Prof. J. R. Blake, of Davidson College, returned yesterday from the meeting of the Scientific Association in Boston. He was delighted with his trip and with the meeting. It was pronounced the most satisfactory and interesting the association has ever had since its organization twenty years ago. He was disposed to agree with Dickens and other Englishmen who have visited this country, that Boston people are masters of the art of entertaining; by the way, not an insignificant one. The special features, he told the Observer reporter, were the practical illustrations of the workings of the two new inventions-the photophone, by Bell, the inventor of the Bell Telephone, in use in this city, and the topophone by Prof. Meyer. The former is the conveyance of sound by light and depends upon a quality possessed by several substances-by sienium in a greater degree than any other-of being affected as to the quantity of electricity in them by the intensity of the light to which they are subjected. A ray of light, concentrated by a prism and brought to a focus by a concave reflector, takes the place of the wire in the telephone. The inventor has not yet brought his instrument to perfection, but Prof. Blake distinctly heard-him talk at a distance of one hundred yards. The invention is regarded by scientific men as more wonderful than that of the telephone for the reason that it was never known before that light could be used as a conductor of sound, while it has been known for years that solid substances possessed that quality to a more or less degree. Prof. Meyer's Topophone is to be

used for locating sounds, and is de- a general assortment of house furniture signed for use on the sea in ascertaining the direction whence proceeds fog

Steads, Bureaus, Clothes Presses, Lounges,
Racks. Wardrobes, Book-Cases, Cupboards and
China Presses, Candle Stands, Tin Safes, Desks,
Tables, Washetands, Chairs and They also signals. It is a very simple instrument, though the inventor has not yet perfected it.

The association were wined and Cambridge and others and were generally lionized in scientific Boston.

Howling Infidels.

Call Themselves Free-Thinkers.

Hornellsville, Sept. 4. - Tomorrow evening the most important Free Thought convention ever held in this country will close a five days' session. The average attendance has been about 1,000, and nearly every Northern State has been represented, and there are representatives here from Virginia and also from Canada. The Orthodox have been compelled to admit that there is a great amount of talent represented here. A stranger appeared here on Thursday, and and claimed to be a christian evangelist from New York City and desired to obtain a hearing. He was granted one for this morning at 10 o'clock.

At that hour the opera house was packed, and for the first time the Christians of Hornellsville attended, but great was the surprise of all to learn that the reverend gentleman was a Catholic evangelist. He gave a very fair and interesting address more severe against the Protestants than the Freethinkers, and some of his sharp thrusts brought down the house. Parker Pillsbury had been selected to answer him, and he dissected Catholicism and Protestantism in his characteristic manner. Said a leading business man, who had never been suspected of infidelity: "There was more food for thought in Pillsbury's lecture than in all the sermons that have been preached in town for the last ten years."

who, a few months since, renounced Christianity, has been one of the leading spirits of the convention.

Mrs. Amelia Colby, of St Louis, is pronounced by all who have heard her to be the ablest female speaker ou the continent.

J. H. Bernham, of Michigan, a recent convert from Methodism, is a man of great ability and force, and this afternoon kept an audience of 1,500 people in constant applause by his cutting satire on the Christian religion, Elisur Wright gave a scholarly dectare last eyening. Sunday Anorning Mr. Cheney and Mrs. Colbywill speak.

Colonel Ingersoll speaks in the afternion and Thaddees B. Wakeman. of New York, Stortle evening.

Cheap Chattel Mortgages, rious other blanks for sale here

Impure Bi-Carb Soda is of a slightly dirty white color. It may appear white, examined by itself, but a COMPARISON WITH CHURCH & CO.'S "ARM AND HAMMER" ERAND WILL Show See that your Baking Soda is whiteand PURE, asshould be ALL SIMILAR SUESTANCES used for A simple but severe test of the companitive value of different branchs of Sods is to dissolve a dessert spoonful of each kind with about a pint of water (hot preferred) in clear glasses, stirring until all is thoroughly dissolved. The deleterious insoluble matter in the inferior sods will be shown after settling some twenty minutes or sooner, by the milky appearance of the solution and the quantity of finating flocky matter according to quality.

Rev. H. M. BROWN, A. M., Principal,

HOW WATCHES ARE MADE

It will be apparent to any one, who will ex-

mine a Solid Gold Watch, that aside from

he necessary thickness for engraving and p.l.

shing, a large proportion of the precious in tal used, is needed only to stiffen and hold the engraved portions in place, and supply the

necessary solidity and strength. The surplu

gold is actually needless so iar as UTILITY and beauty are concerned. In James Boss'

PATENT GOLD WATCH CASES

this waste of precious metal is overcome, and the same solidity and strength produced at from one third to one half of the usual cost

of solid cases. This process is of the most

simple nature, as follows: A plate of nickle

composition metal, especially adapted to the

purpose, has two plates of solid gold solder, ed one on each side. The three are then passed between polished steel rollers, and the result is a strip of heavy plated composition, from which the cases, backs, centres, betels, &c., are cut and shaped by suitable dies and

formers. The gold in these cases is sufficiently thick to admit of all kinds of chasing, en-

graving and enamelling; the engraved cases

by time and use without removing the gold.e

This is the only Cuse Made with Two

Plates of Solid Gold & Warranted

County. Notice is hereby given to all Parties to Suits, Witnesses, Attorneys, and to all whom it may concern, that a Special Term of the Superior Court of Rowan County will be held at the Court House in Salisbury, on Monday, the minth (9th) day of August, 1860, for the trial of civil cases, and continue until the business is disposed of. D. A. DAVIS, Chairman County Commis'rs of Rowan.

H. N. WOODSON, Cl'k Board of Coun

Fee Simple Deeds, Deeds in Trust, Mortgage Deeds, Commissioners' Deeds, Sheriffs Deeds, Chattle Mortgages, Farm Contracts, Marriage and Confirmation Certificates, Distillers' Entries, and various other forms for sale at the WATCHMAN OFFICE.

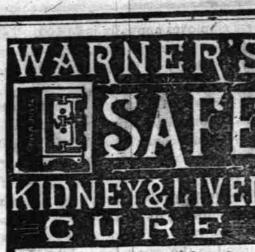

Administrators, executors, commissioners, sheriffs, constables, agents, &c., are advised to call on us for printed sale notices. It is certainly great injustice to owners to put up their property at public auction without first giving ample notice of the sale. The requirements of the law on the subject every body knows are insufficient. Property often sacrificed from this cause when a dollar or two spent in advertising might have saved it and made it bring its value. We furnish sale notices promptly and cheap.

NOTICES FOR POSTING LAND READY PRINTED.!

Who has once used the PEOPLES' MACHINE will prefer it over all others, and AGENTS selling it find it just what the PEOPLE want. It makes the shuttle lock stitch, runs easily, does the widest range of work, and winds the bobbins without running the works of the machine. Write for descriptive circulars and full particulars.
