have to strike some dead friends pretty hard, but I am forced to do it. I shall only state facts and name witnesses."

DEATH OF DR. LONG OF SALISBURY.—Dr. Alexander Long, the oldest male citizen of Salisbury, and one who was universally beloved and respected, breathed his last at his home in that place Sunday night. Dr. Long was in his eighty-eighth year, and had several years ago retired from the practice of his profession, which he had followed with great success for sixty years. He had been for fifty-six years one of the elders of the First Presbyterian church of Salisbury, and will be buried from that church to-day. All the places of business will be closed in respect to his memory. He leaves a large posterity, children, grand-children and great-grand-children, who are of the best people of Rowan. "The memory of the just is blessed."—Char. Observer.

The Home, of Charlotte: Miss Sallie Peck, of Hampden Sydney, Va., who is favorably remembered here as instructress in music at the Charlotte Institute for Young Ladies, a year or two ago, was married recently to a Mr. Booker, of Richmond.

(Wilmington Star.)

A CURE FOR DIPHTHERIA.—As any suggestion of a remedy for this terrible disease, which has proved fatal in so many instances in different portions of the State, not excepting our own city, must be of interest to the general public, we give the following, which is credited to "a correspondent of a Victorian paper:"

"Should any of your family be attacked with the diphtheria do not be alarmed, as it is usually an exceedingly cured without a doctor. When it was raging in England a few years ago, I accompanied Dr. Fields on his rounds to witness the so-called 'wonderful cures' he performed, while the patients of others were dropping on all sides. The remedy to be so rapid, must be simple. All he took with him was powdered sulphur and a quill, and with these he cured every patient without an exception. He put teaspoonful of flour of brimstone into a wine glass of water and stirred it with his finger instead of a spoon, as the sulphur does not readily amalgamate with water. When the sulphur was well mixed he gave it as a gargle, and in ten minutes the patient was out of danger. Brimstone kills every species of fungus in man, beast and plant in a few minutes. Instead of spitting out the gargle, he recommended the swallowing of it. In extreme cases, in which he had been called just in the nick of time, when the fungus was too nearly closing the throat to allow the gargling, he blew the sulphur through a quill into the throat, and after the fungus had shrunk to allow of it, then the gargling. He never lost a patient from diphtheria.

If a patient cannot gargle, take a live coal, put it on a shovel, and sprinkle a spoonful or two of flour of brimstone at a time upon it; let the sufferer inhale it, holding the head over it, and the fungus will die. If plentifully used the whole throat, and the patient can walk about in it, inhaling the fumes, with doors and windows closed. The mode of fumigating a room with sulphur has often cured most violent attacks of cold in the head, chest, etc., at any time, and is recommended in cases of consumption and asthma."

TRIUMPH OF SCIENCE.

Gray Hair can be changed to a glossy black by a single application of Queen's Delight. It is guaranteed as harmless as water. Price \$1.00. Office 35 Murray St., N. Y.

WHAT IS QUEEN'S DELIGHT?

It is a plant that grows in the South, and is especially adapted to the cure of diseases of that climate.

NATURE'S OWN REMEDY.

Entering at once into the blood, expelling all scrofulous, syphilitic, and rheumatic affections. Alone, it is a searching alternative, but when combined with Sarsaparilla, Yellow Dock, and other herbs, it forms Dr. T. T. Sarsaparilla and Queen's Delight.

HEALTHY, SOLID FLESH.

As an antidote to syphilitic poison it is strongly recommended. Hundreds of cases of the worst type have been cured by it. Being perfectly vegetable its continued use will do no harm. The best time to take it is during the summer and fall; and instead of debility, headache, fever, and other ailments, it will give robust health. Sold by all druggists. Price, \$1.00. Office, 35 Murray Street, New York.

How it is Done.

