

Carolina Watchman.

THURSDAY, APRIL 15 1880.

Losses by the late frosts are reported heavy in Virginia.

Mr. G. R. Jones, of the Charlotte Observer, declines to be a candidate for Mayor.

A union between the Kellyites and regular democracy of New York is said to be doubtful.

Cincinnati is sending out through the large cities of the South an excursion party of merchants. Grand preparations making for them at Augusta.

They have a spiritualistic exhibition at the opera house in Charlotte. It does not seem to amount to much. Spiritualism has never flourished in this latitude.

The Virginia republicans are in favor of Grant above every other man spoken of for the Presidency, and will go for him in the nonaffiliated Convention.

WALKING MATCH.—A negro man in New York, named Hart, has just completed a six day's walk, summing up 566 miles—the best walking on record.

Capt. Wm. Ellerbrock and his faithful dog were caught in a burning building at Wilmington, on the night of the 10th, and perished in the flames. Their charred remains were found near each other.

And now it is announced with all due formalities that Mr. Tilden will not be a candidate before the Cincinnati Convention. That he had written a letter two months ago to this purpose, but out of respect to personal friends, had not published it. It is soon to appear.

The Charlotte correspondent of the Raleigh News, writes that paper of a visit made to the Bellows Factory, and says it is in full work, and the demand for their goods so pressing it will compel the proprietors to increase their facilities.

The Springfield (Ill.) election the Republicans elected their candidate for mayor, and the Democrats the treasurer police magistrate and four of six aldermen. The new council stands 10 Democrats, 8 Republicans.

The literary societies of the University of Indiana, at Bloomington, have decided they will invite Jefferson Davis to deliver the annual address before them. Mr. Davis will draw a crowd and not disappoint any reasonable expectations.

Dr. J. T. G. Mittag, well known here by some of the older inhabitants, now a resident of South Carolina, claims to have discovered the principle of the Telephone, as he called it, in an article written by him in December, 1877. He thinks an instrument may be made to convey the expressions of the human mind as it is now conveyed by the eye.

Immigrants from England and Germany are coming this year in increased numbers. At Baltimore there have been 2,300 this year, against 236 the corresponding period of last year. The class now coming in is said also to be better than usual, most of them bringing money enough to buy farms and stock them. They waste no time in the cities but move at once to the West.

The Supreme Court has rendered the following decision, as we learn from Hale's Weekly, April 13.

The Act of March 13th, 1879, repealing the charter of the Western Division of the Western North Carolina Railroad is not in violation of the constitution. The President of that Company must turn over its assets to the Western North Carolina Railroad Company in accordance with said act.

THE MEANESE MAN.—A Druggist at Portland, Maine, was aroused in the night by a man who wanted to buy some brandy. The Druggist refused to sell it, fearing prosecution under the Prohibition Law. The man declared that the liquor was for his wife, who had been taken violently ill, and might die unless she got it; so he was given a small quantity. He was really a temperance spy, and on the following day he had the druggist arrested.

RAPE BILL IN CONGRESS.—No city in the country has been so thoroughly disgraced by the frequency of the brutal crime of rape as the city of Washington. Congress, which exercises a special care over the city, has at last thought proper to interfere and pass more stringent laws for the protection of the "innocent" people. They have also before them a bill to punish blacksmiths. Both ought to be sharp and fearful.

GENESIS NOTES.—The Raleigh Observer says Mr. Cartwell has completed the subdivision of his district and has 313 such subdivisions, and has made his election of enumerators for each. The chosen men will have to make a new application, in which they are required to give a "biographical sketch of themselves." Place of birth, present and former residences, post office address, with the principal facts of education and professional or business experience, including statement of all national, State, County or municipal offices held, and the place and nature of present occupation. It must all be in their own handwriting and so certified by themselves.

CENTENARY OF THE BATTLE OF GUILFORD.

