Carolina Watchman.

THUSDAY, OCTOBER, 18, 1877.

Roman Catholicism .- We copy an article written to the New York Herald on the Romish church in England, which presents, as it were, a view from behind the scenes, eminently suggestive to Protestants of this country. Those who wish to be informed on what the church of Rome builds its hope of success will find this a very instructive letter from an able wri-

Cleonatra's Needles .- We publish on first page an interesting account of these ancient Egyptian obeliks and the removal of one of them to England. The New York World of a more recent date than that from which the account referred to was copied, announces that a generous New-Yorker has contributed the whole sum necessary to bring to America the other. Thus it is settled that New York House shall have been effected before a is to have an Egyptian obelisk.

The Raleigh Register (republican) defends Gov. Vance in the use of the pardoning power in the case of Chipman of Guilford, and Hedrick of Yadkin. The editor examined the records in these cases before expressing an opinion, and when satisfied there had been no abuse, had the manliness to do the Governor the simple justice to say he did right.

We have never doubted Governor Vance's ability to defend these actions, not, however, because we knew anything of the facts which prevailed with him, but because we have confidence in the Governor's good sense and honesty. He has never given his fellow citizens occasion to doubt either, and they will certainly trust him until he does.

Diphtheria .- This dreadful disease prevails at several points with alarming fatality. In portions of this county, at Thomasville, in Davidson, and at Company Shops, it has carried off a number of children. There have been two cases in this town within the last month, both fatal.

But it will be well for the public to know that not every case of sore throat is diphtheria. We have heard of doctors boasting of many cases being cured under their treatment. It may be so, and if so, they ought to publish their treatment for the benefit of the profession and the world; for the most learned Doctors throughout the country, have as yet found their knowledge, and skill, and medicines all baffled by a genuine case of this disease. There is no ailment of the human body attracting more earnest attention and study of the Medical world than this. Many theories have been published and treatments proposed, but as, yet they have failed to verify the hopes raised by them, and the profession is still in the

CONGRESS AND THE PRESIDENT'S MESSAGE.

Wednesday morning's mail brought pretty full telegraphic reports of proceedings in Congress together with the Presidents' message. Proceedings in Congress are chiefly in reference to the settlement of disputed claims to seats in the Senate and House. The Senate is full except Morton and Sharon and the excluded Senators from South Carolina and Louisiana. The question of swearing in the two members of the House from South Carolina, Rainey and Cain, was debated and-decided in the affirmative 181 to 88, and they were admitted to qualify. Darrell of Louisiana was also sworn in, The case of Elam, of La., was discussed but no conclusion reached.

Letter carriers are petitioning for increased pay.

repeal of disabilities imposed by the 14th amendment. Referred. Also a bill to repeal the test oath.

The President's message is almost ex clusively limited to the subject for which the special session was called, to wit: appropriations for the army and navy He hopes these will be made as speedily as possible, and before Congress takes up the question of increasing or diminishing the army, as the men in the service are badly in need of their pay. He also urges Congress to make an appropriation to secure a fair representation of the industrial interests of the country in the great French exhibition which opens in Paris next May, Also, that \$8,000 be appropriated to cover the expenses of a Commissioner to the international prison Congress to be held at Stockholm next

A Rowan correspondent of the Ralicgh Observer says:

I had an interview with Mr. Special Ronte Agent Long some ten or twelve days ago. He says that if the people will get up petitions for mail routes and postoffices, they can get them, and blames our duty in this matter, except Hon. R. B. Vance, who, to use his expression, is "a member of Congress of the right pluck." as he seeks first, the interest of his constituents, and then the general good of all. get up one soon, and try and fix it so that we can get your paper before it gets ten

I should like to be there to see the machinery for saving labor on the farm which interests me most.

THE OUTRAGES IN WESTERN CAROLINA.

Referring to the infamous conduct of revenue officials in Western North Carolina, and the necessity of having a thorough investigation into the outrages practiced upon the people of that section, the Raleigh Observer says:

"The only hope then is in a Congressional investigation, and fortunately that may be speedily had. And we do most earnestly call upon our Representatives to see to it that not a week shall pass after the organization of the committee is raised and its members ap pointed for the purpose of going to the bottom of this whole matter. That this shall be done is due to the long oppressed people of that portion of the State in which Judge Dick and his son-in-law, Marshal Douglas, have so long had undisputed sway.