The first object in life with the American people is to "get rich"; the second, how to retain good health. The first can be obtained by energy, honesty and saving; the second, (good health) by using Queen's Delight. It is a searching alternative, but when combined with Sarsaparilla, Yellow Dock, and other herbs, it forms Dr. T. T. Sarsaparilla and Queen's Delight. It is a searching alternative, but when combined with Sarsaparilla, Yellow Dock, and other herbs, it forms Dr. T. T. Sarsaparilla and Queen's Delight.

ON MEETING A FRIEND THE FIRST INQUIRY IS ALWAYS REGARDING HIS HEALTH.

Why? Because health is of the first consideration; yet, many will sit in a cold, damp theatre, regardless of weak lungs and hacking cough. Discard some of the ephemeral pleasures of the day, such as theatre-going, cigar-smoking, &c., and invest your small change in something that will be a lasting benefit. For instance, Cassell's Compound Honey of Tar costs only 50 cents, and will cure your Cough, Cold, and all diseases of the Throat and Lungs. Try it. For sale at H. T. Trautman's Drug Store. 403-34.

THE MASON & HAMLIN ORGAN CO.'S exhibit of Reed Organs and Harmoniums shows Instruments of the FIRST RANK IN THE SEVERAL REQUISITES OF INSTRUMENTS OF THE CLASS, viz.: Smoothness and equal distribution of tone, scope of expression, resonance and singing quality, freedom and quickness in action.

These instruments are made of the finest material and they are the ONLY ones assigned this rank. This triumph was not unexpected, for the Mason & Hamlin Cabinet Organs have uniformly been awarded the highest honors in competitions in America, there having been scarcely six exceptions in hundreds of competitions. They were awarded highest honors and

FIRST MEDALS Paris 1867; Vienna '73 Santiago '75; PHILADELPHIA, 1876;

and have thus been awarded highest honors at Every World's Exposition at which they have been exhibited; being the ONLY AMERICAN ORGANS which have ever obtained

ANY AWARD

at any competition with best European makers, or in any European World's exposition! NEW STYLES, with improvements, exhibited at the CENTENNIAL; elegant new cases in great variety. Prices very lowest consistent with best material and workmanship. Organs sold for cash or on installments, or rented until rent pays. Every Organ warranted to give entire satisfaction to every reasonable purchaser of THE MOSBY REPUTED ILLUSTRATED CATALOGUES sent free.

MASON & HAMLIN ORGAN CO.—154 Tremont Street, Boston; 25 Union Square, New York; 80 and 82 Adams Street, Chicago; 10 Great Marlborough Street, London; 25 Backer Strasse, Vienna; 114 Colindale Avenue, Melbourne.

Sept. 21, 1877

TUTT'S PILLS

A Noted Divine says They are worth their weight in gold.

READ WHAT HE SAYS: Dr. TUTT—Dear Sir: For ten years I have been a martyr to Dyspepsia, Constipation, and Piles. Last Spring your pills were recommended to me; I used them (not with little faith). I am now a well man, have good appetite, digestion perfect, regular stools, pills gone, and I have gained forty pounds solid flesh. They are worth their weight in gold. Rev. R. W. STIMPSON, Louisville, Ky.

TUTT'S PILLS CURE SICK HEADACHE. TUTT'S PILLS CURE DYSPEPSIA. TUTT'S PILLS CURE CONSTIPATION. TUTT'S PILLS CURE PILES. TUTT'S PILLS CURE FEVER AND AGUE. TUTT'S PILLS CURE BILIOUS COLIC. TUTT'S PILLS CURE BRUISED OR SWOLLEN LIMBS. TUTT'S PILLS CURE TORPID LIVER.

Dr. TUTT has been engaged in the practice of medicine thirty years, and for a long time was director of students in the Medical College of Georgia. Being personally acquainted with the Pills he has the guarantee that they are prepared on scientific principles, and are free from all poisons.

He has succeeded in combining in them the best of the antagonistic qualities of a "stringent" and a "purgative" in a perfectly safe and palatable form.

