

Carolina Watchman.

THURSDAY, MARCH 17, 1881.

At High Point, on last Sunday morning, four of the principal business houses were destroyed by fire. It is supposed that an incendiary did the work.

"Character and merit are still worth something in this world."—Exchange. Yes, a little; but money never fails "to make the mare go;" therefore, get money—honestly, if you can; but failing, be content to hobble through life in an humble sphere, for you can never get out of it by changing a character and merit.

The construction has been commenced at Nashville, Tenn., of a flouring mill, to be six stories in height and 120 feet in length, with a capacity for turning out 400 barrels of flour every 24 hours. The parties at the head of the enterprise have purchased machinery of sufficient motive power to double this capacity, should it be found desirable.

A dispatch from Washington states that a bulletin issued by the Census Bureau, giving the proportion of foreign and native born persons in the different States and Territories, shows that in no State or Territory does the foreign element equal the native, although in many it bears a large proportion to it. With three exceptions, namely: Florida, Louisiana and Texas, the Southern States are practically without any foreign element.

The correspondent of the New York Times telegraphs from Raleigh that in the event a bill is passed submitting the question of prohibition to the people, the liquor men intend to perfect a thorough organization and raise a large sum of money to defeat the bill. Ah, Logan, and is it so? He further says: "The election will probably be ordered for August next. No general election occurs this year, and the Democrats hope to avoid making the question a party issue by taking the sense of the people at that time. The pressure of the religious denominations, as well as thousands of men and women, is so great for the passage of a prohibitory law, that, but for the fear of wrecking the party, which is always uppermost in the mind of the average Democrat, an absolute prohibitory bill would have been passed before now."

The New York Sun says the Davidson county mines in North Carolina have yielded half of all the gold ever found in the Mississippi River, and the iron deposits are regarded as inexhaustible. In asking for the emigration of skilled laborers, the State points to 60 cotton and woolen mills, 200 tobacco factories, 20 iron foundries, 19 furnaces, and the foundations of more mills to be built this summer. North Carolina is only fourteen hours' ride from New York city, and it is claimed that the cost of a journey from here to the west will buy a good farm down there.

There is probably some mistake as to the county referred to in the above. There is no gold mine in Davidson county which will compare with Gold Hill in Rowan, the silver and lead mines of Davidson are unquestionably valuable properties, and she has some valuable gold mines also. We have no information of the inexhaustible iron deposits of Davidson, though it is quite probable she possesses much wealth in these. It is not unimportant that we first hear of valuable mines in this section through New York sources.

THE CZAR'S ASSASSINATION.—There have been several attempts to assassinate the Czar of Russia, the sixth and last, March 14, proving successful. The telegraphic account is very brief, touching only a few particulars, as follows:

LONDON, March 14.—The Times has the following from St. Petersburg: "The Doctors' Bulletin published at 3 o'clock in the afternoon stated that both legs were broken below the knees, the lower part of the body severely injured and the left eye torn from its socket. The Grand Duke Michael is not hurt. The assassins were disguised as peasants. One report states that one of them was so roughly handled that he has since died. All of the army officers have been ordered to remain in their barracks. The Council of the empire under the presidency of the Czarowitz was still sitting at 9 o'clock to-night. A manifesto will be published to-day.

An imperial manifesto was published the same day announcing the succession of Alexander third, as Emperor and Autocrat of all the Russias, Czar of Poland, Grand Duke of Finland, &c. He ascends the throne as an inheritance from his forefathers, "assuming the heavy burden which God has imposed upon us with a firm reliance upon his Almighty help," and with prayers for God's blessing upon himself and his people. The remarkable part of this imperial manifesto, as it strikes an American is, that Alexander the third "Commands" "all our faithful subjects to unite before the altar of the Almighty their prayers with ours, to secure fidelity to us and to our successor." It is however in strict accord with the laws and customs of the Country, and will meet with little or no opposition. It depends on the policy of the new Emperor in the administration of public affairs whether he will have a pleasant time on the throne.

