

A GUIDE TO PLANTING.—As a rule, the size of the seed will indicate the depth to plant it, starting with the smallest at one half inch, such as celery, parsnip, etc., while peas and beans may be put one and a half inches deep.

BAGGING GRAPES.—The Charlotte Observer recommends to the authority of a grape-grower. It is neither new nor difficult. Paper or thin muslin bags covering the bunches answer the purpose of protecting the fruit from birds and bees, and that is about all the benefit derived. Served in this way the fruit may hang on the vines until it ripens perfectly. Without some such protection it is liable to be destroyed before reaching full maturity. Thinning out the leaves so as to admit sun-light while ripening will improve the quality of the fruit.

SEED POTATOES.—The Committee of the International Potato Exhibition declares that the practice of planting a small refused seed has contributed in a most material degree to the deterioration of the potato, not only in Ireland, but throughout Europe. Any seed tuber weighing less than one ounce and a half is unfit for planting, and it is to be preferred that tubers averaging two to four ounces should be selected. Seed that has sprouted but little, or not at all, is to be preferred to that which has made much growth in store.

Every housewife should know that sugar boiled with an acid, if it be but for three minutes, will be converted into glucose, which is the form of sugar found in sweet apples. One pound of sugar has as much sweetening power as two and a half of glucose. In other words, one pound of sugar stirred into the fruit, after it is cooked and while yet warm, will make the fruit as sweet as two and a half pounds added while the fruit is boiling. Save your sugar by a little chemical knowledge.

AN EXCELLENT ARTICLE.—A French journal states that chloride of lime scattered about where rats and mice frequent will cause them to desert the spot. A solution of it brushed over plants will effectually protect them from insects. If scattered over ground infested with grubs it will free it from them entirely. Bunches of cotton or tow smeared with a mixture of chloride of lime and hog's lard and tied about in different parts of a tree, will guard it against the attacks of insects, slugs, gnats, etc., and drive away those already in possession.

CARELESS WIVES.—It is very common to hear the remark made of a young man that he is so industrious and so economical that he is sure to be thrifty and prosperous. And this may be very true of him so long as he remains single. But what will his habitual prudence avail him against the careless waste and extravagance of an uncalculating, unthinking wife? He might as well be doomed to spend his strength and life in attempts to catch water in a sieve. The effort would hardly be less certainly in vain. Habits of economy, the way to turn everything in the household affairs to the best account—these are among the things which every mother should teach her daughters. Without such instruction, those who are poor will never become rich, while those who are now rich may become poor.—Selected.

The Awful Dress Coat.
The conventional dress coat has been called the "swallow-tail," the "steel-pen," the "claw-hammer," the "two-tined," and other picturesque and somewhat opprobrious names. It has been a fashionable but never a much-loved garment, and there is a certain popularity about the man who, despite the demands of society, boasts that he never owned one. The great majority of men who possess a dress coat, not being very wealthy and not being able to purchase one every year, are unhappy. It cannot be laid aside like a wedding dress and looked at in solitary moments on rainy days, because if it is packed away it comes from the press with an unused appearance, indicating that the wearer has not been invited out much. Many men, especially if they have a dress coat, grow stouter or thinner every year, so that the dress coat, being a very sensitive thing, not amenable to

tucks or wise repairs, resents the insult by making the wearer appear ridiculous; and perhaps a man is never so absurd as when he gaspingly and sheepishly says to a crowd of thinner persons, "does anybody want to buy a dress coat?"

COMMUNICATED.
For the Legislature.

Mr. Burton: Your humble correspondent and no less until the appearance of your last issue that the market was so overstocked with Legislative candidates. But he has been more surprised at the quality (or lack of quality) of the material proposed, than at the quantity. Men scarcely acquainted with the people have been suggested, others having not the slightest qualification to serve the people in this capacity have been routinely recommended on the ground of their youth.

From my life long acquaintance with the people of Rowan, I believe that they want to vote for men whom they know with whom they have mingled—who have a history, and a character established and known.

They want men of ability, and care not much whether they come from towns or country. They want men of good business qualifications, whose general knowledge of public affairs and men's good, and whose attainments in some calling are respectable. All this in addition to sound moral principles. They want men of experience—men who have been in the world long enough to learn things that came only with years—who have seen its ups and downs—who can sympathize in a practical way with the wants and necessities of all classes. I don't believe that the staid, conservative people of the county feel it their duty to set young men on their legs by giving them practice as Legislators, to the exclusion of maturer and better qualified men.