Their first object is to increase the appetite by causing the food to be properly assimilated. Thus the system is nourished, and by their tonic qualities, they invigorate, regularize and healthy conditions are produced.

Their second object is to purify the blood, and hence their efficacy in curing scrofulous, syphilitic, and rheumatic affections, and all diseases of the blood, such as Eczema, Psoriasis, and other skin diseases.

Their third object is to cure the liver, and hence their efficacy in curing Bilious Colic, and all diseases of the liver, such as Dropsy, and other ailments.

Their fourth object is to cure the bowels, and hence their efficacy in curing Constipation, and all diseases of the bowels, such as Hemorrhoids, and other ailments.

Their fifth object is to cure the stomach, and hence their efficacy in curing Dyspepsia, and all diseases of the stomach, such as Indigestion, and other ailments.

Their sixth object is to cure the head, and hence their efficacy in curing Headache, and all diseases of the head, such as Neuralgia, and other ailments.

Their seventh object is to cure the chest, and hence their efficacy in curing Cough, and all diseases of the chest, such as Bronchitis, and other ailments.

Their eighth object is to cure the lungs, and hence their efficacy in curing Consumption, and all diseases of the lungs, such as Phthisis, and other ailments.

Their ninth object is to cure the kidneys, and hence their efficacy in curing Dropsy, and all diseases of the kidneys, such as Nephritis, and other ailments.

Their tenth object is to cure the bladder, and hence their efficacy in curing Stricture, and all diseases of the bladder, such as Catarrh, and other ailments.

Their eleventh object is to cure the prostate, and hence their efficacy in curing Prostatitis, and all diseases of the prostate, such as Gleet, and other ailments.

Their twelfth object is to cure the uterus, and hence their efficacy in curing Leucorrhoea, and all diseases of the uterus, such as Menstrual Disorders, and other ailments.

Their thirteenth object is to cure the ovaries, and hence their efficacy in curing Ovarian Disorders, and all diseases of the ovaries, such as Pelvic Inflammation, and other ailments.

Their fourteenth object is to cure the vagina, and hence their efficacy in curing Vaginitis, and all diseases of the vagina, such as Gonorrhoea, and other ailments.

Their fifteenth object is to cure the cervix, and hence their efficacy in curing Cervicitis, and all diseases of the cervix, such as Erosion, and other ailments.

Their sixteenth object is to cure the vagina, and hence their efficacy in curing Vaginitis, and all diseases of the vagina, such as Gonorrhoea, and other ailments.

Their seventeenth object is to cure the cervix, and hence their efficacy in curing Cervicitis, and all diseases of the cervix, such as Erosion, and other ailments.

Their eighteenth object is to cure the vagina, and hence their efficacy in curing Vaginitis, and all diseases of the vagina, such as Gonorrhoea, and other ailments.

Their nineteenth object is to cure the cervix, and hence their efficacy in curing Cervicitis, and all diseases of the cervix, such as Erosion, and other ailments.

Their twentieth object is to cure the vagina, and hence their efficacy in curing Vaginitis, and all diseases of the vagina, such as Gonorrhoea, and other ailments.

Their twenty-first object is to cure the cervix, and hence their efficacy in curing Cervicitis, and all diseases of the cervix, such as Erosion, and other ailments.

Their twenty-second object is to cure the vagina, and hence their efficacy in curing Vaginitis, and all diseases of the vagina, such as Gonorrhoea, and other ailments.

Their twenty-third object is to cure the cervix, and hence their efficacy in curing Cervicitis, and all diseases of the cervix, such as Erosion, and other ailments.

Their twenty-fourth object is to cure the vagina, and hence their efficacy in curing Vaginitis, and all diseases of the vagina, such as Gonorrhoea, and other ailments.

Their twenty-fifth object is to cure the cervix, and hence their efficacy in curing Cervicitis, and all diseases of the cervix, such as Erosion, and other ailments.