The gross weight of hogs packed in Cincinnati this winter is 2,156,000 pounds less than last season. The yield of lard increased 1,273,000 pounds. The aggregate cost of hogs this season was \$6,466,000, an increase over the previous season of \$358,000.

ARREST OF FOURTEEN COUNTERFEITERS.—New York, March 13.—The secret service officers of the Treasury Department have since Tuesday, arrested fourteen of the gang of counterfeiters who flooded the country with counterfeit coin. Moulds and other implements for manufacturing coin, together with a large amount of counterfeit coin, were captured.

Why Garfield's Cabinet is Weak.

New York Star.

1. Because it ignores the colored race, who have given the Republican party its existence, its battle cry, its ruin d'etre, and who gave Garfield their votes.

2. Because the South, comprising nearly one-half of the country, is only represented in it by a Louisiana carpetbagger, thus ostracising the section which most needs encouragement and attention.

3. Because Blaine, who heads it, is notoriously corrupt, an advocate of subsidies, an agent of the corporations and monopolies.

4. Because Windom, although opposed to Blaine upon the question of corporations and monopolies, is loose upon the currency question and ought not to be trusted with the management of the treasury.

5. Because the great State of New York is only represented in it by Postmaster James, who was invaluable in the post-office of this city, but may prove to be "another good man gone wrong," when he comes to be spoiled by the corruptionists of the Star routes and the politicians who will run his office in spite of him.

6. Because Illinois, the State which repudiated Senator Logan in the Chicago convention, is represented in the cabinet by young Lincoln, who has no official experience whatever, and who having been appointed as a personal favor to Logan, will be at the war department only Logan's clerk.

7. Because MacVeach does not represent the Republicans of Pennsylvania, or any portion of its people, except the Cameron clan, who unanimously join in opposing him, and thus leave him without a constituency.

8. Because such comparatively unimportant States as Iowa and Minnesota are deliberately given the preference over the magnificent State of Massachusetts and its Republican record.

9. Because, instead of representing the country, the members of the cabinet have been appointed to represent the political leaders whom Garfield hoped to placate—Conkling, Sherman, Logan, Cameron, Blaine—and because, in every case except that of Blaine, who represents himself, and that of Logan, who is not entitled to serious consideration, the leaders would have preferred some other representative.

10. Because, in a cabinet intended to be all for Garfield, there is only one Garfield man—Kirkwood, of Iowa—and he, like Toots, is of no consequence.

11. Because the appointment of MacVeach loads the Garfield administration with all the electioneering frauds of Hayes and insures the hostility of every honest Congressman.

These are a few reasons to begin with. Others will be apparent presently.

The bill that passed the Senate on the subject of prohibition is in substance as follows: The first section makes it a misdemeanor, punishable by a fine not less than \$100 and not more than \$1,000, with imprisonment at the discretion of the court, for any person to manufacture, buy or sell in this State any spirituous or malt liquors, except wines and cider, otherwise than allowed in the act. The second section prescribes that spirituous liquors may be sold for medicinal, chemical and mechanical purposes by druggists, apothecaries and physicians, duly licensed, who shall not keep on hand a greater quantity than thirty gallons, nor sell a greater quantity to any person at one time than one gallon. The county commissioners are to grant licenses to not more than five physicians, druggists, etc., in the county, who shall sell only for the purpose indicated, etc. The act is to go into effect on the first day of October, 1881, but if at an election to be held in August the people vote "against prohibition," no one is to be punished for violating any of its provisions. The act contemplates total abstinence, except as to wines and cider, and except when spirituous liquors are prescribed as a medicine, or perhaps as a tonic.—News and Observer.

An Important Circular. A circular has just been issued by the Treasury Department relative to the purchase, exchange, and redemption of the minor coins of the United States, which discontinues the redemption of minor coins at the Philadelphia Mint after the close of the present month. The purchase and exchange, at par for lawful money, of such coins will be continued at the Philadelphia Mint, however, as usual. The offices of redemption will hereafter be the Treasurer of the United States and the assistant United States treasurer at Boston, New York, Philadelphia, St. Louis, New Orleans, Cincinnati, Chicago, San Francisco, Baltimore, and the United States depository at Tucson, A. T.