We heartily second the call thus made upon our representatives in the U. S. Congress to see to it that a searching and speedy inquiry be made, and the truth of the matter be fully revealed. It is a burnng shame that such monstrous iniquities could have been practiced in our State, as is charged, within the circuit of a United States Judge, and yet that the guilty ones should have thus far escaped .- Wilming-

Guilty or innocent the charges having been made an investigation should follow. We advocate it also.

[Frq. the Wilmington Star.] WHAT A PACIFIC POLICY HAS AC COMPLISHED IN SEVEN MONTHS.

AN OPEN LETTER TO GENERAL VANCE. We have been shown the following letter to General Vance, which explains it-

Asheville, N. C., Oct. 9, 1877.

Hon. R. B. Vance, Washington, D. C .: DEAR SIR :- After much unavailing protestation and petitioning, supported by a mass of incontrovertible and admitted facts mainly from Republican sources, in this Congressional District, fully and frequently communicated to the proper Executive authority at Washington, the nuisance of the mal-administration of the flicers connected with the United States Courts in this Western Judicial District, remains unabated. It is given out, as hear, that the great personal influence of ustice from him and his guilty accomdices; and that, though the President and his Cabinet, in their wild hunt after Civil Service Reform in the great State of Carolina, are not afraid to enter the list against Senator Conkling, and have even extinguished Packard and Chamberlain and their confederates, they quail and cower in the presence of the owner of the name its gigantic proportions. The lucky fishof the Little Giant of Illinois. If this is so, it ought not to be so; and, as one of many thousands of your Republican constituents, about to have the life stifled

Introduce a bill to abolish this Judicial in passing such a bill. The President will thus be relieved from the imputed nightare in office, or those who want to be in, will all be satisfied and thankful; and tional obligations to you as a vigilant, faithful and honest public servant.

Very respectfully, Marcus Erwin. The Citizen appends to this letter a number of new charges against the "Dougdency. There are now signs of revival of las Dynasty." No doubt our delegates in Congress will push this business to some

A DEVIL FISH.

A Monster of the Deep Brought to the New York Aquarium Ten Terrible Arms Thirty Feet Long and Eyes Glaring in Eight Inch Sockets.

(Special Correspondence of the N. Y. World.) St. John's, N. F. September 29 .- There is great excitement here at present over the exhibition of a splendid specimen of the gigantic cuttle-fish, commonly called done, it seems safe to say 'the Southern devil-fish. Only one complete specimen question has been eliminated from poli- of this extraordinary animal was ever previously secured-in 1873. The one which I have now to describe is a much larger and finer specimen, being forty feet from the extremity of the long arms to the point of the tail. On the 22d instant a heavy equinoctial gale swept these shores, and this wanderer of the deep was driven ashore in an exhausted condition at Catalina, on the northern shore of Trinity Bay. When stranded it was still alive, but died soon after the ebb of the tide, which left it high and dry on the beach. Two fishermen took possession of the "treasure trove," and the whole settlement gathered to gaze in astonishment at the monster. Formerly this "big squid," as the fishermen call it, would have been converted into manure by the fishermen, or cut up for food for dogs; but now, thanks to the diffusion of intelligence, there were some in Catalina who knew the importance of preserving such a rarity, and who advised the fishermen to take it at once to St. John's. The two men loaded their little craft with the body of the Marshal Douglas, as the son of his father, gigantic cuttle, and arrived with it here simply, has been able to stay the hand of on the 26th in a perfectly fresh condition. As soon as the news spread an eager desire to view the monster was awakened and the fishermen were advised to exhib-New York and in Louisiana and South it it before the public. The Government granted the use of the drill-shed for the purpose, and on the floor, supported by boards, the creature was laid out in all ermen reaped a golden harvest and found fish is the most wonderful of all the denithe big squid by far the best catch they zens of the great deep. had ever made. The scene was very curout of them by this unabated nuisance, I ions. There lay the cuttle with its ten ask you to help the President to help us. arms stretched out, two of them 30 feet in length, having rows of powerful suckers that body in the existing state of things extremities. The other arms, eight in number, were entirely covered with the suckers on the under side and were 11 feet in length. The body is 10 feet in vice Reform, in this State, where a hunts- length and nearly 7 feet in circumference. man of that sort is just now much needed; and terminates in a caudal fin 2 feet ! the people of both parties, except such as inches across. When taken from the wa ter the color of the sauid was a dusty red. you will have placed us all under addi- but that has disappeared, and the body and arms are perfectly white. There i the usual horny beak, the parrot-like mandibles of which project from a membraneous bag in the centre of the mass which constitutes the head, and from which ten arms radiate. Certainly the