Select well known, well qualified experienced men—zealous, timetried Democrats.
Respectfully submitted by just
ONZ VOTER.

Liverpool July, 10th, 1880.

BRO. BRUNER: It may interest you to know something of the great International Sabbath School Centenary Convention, held in London where delegates met from every quarter of the globe. The first conference I had the privilege of attending was held in the Memorial Hall, Old Bailey, London. The subject under consideration was "Position and prospects of Sunday Schools on the Continent of Europe." In the forenoon, delegates from France, Italy, Sweden, Germany, and Austria, gave account of the work in their respective countries. In the afternoon delegates from Switzerland, Holland, Denmark and Belgium gave account of the work with them. All which showed that a great door was opened in those countries through the Sabbath schools for the advancement of Christ's Kingdom amongst these nations. At night there were four large meetings held in different quarters of London. I attended one held at Marylebone, Presbyterian Church, where we had excellent addresses by delegates from Paris, Amsterdam, Ontario, Chicago, London and Belfast.

Wednesday, June 30th, was a great day at the Crystal Palace. By 10 a. m. over 40,000 Sabbath school scholars and teachers were assembled in the Palace and grounds. At 10 1/2 a. m. various athletic and other sports were started for the young of both sex, and premiums were given to those that excelled. At 11 a. m. short addresses, specimen lessons, black board lessons, &c. were given, interspersed with singing. At 12 a. m. the Chrystal Palace instrumental bands dispensed sweet music to the assembled multitudes.

At 1 p. m. a grand Concert was given by some 6,000 voices who had been selected from the London Sunday School Choir, which numbers some 12,000, and taught for three months by over 200 teachers (directed by one leader) for this occasion. These voices were accompanied by the grand Handel Organ and a large instrumental band. It was a grand sight to the eye and sublime to the ear, and when 30,000 of the audience united their voices with them it was truly sublime. At 4 p. m. entertainment was given by the Royal Polard Street Handbell Ringers, and the great Handbell Handbell Ringers, also at different times performances by the Chrystal Palace Band on the Handel. Orchestra and by the Band of the Scotch Guards.

At 5 p. m. the water was let on the whole system of fountains in the park, some of which threw the water up 250 feet in the air. It was a grand display.

At 7 1/2 p. m. a grand Mass Concert was given in the grounds of over 80,000 voices supported by military bands. 64 p. m. the exercises of the day were closed by a balloon ascension. And at 9 p. m. there was a grand Organ recital which I did not remain to hear.

at exercises for half hour, then regular Conference opened at 10 a. m. The subject for consideration being, 1st. The qualifications of teachers; 2d. Their Education for the work; 3d. Methods of teaching. Chairman C. Taylor, Esq., F. G. S., advised after a few persons remained, was followed by Rev. Clifford M. A. reading a paper, which he called upon Mr. Gough of the Normal School, who has taught hundreds of Sabbath school teachers in England, to read the debate which he did with much credit to himself. A paper was then read on the 2d branch of the subject by Miss Murray of N. York, who was followed by Mr. Kendall of England, who read a paper on the same subject followed by an address by a member from Canada. The Chairman then introduced Miss Farnington, a lady, he said, whose name was respected and known all over the world. She was followed by Miss H. N. Morris of Brooklyn, who addressed us on the method of teaching. All three of the ladies who addressed us sustained themselves well. We then had an address by a delegate from Chicago, Rev. W. P. Crafts.

Friday July 24, Afternoon Conference at the Memorial Hall, J. J. Harmon of New York, Chairman, opened the meeting by an excellent address. Dr. Vincent of New York, then discussed modern Sabbath schools, and was followed by Rev. A. F. Schaeffer of New York. The next subject discussed was, "The Young Men of the Sabbath School, how they might be brought in." We were addressed on that subject by Mr. Clark, Esq., and Rev. B. W. Childlaw of Ohio, followed with a paper on the same subject. Mr. J. R. Curtis of the Ragged School Union, next spoke, he was followed by Mr. Councilor White of Birmingham, reading a paper on "How to promote the establishment of adult Sabbath schools and the benefit arising therefrom." He was followed by Mr. Quaker and has an adult school of over 3,000 and it has been the means of other schools being opened at which there are over 6,000 adults attending them. Mr. Wanmaker of Philadelphia, was then called upon and gave a very interesting address.

