a few farmers in Rowan so eager to grasp the golden rewards of cotton raising that they have neglected to raise corn and meat, and are now contracting to pay 80 cents per bushel for corn out of the cotton crop of 1381. Their supplies of meat will cost at a corresponding high rate, and it may be asked is it a paying operation? If it is, follow it. But it should be remembered that it is contrary to all the agricultural speeches and lectures yet published. All writers and distinguished farmers concur in the opinion that it is very unsafe to stake the whole fortune of a year on the success of a single crop. They also agree that it is of the highest importance to produce on the farm all the supplies required for the support of the family and for the hands and the stock employed. THE MUNICIPAL ELECTION.

This subject has been much thought of lately, and very properly so. The question has often been asked, who is the best man for the Democrats to put in the field for mayor? and who for commissioners? These are questions, aside from polities, directly interesting to every citizen of this town; and every one should thoroughly canvass the subject in his own mind and determine on good, substantial men, who are competent to take charge of the town and of its affairs. This, at this time is very important. Our business is rapidly increasing; the place is growing more important as a market, and our railroad prospects are brighttening, and the people are looking forward casional until 81 when it commenced to more important and advantageous railroad connections. With these advantages crowding upon us, it behooves every man, who has any interest in the place, to assist in selecting and electing the best The Hook and Ladder Company were available men to fill the most important

SOLUBLE PACIFIC MANUFACTURED BY

PACIFIC GUANO COMPANY, THE LEADING COTTON FERTILIZER.

By reference to the reports for the past several years made by the North Carolina Experiment Station, it will be seen that Soluble Pacific Guano (tested by the commercial value) has held the highest rank among the forty or fifty different

brands of commercial fertilizers offered for sale in the State. This is a splendid, but not undeserved, tribute to the Pacific Guano Company, which for sixteen years has manufactured an article universally admitted to be unsurpassed in its remarkable effects upon the growth of the great Southern staple, Indeed, so well known is Soluble Pacific Guano, that we have almost ceased to issue circulars except for distribution in the more remote districts and in those recently

opened to Railroad transportation. Although we have thousands of testimonials as to the value of Soluble Pacific Quano, we will only publish below a few from some of the leading farmers of this and adjoining counties, which will serve to stimulate inquiry among those who have not used it, and will result in securing favorable personal testimony from its old patrons to those who are desirous of learning its results in the past, which results, combined with the solid reputation of the Pacific Guano Company, are a sufficient guaran-
