

A MAD ELEPHANT

Crushes his Keeper and Escapes from the car.

A Wild Scene on the Streets—Captured and Brought Back to the Tents—The Dying Showman.

"Look out there! If that elephant hits any of you all, I'll not be responsible for it," cried John King, the keeper of the elephants in John Robinson's show, just after he had gotten the male elephant out of the car about 8 o'clock last night.

King lingered until about 11 o'clock, when he died. He will be buried this afternoon after the circus performance.

Mr. Lowlow, the well known clown, was seen afterwards. He said that King was somewhat to blame for the viciousness as he never would consent to any violent measures to subdue him.

Several persons have lately inquired how orphans may obtain admission to the Orphan House, at Oxford.

Chicago, Sept. 21.—Mrs. Hazard, at Northfield, Ill., gave birth to five babies on Saturday. They are all alive.

John King for years. He was the keeper of the animals and nobody said he was ever afraid of any of them.

SALE NOTICES.

Administrators, executors, commissioners, sheriffs, constables, agents, &c., are advised to call on us for printed sale notices. It is certainly great injustice to owners to put off their property at public auction without first giving ample notice of the sale. The requirements of the law on the subject every body knows are insufficient. Property is often sacrificed from this cause when a dollar or two spent in advertising might have saved it and made it bring its value. We furnish sale notices promptly and cheap.

HOW WATCHES ARE MADE.

It will be apparent to any one, who will examine a SOLID GOLD WATCH, that aside from the necessary thickness for engraving and polishing, a large proportion of the precious metal is needed only to stiffen and hold the engraved portions in place, and supply the necessary solidity and strength.

PATENT GOLD WATCH CASES. This waste of precious metal is overcome, and the same solidity and strength produced, and from one-third to one-half of the usual cost of solid cases. This process is of the most simple nature, as follows:—A plate of nickel composition metal, especially adapted to the purpose, has two plates of solid gold soldered one on each side. The three are then pressed between polished steel rollers, and the result is a strip of heavy plated composition from which the cases, backs, centres, barrels, &c., are cut and shaped by suitable production machinery. The gold in these cases is sufficient to admit of all kinds of chasing, engraving and enamelling; the engraved cases have been carried out upon perfectly genuine by time and use without removing the gold. This is the only Case Made with Two Plates of Solid Gold & Warranted by Special Certificate.

For sale by J. & H. HORAH, and all other Jewelers.
