A Curative Host in Itself. Thirty year's experience has firmly rooted

ALLCOCK'S POROUS PLASTER

Their wonderful adaptability to the various symtoms of disease is a marvel to medical men of all schools. For nervous persons and lunatics, one or more applied to the spine produced sleep when opiates, even hydrate of chloral, had been of little servire. Now, when one cannot sleep, its is the common practice to apply a Plaster to the back. You scarcely touch the pillow before you are sound asleep.

Allcocks Porous Plasters have the curative effect of the Spanish fly blisters, yet make no sore, and never affect the kidneys; are convenieut for all ages and conditions, usually only producing a "blush" on the skin, and more certainly curative than liniments or blisters, and without prostration or pain of the latter. This is true even in Croup, Quinsy, Pleurisy,

Lung and Throat Affections, and the utility of this sanitary invention has been warmly welcomed. They are largely sold in every part of the world, and it is believed that not less than five hundred thousand persons are well, and attending to the duties of life, free from pain, who have an Allcock's Porous Plaster somewhere about them, and who, but for the said plaster, would be prostrate upon a bed of agony. Besides, a peculiar piny, pleasant odor, halo, or atmosphere exhales from them by the warmth of Fruits, the body, imperceptible to the eve, but which envelops the person in a cloud of thin vapor, through which contagion cannot penetrate. In fact, Allcock's Plasters supply an atmosphere like that from balsam or pine woods, and no doubt attract ozone. When contagious or infecti rus diseases are about, they should be worn on the chest or buck as preventives.

THE ALLCOCK'S PERO JO FLASTER

othes pain, reanimates torpid limbs, seems, in many cases, to revive the powers of life. The great demand proves them to be used as a universal remedy. They are convenient of apolication, and safe for all, being incapable or producing any injurious effects.

Dr. Valentine Mott, Dr. Johnson, of Hartford, and Dr. Myers, of Savannah, have spoken if them in the highest terms. The great Mott said: "They were all that could be hoped for n a plaster-simple, cleanly and adhesive; perfect as artificial supporters of the muscles; and for pains, because of their counter-irritant malities, usually at once giving ease." Local veakness of the back, breast and side, always benefited, thus curing lumbago in a few hours, Roy. ometimes in a few minutes. In serious heart and chest affections their
