How to break the "Solid South ?" Let and justice towards the Southern States, or, in other words, take off outside pressure, and the South would cease to be solid, but would be speedily rent by party strifes and contentions.

Shall Southern War claims be paid? Certainly, if anybody wants to pay them, let them do it. Hancock don't favor payment by the U.S. Government, but he without hope.

near future for Ireland, is appalling. The people are in a furious excitement against meetings of thousands in which revolutionary sentiments are freely indulged. Mean while the government is preparing for an out-break by strengthening fortifications and moving troops. Should the trouble there culminate in war, poor Ireland will in the end only bring upon herself untold miseries. Hopelessly in bondage to England she can never win relief by an appeal to

FURCHES AND RAMSAY AT BOONE.

arms.

A friend who was at Boone when Judge Furches and Dr. Ramsay drew up there in a shabby buggy and with a sorry team on a political pilgrimage among the mountains, says it was the funniest incident of his summer sojourn in the "land of the sky." These gentlemen, the Repulican candidates, were strangers at Boone, and the natives, suspecting that they were bloated revenuers, stood off and would have nothing to say to them. Finally the Doctor introduced himself to a small crowd gathered at Coffee's hotel, where he and the Judge were stopping. Said he; to the crowd, I am Dr. Ramsay, the Republican elector. No one answered him. He squirmed a little and then said-Judge Furches, candidate for Congress, is in the house. Still no one answered him, or showed any signs of joy or sorrow. He squirmed a little more and walked up and down the piazza a time or two, while winks were passing between the crowd. He rallied again and ingiured for one Green, who was a Radical bell weather in Watauga; but Green was not in town. But while this was going on a raw chap came up and greeted the Doctor very familiarly, and was answered, "I believe I don't know you," to the Republican committee in this county," &c.

But we can't repeat the story throughout-how these gentlemen subscribed one dollar each for building a church; how they agreed to divide time with Democratic candidates in the county, and how those mountain boys wiped them out. There were only six white Radicals and a few negroes to hear them at Boone. The Democrats made up a respectable crowd, however, and speeches were made.

We promised in our last to lay before our readers this week, wlatever there might be in the matter reported with such gusto in the last Examiner, of an attempt to buy off the track, D. L. Bringle, in the interest of C. F. Waggoner, the Democratic candidate for Sheriff. We redeem that promise this week as will be seen by the letters of Mr. C. H. McKenzie, and Mr. T. J. Sumner. It will be seen that the conversation between Bringle and McKenzie, is of no public significance whatever, and only concerned them individually. And it is bim to perform.

WE perceive in the tone and temper of the Examiner, the same furious spirit that characterized the "original accessionists" of 1860-61: The same spirit of evil, signifying rule or ruin. It is also plainly seen in the course of Bingham and his engineer, Price. We again offer this first-class Fertilizer to Wheat Growers as being in all respects, worthy of Their patronage It has stood the test for tw bre year's use among us and has been brought to its present admirable condition only by the liberal expenditure of labor and money in a continuous effort to improve. Its standard and uniformity are guaran-

The result of its application to the wheat crop for the past twelve years has proved it to be equal to any fertilizer ever sold in the United States. During this time thousands of tons of it have been used by the farmers of Virginia and North Carolina with highly satisfactory results.

We recommend it because: It is rich in Soluble Phosphate and Ammonia.

It affords a constant supply of plant food. It contains no inert matter. It insures a stand of grass or clover.

It is an improver and renovator of worn out lands. It is fine, dry, and in the best condition for drifting. It contains an ample quantity of all the elements necessary to make wheat, and a large surplus which will show itself upon the clover and grass, and in the improvement of the

It is prepared from the best and most approved materials, in the most careful and thorough manner, and under our personal supervision.

Its standard and uniformity are guaranteed. Whatever may be the merits of other festilizers, no one can go wrong in using one which is so well made, is so fully guaranteed, and has been so long and so thoroughly

APPLICATION

We recommend the application of from 100 to 800 pounds per acre-drilled in with the wheatif practicable. If the drill is not used, the land should be ploughed and harrowed until fine and free from clods, and the wheat and guano harrowed in, following with the roller. This mixes the manure with the soil, and keeps it near the surface just where the roots of the wheat will find it easiest. When sowed on land ploughed but not harrowed, much of the guano goes down in the opening between the furrow slices, ALLISON & ADDISON, Manufacturers and Proprietor of the "Star Brand" Complete Manures,