It has already been announced in this paper that we were to have a grand centennial celebration of the Battle of Guilford Court House, on the 15th March, 1881. There was a large meeting of citizens, comprising a number of visitors from a distance, held at Greensboro, last week, to make a permanent organization for the purpose of promoting the centennial celebration. The meeting was addressed by Col. Jas. T. Morehead, Hon. Thos. S. Kennan, and others. Encouraging letters were read from many distinguished gentlemen in and out of the State, among them one from Gov. Jarvis, President Hayes, Wm. M. Evans, Hon. W. A. Allen, Hon. S. J. Randall, T. A. Hendricks, Gen. Hancock, Senator Edmunds, Dan'l G. Fowle, Bob Vance, Walter Steele, and others. The committee on permanent organization, reported the Governor of North Carolina for President; Hon. R. P. Dick, Vice President; for Secretary, R. G. Fulgam; for Treasurer, Neil Ellington; and for Central Ex. Committee, Jas. T. Morehead, chairman, &c.

A CABARRUS MOTOR.—Mr. C. H. DeJarnette, of Cabarrus, is in the city with a drawing of his proposed self-sustaining motor. He wishes to submit the design to a select committee of citizens acquainted with the laws of motion, and if it meets with their approval he will attempt to get up a joint stock company for its introduction. The plan of Mr. DeJarnette is very ingenious. A spiral tube is wrapped around an incline cylinder. Balls are automatically placed in the tubes and by the arrangement of the spiral around the cylinder they roll down a continuously inclined plane until they reach the lower end of the spiral, when they are again automatically taken up and inserted above. Mr. DeJarnette has the good sense not to claim perpetual motion for his invention, but simply claims that it is economical and powerful.—Charlotte Observer.

[He ought to have exhibited a working model before talking of a joint stock company.]

Col. L. S. Fremont says the shortest route from Hickory to Wilmington is by way of Lincolnton. Thus, from Hickory to Charlotte via Statesville is 82 miles. From Hickory to Charlotte, via Lincolnton, is only 52 miles, showing a difference of 30 miles, and making the distance from Wilmington to Knoxville 447 miles, against 543 as the distance from Knoxville to Beaufort, N. C. He vouches for the correctness of these figures. But it is still an open question whether Beaufort or Wilmington is the most desirable outlet to the sea and the markets of the world.

ASHVILLE AND SALISBURY.—A handsome passenger car has lately been added to the rolling stock of the Western North Carolina Railroad. It was built at the shops of the company in Salisbury and has been in course of erection for some time. It is described as being very handsomely finished and has "Salisbury and Ashville" painted in bright letters upon it. It, however, does not run over the mountains at present, but is turned back at the meeting point of the two trains.—Charlotte Observer.

This car is indeed a splendid job, and reflects much credit on Mr. Gates, under whose direction was built. It is complete and beautiful in every detail.

Iowa, which is the banner Republican State, shows the worst official corruption of any State in the Union. Of ninety-nine county treasurers, no less than forty-four are defaulters. The Governor's private secretary has made off with \$70,000 of the people's money; the State treasurer has appropriated \$50,000 belonging to the agricultural college, and the assistant State treasurer has also secured several thousand dollars of public money. Such is the picture of the banner Republican State drawn by the Chicago Times.

Frightful, if true. We hope our Villisca (Iowa) exchange can relieve this dark picture to some extent. Have all the rascally carpet baggers who plundered the South found refuge in Iowa?

FATAL SHOOTING.—In Edgefield, S. C. on the 13th, a disturbance occurred at the polls between Dr. Wallace Bland and a merchant named Clisby. They disputed about a vote. Bland struck Clisby over the head with his pistol, and Clisby shot him through the bowels and killed him. Julian Bland, a younger brother, then shot Clisby, mortally wounding him in the region of the kidneys, and then fired upon A. A. Glover, father-in-law of Clisby, wounding him in the thigh. The Columbia Register thinks Glover may recover.

The Western N. C. Railroad.