Saturday morning. A meeting of the American and Australian delegates was held in the library of the Memorial Hall where we had some 10 short but pointed addresses, one of which interested me very much. It was a delegate from Persia, who could not speak English and his wife read in English a paper which he had prepared 50 years ago. When the first Missionaries went to Persia, there was not a female found that could read the alphabet, and they took the first step in taking in three girls to be taught, and one of these was the woman that was reading to us now in Persia 89 Sabbath schools with over 3,000 pupils, and many of both sex are able to read.

But I must stop for the present, as I fear you may be tired with such dry out lines of our proceedings or rather what we had under consideration. Would that you and many others of the Christian people about Salisbury could have been at the feast.
Yours truly,
Wm. Murdoch.

A NOVEL PROCESS.—A London gardener planted a strawberry bed four feet wide across his garden, on one side of which potatoes were planted. These were dug up about the end of June, the ground leveled and raked smooth, so that the runners established themselves and formed a new bed. The next season a similar process was pursued, and thus a movable strawberry bed was created. At the end of three years the original plants were exhausted and dug up though the bed annually grows wider, without renewal or transplanting.

We supposed so fertile and active a brain as Rev. Dr. Deem's would hardly be content to remain quiet after his extended sight-seeing in the East. The following from the Greensboro Central Protestant tells us what we may expect: "The time of Dr. Deem's in the Holy Land on his late visit, is said to have been mainly devoted to obtaining material for the 'Life of Moses,' on which he has been sometime engaged."

THE CANADIAN PONY ON THE TRACK.—The Republican Convention for this Congressional District met at Smithville yesterday, Gen. J. C. Abbott, formerly Collector of this Port, and an ex-Secretary of the United States, presided, and W. K. Price, colored, of this city, acted as secretary.

W. P. Canady, Esq., of this city, was nominated "by acclamation," so the report has it, but some of the unferrified were heard to declare, after their return to Wilmington yesterday evening, that the "ring" gave "the people" no showing at all.

When the Passport left Smithville the Convention was considering the question of a Presidential elector for this district, and it seemed to be the settled opinion of ex-Judge Watts, otherwise known as "Greasy Sam" Watts would get the nomination.

P. S.—"Greasy Sam Watts" has received the nomination for elector for this district.—Wil. Star.

When Mr. Tilden Appeared.
The Great Scene at the New York Democratic Rally—How He Took It.

The great event of the evening was the coming of ex-Gov. Samuel J. Tilden. His appearance was looked forward to with the most intense interest. Women holding children by the hand and babies in their arms hung round the entrances with no other object than to catch a glimpse of the man of whom they have heard so much. The whole body of men forgot Hancock and English for the moment and centered their attention on Mr. Tilden. Never did a man meet a more thrilling reception. Every inch of room within the spacious interior of the academy was occupied and a lively feeling of expectancy filled the minds of all present when John McKeon entered on the left of the stage, followed by Mr. Tilden and a string of prominent Democrats. The moment the ex-Governor emerged from the wings the cheering broke forth like a tornado, and by the time he had reached the middle of the stage the great multi-tude on its feet applauding by voice and hands and with hats and handkerchiefs in the most enthusiastic and extravagant manner. Mr. Tilden was in evening dress and looking remarkably well in the face, though his hands betrayed some nervousness and his voice was not entire-

ly in order. He wore a large white tie and had his hair brushed smoothly over his forehead and back behind his ears. He took a chair in the middle of the front row of seats on the stage, between his brother, Henry A. Tilden, and John Mulhally, while the cheering went on with increasing vigor. The ovation evidently made a deep impression on Mr. Tilden's mind, and all the friends who surrounded him were delighted beyond measure at the popular reception of the veteran politician.

When the wild tumultuous outburst of cheering that greeted the old gentleman's appearance was beginning to subside, a sturdy voice from the gallery cried, "Three cheers for President Tilden!" and the cheers were given with a ring that fairly shook the building. "Three cheers more!" exclaimed another voice, and the demonstration was repeated with even greater vigor than before. When John McKeon came forward and said, "I nominate for chairman the legally-elected President of the United States," the excitement reached its climax and a great shout went up. A deep hush fell upon the vast audience when Mr. Tilden came forward to make a few remarks. As he stood in the space between the chairman's table and the footlights every eye was riveted upon him and the expression was plainly one of great sympathy. He spoke with some effort, yet loud enough to be heard and understood all over the house. At intervals of a few moments his voice would seem to be about to fail him, but when a breakdown was apprehended he sharply recovered himself and went on successfully to the end of his speech, which lasted about twelve minutes.—N. Y. Herald.

