WHY.

Owing to the continued indisposition of the editor, the entire responsibility of this issue of the Watchman has been shoul dered by a trio of modest compositors. The duties of an editor, when all his time as at the disposal of his quill and scissors are very onerdus, trying and perplexing. Notwithstanding the admitted fact that he knows everything, there are yet times, on dit, when a thousand ifs and side eirculistances have to be collated, put together, weighed and made to conform to renders.

Besides the preparation of editorial matpatience, but of which the public know temperand stude benignantly at the devil's while in the midst of a herculean effort to subject enlarges: did time, ample experieuce, and liesure belong to us, we might which the care-burdened editor labors. WASHINGTON, June 30 .- The President has approved the bill making appropriations for the judicial expenses, but vetoed Davidson County-In Superior Court. the bill making appropriations to pay the fees of United States marshals and their general deputies. The President says the bill contains restrictions similar to those in that heretofore vetoed, and concludes his message as follows: "In order to secure its enactment the same measure is again presented for my approval, coupled in the bill before me with appropriations for the support of marshals and their deputies during the next year. The object manifestly is to place before the executive this alternative; either to al-New York correspondence of the Raleigh low the necessary functions of the public service to be crippled or suspended for want of the appropriations require to keep them in operation, or to approve legislation, which, in an official communication to Congress, he has declared would be in violation of his constitutional duty. A SPECIALITY. REPAIRING PROMPTLY & CAREFULLY DONE Talbot's Patent Spark Arrester,

The Invention of the Age. Talbot's new patent Spark-Arrester is really the of ly perfect and re table one, and is supersiding all others in use. The great efficiency of this Arrest is attracting universal attention, and is being the dorsed by the best mechanical engineers and influences are in the contract of the contract are in the contract of the contract are in the c

rance companies. Its prominent features are: It does not interfere with cleaning the tubet. It will not choke up, and requires no cleaning.
It requires no direct dampers to be opened when
raising steam (dampers being objectionable, as the raising steam (dampers being objectionable, as may be left open and allow sparks to escape.)

It requires no water to extingu sh sparks, which by condensation, destroys the draft. Besides, when water is used, if neglected, the efficiency is destroyed by evaporation of the water, and the boiler is kept in a filthy condition.

It is simple and durable and can be relied upon. It can be attached to any boiler.

No planter should be without one of them. Instrument of them instruments will insure gins and barn where the range companies will insure gins and barn where the Talbot Engines and Spark-Arresters are used at the