It is believed that the railroad tie of the future will be cut from the beautiful catalpa tree. The Fort Scott, Texas and Gulf Railroad have planted 300 acres of young trees, and the Iron Mountain Railroad 100 acres, near Charleston, Missouri. On the track bed of the latter company ties of this wood have lain in the muddy silt of the Mississippi for twelve years, and are still in a good state of preservation. They have outlasted two sets of white oak ties, and bid fair to survive the third. Fence posts in Indiana and Illinois are now found after having been in service for forty, fifty and even seventy-five years. In the muddy regions about Cairo, where it is grown extensively, it is used as "corner-stones" for the most substantial buildings. It is of an elastic nature, but not so soft and light as cottonwood. Dr. John A. Warder, president of the American Forestry Association, claims for the catalpa a durability and power of resistance to the influences of the elements possessed by no other wood. It is found in the Mississippi Valley and on the shores of the tributaries of the great river. It bears a large white highly-perfumed flower, and grows quite rapidly.—News and Observer.

For the Watchman. Rowan County Teacher's Association.

The fourth monthly meeting of this body convened in the rooms of the Graded School on the 12th inst., president Wilburn in the chair. The following are some items of interest taken from the minutes of the meeting:

All the members were present excepting Messrs. Wilburn, Owens and McNeill. The first topic for discussion was, "The Best Method of Teaching Spelling." Discussed by the leaders, Messrs. Davis, and Moser, also by Messrs. Wilburn, Owens and McNeill. The second topic, "How to Secure a Better Attendance on our Public Schools," was opened by Messrs. Wilburn and Brown, followed by Messrs. Green, Owen, McNeill and Davis.

Query number 6, viz: "Is Webster's 'Blue Back' a Suitable Text Book for Teaching Spelling in our Schools?" was taken up, and after considerable discussion, participated in by Messrs. Klutz, Owen, Davis, McNeill, Brown, Moser and McKenzie, the following motion prevailed:

Resolved, That Webster's "Blue Back Spelling Book" is not the best text book for teaching Spelling in our Schools.

The Committee appointed to take action as to holding an Institute in Rowan county during the summer, reported that they had secured an appropriation of \$100 from the County Board of Education for that purpose, and the promise of pecuniary aid from the Peabody Fund under certain conditions, that they had also procured from the County Board of Education an invitation to the State Board to hold a State Normal here during the summer, as provided for by a recent act of the General Assembly, and that they felt confident that the teachers of Rowan will enjoy the benefits either of a Normal or an Institute this year. The Association also extended a cordial invitation to the State Board of Education to hold said Normal at this point.

The Executive Committee reported as the order of business at the next meeting, the following topics:

1. The Best Method of teaching Reading. Leaders, Messrs. Brown and Thomson.

2. Should North Carolina adopt a compulsory system of Education? Leaders, Messrs. Green and Klutz.

Time of next meeting: the first Saturday of April (2nd). After various other items of business, the Association adjourned to meet at Salisbury on the above day, Mar. 12, '81. GEO. R. McNEILL, Sec.

THE SWELL-HEADED BABY.—Some months ago we took notice of a remarkable baby in Sharsburg township. It was at that time about six months old; it measured 27 inches around the head, while its neck and body were unaccountably small. The neck will not support the head and the child lies on a board with a cushion on it. Day and night it rests on this board, is carried about on it and nurses its mother from it. The child is now a year old. It measures 33 inches around the head and its body is wasting away— is smaller than it was six months ago. The child cannot see a wink, the swelling of its face and head closing up its eyes. It is the offspring of Dovey Honeycut, a white woman, and is a "woods cult."—Statesville Landmark.

CAUGHT IN THE VERY ACT.—Washington, March 11th.—Chief Brooks, of the secret service of the Treasury Department, has received information of the arrest in Winston, N. C., of a counterfeit named Bory Morgan. He had been dealing in counterfeit coin, and at the time of the arrest was engaged in the act of manufacturing silver dollars.

It is cruel for parents to let their children suffer with coughs and colds, which in so many cases lead to consumption and premature death. Give Dr. Bull's Cough Syrup. Price 25 cents a bottle.