The deeds, conveyances and all other papers in the sale of the road have been drawn by Attorney General Kenan for the State, and Hon. Montford McGehee for Mr. Best and his associates. After the papers had been prepared they were carefully reviewed by Messrs. George Davis and Thomas Ruffin, and then rewritten, embodying their suggestions. Messrs. Davis and Ruffin refused to accept a penny for their services. After all the changes had been made the papers were sent to New York. Mr. Best and his associates in the purchase, Messrs. Fish, Tappan and Grace, will leave New York to day, and go direct to Asheville and other points on the western road. After remaining there a day or two they will come to Raleigh, arriving here the latter part of the present week. The papers will then be signed, and the property formerly made over.—Ral. Ob.

A BIRD'S EYE VIEW.

What a Woman Saw in Congress, and What she Thinks of it.

To go into the House of Representatives is to the uninitiated very much like being let into a menagerie, for the atmosphere is very hot and close, and the ventilation is very defective—an odor of cigar smoke adds its burden to a sensitive organization—and there is an immense amount of howling on the floor. This is my impression of it all, although I've listened very intently and tried to become informed in the ways of the government of my country. The speaker spends most of his time in pounding violently with his gavel, and nobody seems to care whether he pounds or not—he apparently does it for his own amusement. Then with a very few exceptions everybody that speaks acts exactly as if he intended to annihilate everybody else. I never can understand what they say, except by snatches, and what I do hear seems to be of very little importance. It does seem so ridiculous for a man to get up and work himself into a tremendous passion, swinging his arms, pound on his desk, walk up and down the aisle, grow red in the face, and swell up the veins of his forehead, and end with a grand peroration about "blowing the bugle till it resounds again"—all of which I heard and saw the other day—while all the other members are reading newspapers, smoking outside the rail, writing at their desks, chatting with each other and continually passing in and out, while nobody seems to pay any attention to all this exhibition of feeling. They seem to take especial delight in contradicting each other flatly, insisting that somebody is out of time or order, and on the whole I've come to the conclusion that things couldn't be much worse any way—even if woman had a place in that august (7) body.

The Senate is better, that is, they don't rant so violently, but seem slow and stupid. I've found myself wondering several times what it all amounted to after all. I have been able, after giving the closest possible attention for some time, to make out that they've been agitating the question of a mud road somewhere in Indiana, and I have heard something about the Indians, that's all. As our Senator Dawes doesn't seem to have a boom even in the far horizon, let's hope that the Edmunds boom may amount to something, and just for this reason, that Mr. Edmunds appears to know everything that is going on, and to listen attentively to whatever is being said, as if he really had a conscience concerning State affairs. I think Mr. Hoar is the handsomest man in the Senate—Gen. Burnside may be perhaps excepted—he certainly has more of a society air, and is an elegant and distinguished looking man. Ferry is considered handsome, but the fact that the rich bachelor of the Senate and has, moreover, the aroma of a dead and gone and half-mysterious love affair hanging about him, may have something to do with that notion, for to the casual eye he is certainly not a beauty, although well-looking enough; but his beard is very western and needs pruning. Plumb, of Kansas, has a thoroughly good and honest face full of purpose, although his appearance is unpolished. I had entirely forgotten about Senator Bruce until I saw the other day a colored man of dignified appearance walk calmly across the floor of the Senate as if he belonged there. At first I wondered idly if there were colored doorknockers, when he sat down at his desk, and then I remembered. He has undoubtedly good—or bad—white blood in his veins; the shape of his hands alone would indicate that. He is not of the particularly light color, and his hair, although evidently brushed with painstaking care, is very kinky. I am sorry for him and more sorry for his wife, who I understand, is so white that no one would suspect her of colored blood. She is called upon by the wives of the other Senators, but still it is under protest after all—the old race prejudice clings, and will cling.

A negro cadet at the West Point School, has been and continues, to occupy much of the attention of the newspapers. It seems that somebody inflicted upon him injuries which disqualify him for his duties. Some of the papers say he inflicted them himself. Be this as it may an investigation is called for, and it will doubtless be had, whether the game pays for the candle or not.