Their twenty-sixth object is to cure the vagina, and hence their efficacy in curing Vaginitis, and all diseases of the vagina, such as Gonorrhoea, and other ailments.

Their twenty-seventh object is to cure the cervix, and hence their efficacy in curing Cervicitis, and all diseases of the cervix, such as Erosion, and other ailments.

Their twenty-eighth object is to cure the vagina, and hence their efficacy in curing Vaginitis, and all diseases of the vagina, such as Gonorrhoea, and other ailments.

Their twenty-ninth object is to cure the cervix, and hence their efficacy in curing Cervicitis, and all diseases of the cervix, such as Erosion, and other ailments.

Their thirtieth object is to cure the vagina, and hence their efficacy in curing Vaginitis, and all diseases of the vagina, such as Gonorrhoea, and other ailments.

Their thirty-first object is to cure the cervix, and hence their efficacy in curing Cervicitis, and all diseases of the cervix, such as Erosion, and other ailments.

Their thirty-second object is to cure the vagina, and hence their efficacy in curing Vaginitis, and all diseases of the vagina, such as Gonorrhoea, and other ailments.

Their thirty-third object is to cure the cervix, and hence their efficacy in curing Cervicitis, and all diseases of the cervix, such as Erosion, and other ailments.

Their thirty-fourth object is to cure the vagina, and hence their efficacy in curing Vaginitis, and all diseases of the vagina, such as Gonorrhoea, and other ailments.

Their thirty-fifth object is to cure the cervix, and hence their efficacy in curing Cervicitis, and all diseases of the cervix, such as Erosion, and other ailments.

Their thirty-sixth object is to cure the vagina, and hence their efficacy in curing Vaginitis, and all diseases of the vagina, such as Gonorrhoea, and other ailments.

Their thirty-seventh object is to cure the cervix, and hence their efficacy in curing Cervicitis, and all diseases of the cervix, such as Erosion, and other ailments.

Their thirty-eighth object is to cure the vagina, and hence their efficacy in curing Vaginitis, and all diseases of the vagina, such as Gonorrhoea, and other ailments.

Their thirty-ninth object is to cure the cervix, and hence their efficacy in curing Cervicitis, and all diseases of the cervix, such as Erosion, and other ailments.

Their fortieth object is to cure the vagina, and hence their efficacy in curing Vaginitis, and all diseases of the vagina, such as Gonorrhoea, and other ailments.

Their forty-first object is to cure the cervix, and hence their efficacy in curing Cervicitis, and all diseases of the cervix, such as Erosion, and other ailments.

January 22 1876—4t.

HIGHEST HONORS AT THE UNITED STATES CENTENNIAL World's Exposition, 1876

MASON & HAMLIN CABINET ORGANS Unanimously assigned the "FIRST RANK" IN THE "SEVERAL REQUISITES" Of such Instruments!

The MASON & HAMLIN ORGAN CO. have the honor to announce that the organs of their manufacture have been unanimously assigned the "FIRST RANK" in the SEVERAL REQUISITES of instruments of the class by the Judges at the CENTENNIAL EXHIBITION at Philadelphia, 1876, and are the ONLY INSTRUMENTS OF THIS GENERAL CLASS AWARDED THIS RANK.

This is the highest and most coveted honor that can be bestowed upon any class of instruments, and it is a tribute to the skill and genius of the makers, before one of the most competent juries ever assembled.

They have also received the MEDAL, but, as is well known, medals of equal merit have been awarded all articles deemed worthy of recognition; so that it will be easy for many owners to advertise that they have received "first medals."

The differences in competing articles, and their comparative excellence, are recognized in the Reports of the Judges, from which the following is an extract:

"THE MASON & HAMLIN ORGAN CO.'s exhibit of Reed Organs and Harmoniums shows Instruments of the FIRST RANK IN THE SEVERAL REQUISITES OF INSTRUMENTS OF THE CLASS, viz.: Smoothness and equal distribution of tone, scope of expression, resonance and singing