The Baldwin AMONATED DISSOLVED BONES! The Best by Actual Trial Tests. It has become the LEADING BRAND in sections where it has been used. This is due to the Purity, High Grade, and Excellence of the materials used. It is manufactured from Pure Animal Bones, Potash, Animal matter, and Dried Blood. Better as a source of Ammonia than Peruvian. For sale by JONES, McCOBBINS & CO., Salisbury, N. C.

To THE FARMERS! I am Agent for the OLD RELIABLE "Anchor Brand" FERTILIZER For Cotton and Tobacco, —ALSO— ZELL'S GUANO. These are the Best brands made, A FULL SUPPLY FOR BOTH GOTTON & TOBACCO ON HAND, CALL AND SEE J. F. ROSS. 22:17

TO COTTON GROWERS.

ESTABLISHED 1865. IT WILL PAY YOU IF YOU WANT TO RAISE A LARGE CROP OF COTTON, —TO USE OUR—"Star Brand" Complete Manure. It is rich in Soluble Phosphate and Ammonia. It affords a constant supply of plant food. It contains no inert matter. It is an improver and renovator of worn-out lands. It is fine, dry, and in the best condition for drilling. It secures large crops and early maturity. It increases the quantity and quality of lint. It contains an ample quantity of all the elements necessary to make Cotton, and a large surplus which will show itself in the improvement of the land. It is prepared from the best and most approved materials, in the most careful and thorough manner, and under our personal supervision. Its Standard and Uniformity are Guaranteed.

We intend to make it to the interest of every Planter in the cotton-growing States to use this first-class high-grade standard Fertilizer. We again offer this first-class Fertilizer to Cotton Growers as being, in all respects, worthy of their patronage. It has stood the test of thirteen years' use among us, and has been brought to its present admirable condition only by the liberal expenditure of labor and money in a continuous effort to improve. Its standard and uniformity are guaranteed. The result of its application to the cotton crop for the past thirteen years has proved it to be equal to any fertilizer ever sold in the United States. During this time thousands of tons of it have been used by the farmers of Virginia and North Carolina, South Carolina, and Georgia with highly satisfactory results. Whatever may be the merits of other fertilizers, no one can go wrong in using one which is so well made, so fully guaranteed, and has been so long and so thoroughly tested.

ALLISON & ADDISON, Manufacturers and Proprietors of the "Star Brand" Complete Manures, Richmond, Va. For sale by J. Allen Brown, and by agents at all points in North Carolina. 22:2m.

FOR RENT. The house and lot on the corner opposite D. A. Davis' residence. Apply to D. A. Davis or the advertiser. 19:4t. JOHN L. HENDERSON.

ALLISON & ADDISON No Mistake!

Hundreds of Farmers will testify that the PLOW BRAND FERTILIZER AND THE OLD, RELIABLE PIEDMONT GUANOS Are First Class for Cotton, Corn, Tobacco, &c. Never failing to greatly increase the yield. These excellent Fertilizers have been thoroughly tried by planters in this section and do not require any further recommendation from us. We are also Agents for the sale of OBER'S SPECIAL COMPOUND. A Guano that stands at the head of the list as the Highest Grade Fertilizer on the market, as declared by our State Chemist, who has tested its quality. Testimonials certifying to the valuable results derived from the use of these manures by those who have tried them can be had, with terms, by calling on us at our Store. If you want something good and reliable don't fail to see us. BERNHARDT BROS. 19:1m