THOUSANDS OF CHILDREN DIE under the age of five years. Why? Physicians attribute it to various causes, and have a vocabulary of infantile diseases too numerous to mention. Worms! Worms! Shiner's Indian Vermifuge will kill them and restore the child.

REVENUE GAUGERS.

About a dozen professional gaugers have been sent out from the internal revenue department at Washington, and are now engaged in examining the storerooms of the distilleries in the upper part of this collection district. They are sent out only once in every two or three years, and their main business is to examine the storerooms as to their qualifications for the position. The duties of a storeroom keeper are by no means of a nature which anybody can perform and these examinations generally result in a good many changes. It is impossible to say exactly when they will get down into Mecklenburg and adjoining counties.—Char. Observer.

If a ranting, raving, infuriated, cavoring Congressman could but see himself as the people in the gallery see him, he would take a contract to squeeze into a peppercorn, and take the chances of escaping through the orifices in the cover by sections.—Washington Gazette.

FROM THE QUAKER CITY.

E. J. Campbell, of Philadelphia, under date of Oct. 4, 1879, certified to the wonderful efficacy of Warner's Safe Kidney and Liver Cure, in removing a liver disease accompanied by chronic constipation and yellow skin.

PROFESSIONAL

Drs. M. and John Whitehead having formed a Co-partnership, offer their professional services to the public. Office next door to the Post Office. April 15, 1880. 26:tf.

TRUSTEE'S SALE

Valuable Gold Mine Property!

By virtue of a certain Mortgage made to me as Trustee, I will sell on the premises on the 24th day of May next, for cash, all the property of the Rowan Gold and Copper Mining Company of Baltimore, consisting of 108 acres of land, with whatever Machinery there may be thereon, together with all the Minerals, Mining Rights, Privileges, Immunities, Improvements and appurtenances thereto belonging or in any way appertaining—being the property so long and well known as the Rymer Mine.

JOHN A. THOMPSON, Trustee. Rowan Co., April 10, 1880. 25:tf.

SMITH'S WORM OIL!

ATHENS, GA., February 22, 1880. SIR: My child, five years old, had symptoms of worms. I tried calomel and other Worm Medicines, but failed to expel any. Seeing Mr. Bain's certificate, I got a vial of your Worm Oil, and the first dose brought forty worms, and the second dose, so many were passed I did not count them. S. H. ADAMS.

Prepared by Dr. E. S. LYNDON, Athens, Ga. For Sale by Dr. T. F. KLUTZ, Salisbury, N. C., and Druggists general. 26:ly

Seed, cheap at ENNISS'

HOW WATCHES ARE MADE.

It will be apparent to any one, who will examine a SOLID GOLD WATCH, that aside from the necessary thickness for engraving and polishing, a large proportion of the precious metal used, is needed only to stiffen and hold the engraved portions in place, and supply the necessary solidity and strength. The surplus gold is actually needless so far as UTILITY and beauty are concerned. In James Boss' PATENT GOLD WATCH CASES,

this waste of precious metal is overcome, and the same solidity and strength produced at from one-third to one-half of the usual cost of solid cases. This process is of the most simple nature, as follows: A plate of nickel composition metal, especially adapted to the purpose, has two plates of solid gold soldered one on each side. The three are then passed between polished steel rollers, and the result is a strip of heavy plated composition, from which the cases, backs, centres, bezels, &c. are cut and shaped by suitable dies and formers. The gold in these cases is sufficiently thick to admit of all kinds of chasing, engraving and enamelling; the engraved cases have been carried until worn perfectly smooth by time and use without removing the gold.

This is the only Case Made with Two Plates of Solid Gold & Warranted by Special Certificate.

For sale by J. & H. HORAH, and all other Jewelers. 22:ly

Foundry & Machine SHOPS.

MERONEY & BRO. If we were well known establishment in full and regular work again, and respectfully solicit orders. They have in their employ Mr. J. A.
