ALLUDOK'S POROUS PLASTER

A Carative Host in Itself. Thirty year's experience has firmly rooted A.r. Charlite Allcock's Porcus Plaster in public estimation. Their wonderful adaptability to the various symtoms of disease is a marvel to medical menof all schools. For nervous persons and lunaties, one or more applied to the spine produced sleep when opilites, even hydrate of chloral, had been of little service. Now, when one cannot sleep, its is the common practice to apply a Plaster to the back. You scarcely touch the pillow before you are sound asleep.

Allcocks Porous Plasters have the curative flect of the Spanish fly blisters, yet make no sore, and never affect the kidneys; are convenieut for all ages and conditions, usually only producing a "blush" on the skin, and more certainty curative than liniments or blisters, and without prostration or pain of the latter." This is true even in Croup, Quinsy, Pleurisy, Jung and Throat Affections, and the utility of his sanitary invention has been warmly welcomed. They are largely sold in every part of the world, and it is believed that not less than five hundred thousand persons are well, and attending to the duties of life, free from pain, who have an Alleock's Porous Plaster somewhere about them, and who, but for the said plaster, would be prostrate upon a bed of agony. Besides, a peculiar piny, pleasant odor, halo, or atmosphere exhales from them by the warmth of the body, imperceptible to the eye, but which eavelops the person in a cloud of thin vapor, through which contagion cannot penetrate. In PURIFIER. It is the only known remedy that cures fact, Allcock's Plasters supply an atmosphere like that from balsam or pine woods, and no doubt attract ozone. When contagious or infections discuss are about, they should be worn on the chest or back as preventives.

THE ALLCOCK'S POROUS PLASTER

nothes pain, reanimates torpid limbs, seems, in many cases, to regive the powers of life. The great demand proves them to be used as a universal remedy. They are convenient of ap- No one who is willing to work falls to make more in Salisbury, the to lawing described tract of plication, and safe for all, being incapable of money every day than can be made in a week at producing any injurious effects. Dr. Valentine Mott, Dr. Johnson, of Hart-

ford, and Dr. Myers, of Savannah, have spoken of them in the highest terms. The great Mott said; "They were all that could be hoped for in a plaster-simple, cleanly and adhesive; perfect as artificial supporters of the muscles; obtained for new inventions, or for improve
