The world is like a magic fanters or the shifting scenes of a panarama. Ten years convert the population of schools into men and women, the young into fathers and matrons, make and mar fortunes, and bury the last generation but one.

Twenty years convert infants into lovers, fathers and mothers, decide men's fortunes and distinctions, convert active men and women into crawling drivelers, and bury all prepeding generations.

Thirty years raise an active generation from nonentity, change fascinating beauties into bearable old women, convert lovers into grandfathers, and bury the active generation, or reduce them to decreptitude and imbecility.

Forty years, alas! change the face of all society. After Many Days.

An English Christian writes of a remarkable circumstance that lately came under his observation. Coming from a religious meeting sometime age, one of our nobility stepped into a private circle of friends, one of whom said to him :

Your lordship promised you would tell us about your son who died in Africa.'

His lordship narrated the following incident :

Our boy was the darling of hi mother, and his father's favorite child. We could not but love him. But he left us, and went to South Africa. When he left us he was unconverted, and this was our chief sorrow. He had not been long in Africa when we received a letter to the following effect :

'MY DEAR FATHER: You will be sorry to hear that I have met an accident. I am unable to write much. The doctor hopes that in a day or

An Alderman's Great Sorrow.

There is an alderman in Detroit who knows a bale of hay when he sees it as well as any man living. He was passing up Michigan avenue the other day, when he came across a small group of friends. They had perhaps been waiting for him, knowing that he would pass that way about that hour. They were standing near a bale of hay marked '210 pounds,' and beside the bale stood a flat-chested, slim-waisted, consumptive-looking youth of 20 summers, who kept spitting on his hands and saying he would shoulder the bale or die in the attempt.

'I've bet ten dollars that he can't, remarked one of the group to the alderman, as he came to a halt.

Mr. Beecher Reproves his Congregation---His Sermon.

Among the attendants at the Sunday morning services in Plymouth church was General Grant, who, in company with Senor Romero, sat in H. B. Claffin's pew. General Grant entered the church about ten minutes before the service began. Avaluable Discovery and New Departure in Medical Science, an entirely New and positively effective Remedy for the speedy and permanent Gure of Seminal Emissions and Impotency by the only true way, viz; Direct Application to the principal Seat of the Disease, acting by Absorption, and exerting its specific influence on the Seminal Vesicles, Ejaculatory Ducts, Prostate Gland, and Urethra. The use of the Remedy is attended with no pain or inconvenience, and does not interfere with the ordinary pursuits of life; it is quickly dissolved and soon absorbed, producing an immediate soothing and restorative effect upon the sexual and nervous organizations wrecked from self-abuse and excesses, stopping the drain from the system, restoring the mind to health and sound memory, removing the Dinness of Sight, Nervous Debility, Confusion of Ideas, Aversion to Socioty, etc., etc., and the appearance of premature old age usually accompanying this trouble, and restoring perfect Sexual Vigor, where it has been dormant for years. This mode of treat ment has stood the test in very severe cases, and is now a pronounced success. Drugs are too much prescribed in these troubles, and, as many can bear witness to, with but little if any permanent good. There is no Nonsense about this Preparation. Practical observation enables us to positively guarantee that it will give satisfaction. During the eight years that it has been in general use, we have thousands of testimonials as to its value, and it is now conceded by the Medical Profession to be the most rational means yet discovered of reaching and curing this very prevalent trouble, that is well known to be the cause of untold mivery to so many, and upon whom quacks prey with their aseless nostrums and big feez.