NOTICE! VALUABLE GOLD MINE FOR SALE. By virtue of a decree of the Superior Court of Stany County I shall offer for sale to the highest bidder on Monday the 4th day of April, 1881, on the premises, the Mineral Interest in 93 acres of land known as the PARKER GOLD MINE, in Stany County. Terms one third Cash, the balance in six months, with interest on the deferred payment, bond and security required, title retained till purchase money is paid. This is one of the oldest Mines in the State, and is very valuable for gold. There is no Mine in this part of the State that has paid so well as this, according to the work. It has only been worked in hand Rockers, and by that process there has been found two or three hundred thousand dollars worth of gold, among which were several nuggets weighing from one to five pounds each. There has been some difficulty in the title to this property, but by this arrangement and sale, the title will be good. This property is situated in Stany County, N. C., and about 8 miles north of Albemarle, and about 8 miles south of Gold Hill, in Rowan county. Any person wishing to examine the property before the day of sale can do so by calling on Capt. M. S. Parker, who lives near the Mine, or Col. Arnold Parker, who lives 2 miles west of Albemarle. The latter has some fine maps of the Mine, and will take them and will take pleasure in exhibiting them and give any information about the property. A. C. FREEMAN, C. S. C., and Commissioner. Allenarle, N. C., Feb-26th, 1881. 2:3w.

ALCOCK'S POROUS PLASTER A Curative Host in Itself. Thirty years' experience has firmly rooted Alcock's Porous Plaster in public estimation. Their wonderful adaptability to the various symptoms of disease is a mark to medical men of all schools. For nervous persons, incontinencies, one or more applied to the spine produced sleep when opiates, even hydrate of chloral, had been of little service. Now, when once asleep, it is the common practice to apply a Plaster to the back. You scarcely touch the pillow before you are sound asleep. Alcock's Porous Plaster has the curative effect of the Spanish fly blisters, yet make no sore, and never affect the kidneys; are convenient for all ages and conditions, usually only producing a "blister" on the skin, and more or less smarting, but without the burning, and without protrusion or pain of the latter. This is true even in Croup, Quinsy, Pleurisy, Lung and Throat Affections, and the utility of this salutary invention has been warmly welcomed. They are largely sold in every part of the world, and it is believed that not less than five hundred thousand persons are well and attending to the duties of life, free from pain, who have an Alcock's Porous Plaster somewhere about them, and who, but for the said plaster, would be prostrate upon a bed of agony. Besides, a peculiar, pleasant odor, mild, or altogether odorless, is given off by the pores of the body, imperceptible to the eye, but which envelops the person in a cloud of this vapor, through which contagion cannot penetrate. In fact, Alcock's Plasters supply an atmosphere like that from balsam or pine woods, and no doubt attract and neutralize the various miasmatic diseases about, they should be worn on the chest or back as preventives.

THE ALCOCK'S POROUS PLASTER soothes pain, reanimates torpid limbs, seems, in many cases, to revive the powers of life. The great demand for them to be used as a universal remedy. They are convenient of application, and safe for all, being incapable of producing any injurious effects. Dr. Valentine Mott, Dr. Johnson, of Hartford, and Dr. Myers, of Savannah, have reported of them in the highest terms. The great Mott said: "They were all that could be hoped for in a plaster—simple, cleanly and adhesive; perfect as artificial supporters of the muscles and for pains, because of their counter-irritant quality, usually at once giving ease." Local weakness of the back, breast and side, always benefited, thus curing lumbago in a few hours, sometimes in a few minutes.

In serious heart and chest affections their use causes an absorption or evaporation of water, by which dropsy of the heart and hydrothorax have undoubtedly been cured. They appear to have a peculiar effect upon the nervous, allaying irritability while supplying warmth. They seem to accumulate electricity, and aid the circulation of the blood through the part where applied, by which healthful actions are induced. The Porous Plasters are flexible, and found of great help to those who have weak backs or pains in the side. Especially are they valuable to those who have neglected colds. They are often preventives of consumption; may be used after a cold, and all kinds of influenza instrumental in effecting a cure. In variable climates they should be worn on the breast, or between the shoulders, or over the kidneys, by those who are subject to take cold easily. This simple plan will soon produce constitutional vigor that will enable one to resist extraordinary changes of temperature. Experience has proved the Porous Plaster to be a blessing to the consumptively inclined, invariably producing the most remarkable abatement of the worst symptoms.

Principal Agency, 294 Canal Street, New York City; and for Sale by all Druggists. FOR RENT. The house and lot on the corner opposite D. A. Davis' residence. Apply to D. A. Davis or the advertiser. 19:4t. JOHN L. HENDERSON.