WARNER'S SAFE BITTERS
It is the best Blood Purifier, and stimulates every function to more beautiful action, and is a benefit in all diseases.
It eliminates the impurities of the blood, the natural and necessary result is the cure of scurvy, itching humors, eruptions and diseases, including Cancer, Ulcers of the Stomach, Constipation, Dyspepsia, Weakness of the Stomach, Consumption, Drunkenness, General Debility, etc., are cured by the Safe Bitters. It is unequalled as an appetizer and regular tonic.
It is a medicine which should be in every family, and which, wherever used, will save the patient of many doctor bills.
Bottles of two sizes; prices, 50 cents and \$1.00.
—Warner's Safe Remedies are sold by Druggists and Dealers in Medicine everywhere.—
H. H. WARNER & CO., Proprietors, Rochester, N. Y. Sent for Pamphlet and Testimonials.

HOW WATCHES ARE MADE.
It will be apparent to any one, who will examine a SOLID GOLD WATCH, that aside from the necessary thickness for engraving and polishing, a large proportion of the precious metal used, is needed only to stiffen and hold the engraved portions in place, and supply the necessary solidity and strength. The surplus gold is actually needless so far as utility and beauty are concerned. In James Boss' PATENT GOLD WATCH CASES, this waste of precious metal is overcome, and the same solidity and strength produced, and at from one-third to one-half of the usual cost of solid cases. This process is of the most simple nature, as follows: A plate of nickel composition metal, especially adapted to the use on each side. The three or four plates result in a strip of heavy plated rollers, and from which the cases, backs, centres, bezels, &c., are cut and shaped by suitable dies and machinery. In these cases is sufficient strength to admit of all kinds of chasing, engraving and enamelling; and these cases have been carried until worn perfectly smooth by time and use without removing the gold. This is the only Case Made with Two Plates of Solid Gold & Warranted by Special Certificate. 23:ly
For sale by J. & H. HORAH, and all other Jewelers.

BEST IN THE WORLD!
ABSOLUTELY AND GENUINELY PURE
CHURCH & CO'S
SODA
Impure Bi-Carb Soda is of a slightly dirty white color. It may appear pure, except by the smell, but a COMPARISON WITH CHURCH & CO'S ARN AND TOWNSEND'S ISLAND will show the difference.
See that your Baking Soda is white and effervesces. It should be ALL SIMILAR SUBSTANCES used for food.
A simple but effective test of the comparative value of different brands of Soda is to dissolve a dessert spoonful of each kind with about a pint of water (not preferred in clear places, stirring until all is thoroughly dissolved. The delicate particles of the inferior Soda will be shown after settling some twenty minutes or so, by the milky appearance of the solution and the quantity of floating sticky matter according to quality.
Be sure and ask for Church & Co's Soda and that their name is on the package and you will get the purest and whitest made. The use of this with sour milk, in preference to Baking Powder, saves twenty times its cost.
See one pound package for valuable information and read carefully.
SHOW THIS TO YOUR GROCER.

H. N. WOODSON, Clk Board of County Commissioners. 37:5w

SALE NOTICES.
Administrators, executors, commissioners, sheriffs, constables, agents, &c., are advised to call on us for printed sale notices. It is certainly great injustice to owners to put up their property at public auction without first giving ample notice of the sale. The requirements of the law on the subject every body knows are insufficient. Property is often sacrificed from this cause when a dollar or two spent in advertising might have saved it and made it bring its value. We furnish sale notices promptly and cheap.
NOTICES FOR POSTING LAND READY PRINTED.
A WOMAN
Who has once used the PEOPLES' MACHINE will prefer it over all others, and AGENTS selling it find it just what the PEOPLE want. It makes the shuttle lock stitch, runs easily, does the widest range of work, and winds the bobbins without running the works of the machine. Write for descriptive circulars and full particulars.
1301 & 1303 Buttonwood St.,
Philadelphia Sewing Machine Co.,
PHILADELPHIA, PA.