cape when once they had closed, and then torn and rent by the formidable beak, is enough to senda shuddering thrill through the stoutest heart. Looking at this creature, one can understand that the wild tales told of Krakens and other great cuttles in the Indian seas, though greatly exaggerated, had a very substantial foundation in fact. Posterior to the head were a pair of huge staring eyes, the sockets being eight inches in diameter. Their exbeen peculiarly ferocious. The Governor, Sir John Glover, visited it, and declared that in all his lengthened experience in Africa, he had seen nothing half so wonderful. It is very perishable, and in a short time decomposition sets in and it can only be preserved in the strongest alcohol. Our showmen could only continge the exhibition two days and a half. I managed to secure it at the close, and had packed it for transmission to Professors Baird and Verril, who were fortunately in Halifax, being in hopes ice-of which I used half a ton in packing itwould preserve it till it reached Halifax,

The party arrived at Frederick at 11 tremity of the tail 40 feet. The long ten-

Democratic members elect to the 45th and are 8 inches in circumference. The central mass are 17 inches in circumference, but at their extremities taper down suckers along one side. I tried to count these suckers on one arm, which is 11 feet in length, and made out 250, large contain 2,000 suckers; the long arms perhaps 250 more. The head or central mass, from which the arms radiate, is 41 feet in circumference. Unfortunately the delicate eyes had been destroyed on the yoyage or in putting it on board, but the socket of

one measured 8 inches in diameter. The appearance of the animal when in the water is described by the fishermen as extraordinary. The tail had got fast on a rock as it was swimming backward, and PITTSBURG, PA., Oct. 11.—The grand it was rendered powerless. In its desthrough the water is remarkable. Be- advisers our heartiest sympathy.

hind the head on one side a tube or fupnel This is its usual mode of locomotion, and much loved daughter .- Concord Sun. nothing can surpass the case and elegance of such movements. The body is just wards. The backward motion, however, tions. is that which is most graceful and natural in the giant squid. When moving through Rowan County -the water its arms are folded together. When grasping its prey it shoots out one of the long, lithe tentacles, which are endowed with a high degree of muscularity, and as quickly as a cat could clap her paw on a mouse the extremity of the arm covered with suckers seizes the object by the suckers, the pistons of which are quickly retracted and the sharp, denticulated edges are pressed with enormous force on the surface of the victim. Then the arms twine round and grasp it, and from that corpse-like embrace there is no escape. Altogether the gigantic cuttle-

STANLEY, THE TRAVELLER. There is no doubt that Henry M. Stanley's explorations in Africa entitle his name to be enrolled with the other famous men whose names are identified with that terra incognita-Africa. Henceforth an American may with conscious pride mention the name of Stanley with Livingstone, from Speke, Grant, Barton and Cameron, and PHOTOGRAPHS, other men of mark who have added to the world's knowledge, and by hazardous and long continued adventure have won for themselves the name of heroes.

The following extract from an editorial in the N. Y. Heral I is not without interest: "To judge of the cool deliberation with which Stanley embarked in this his last idea of being clutched in those terrible and greatest enterprise, we need but read arms, from which there could be no essiblis letter dated at Nyangwe, of which we print this morning a copy of the duplicate preserved by him, the original having seen sent to the East Coast. He fully appreciated the danger of the journey down the Lualaba, but wholly undaunted by it he remarks. "It must be a very strong tribe indeed that can turn us back now." By this simple sentence he indicates his determination to proceed, no matter who or what barred the way. Just before he had penned this expression of heroic resolve he had lost many men by desertion and sickness. His hitherto most faithful follower, Kalulu, had left pression, when the creature was alive on him, although he afterward returned to care himself cherply privately and radically. the beach, is said by the fishermen to have his duty. He was short of supplies and six months' journey from Zanzibar and assistance. Yet, with the true adventurous dash that half wins the battle, he

plunges into the unknown and eme g sa "Stanley's first letter from the west coast of Africa is that of a man who has been just relieved from a great mental and physical strain. He claims the forbearance of those who so anxiously awaits his story until his strength and nervour tone return. He deems himself untit to deal with the grave matter of his journey and discoveries until with recruited health the absolute newness of his existence among civilized people wears off and he begins to feel again equal to the task of writing. To a man in this condition, and after accomplishing his work, this allowance will be generously made.
