HEAVY FREIGHT BILLS .- The Greensboro Tribune says, the Randleman Manufacturing Company of Randolph, pays to the railroad office at High Point \$1,560 a month for freights. The agent at that place says he unloads seven cars a day to, and loads five cars a day from High Point, which shows a considerable amount of business.

The durability of steam engines is much greater than most persons are aware of: Properly set up and taken care of they will last, not quite forever, but longer than an ordinary life-time. The one now employed in the car shors of the Western N. C. Railroad has been in almost daily use for about 30 years, and looks as bright and works as smoothly as if it were fresh from the hand of the builder.

Mr. Edward Atkinson, of Boston, as serts that cotton manufacturing in th South will not pay. Col. Jones, of the Charlotte Observer, is trying to pursuade Mr. Atkinson that he is mistaken, and holds up a list of figures and facts to convince him. Meanwhile, every train (8 of 10 per day) going South, carries a steam engine or cotton factory machinery to test the question, if indeed there is any doubt about it. We shall know more of it amounted to an inundation in some places, in afew years hence.

Ever after he occasionally became vicious and unmanageable, and would smash up things in his way at a terrible rate, and actually killed twelve men at different times while in these fits of bad humor.

Prosecution-Mr. Blaine as a Witness-Scenes and Incidents of the First Day. [Regular Correspondent.]

WASHINGTON, Nov. 19, 1881.

I have this hour returned from the Guiteau tritl, and will give you my impressions while they are fresh. The court room was so debsely crowded that I could not at first see the prisoner, but pressing within the bar I secured a seat from which I had an excellent view. As I took my seat, I heard a sharp, distinct voice say: "I want the Court to know that I do not come here on my hands and knees Deity!" Looking in the direction of the voice, I saw a pale, thin, excited, gesticulating man; it was Guiteau. Soon the door of the witness room was opened, and all eyes were fixed on the well known form and features of James G. Blaine. He was conducted to a seat within the bar. Col. Corkhill now arose to open the case for the prosecution. If the reader has seen a verbatim report, I presume he has States, in so important a case, a case in which the words of counsel will be read been so incompetently and weakly repre sented. Receipts and Expenditures for the Fiscal Year Ending September 30th, 1881.

We are indebted to General W. P. Roberts, for permission to make some extracts from his forthcoming report of the transactions of his office for the past fiscal year. It is needless to remark, where so talented and efficient an officer is in charge, that the affairs of the office are conducted in the most admirable manner. The report will, as to other matters, speak for itself.

The first portion is devoted to the receipts from all sources during the year. We take the following items from those placed under the head of

RECEIPTS

Tax on bank stock, \$3,630 55; tax or corporations, \$1,525; license tax on drum mers, \$51,800; license tax on fertilizers. \$29,500; fees from Secretary of State, \$6, 894 76; general taxes (on land, property etc.,) \$203.297 38; income tax, \$2,256 63; special tax for support of the Deaf. Western North Carolina Railroad

The State Commissioners of the W. N. C. Railroad completed their investigation and inspection, and we learn from the Raleigh Observer that the following is the substance of their full report :

It appears that there were some ten a legations of discriminations considered by the commissioners at their recent meeting at Charlotte. Many or most of them embraced charges for carriage over other roads than the Western North Carolina Railroad only. In the reply made by the authorities of the Western North Carolina Railroad, they say that they make full answer in all matters, but do not admit the right of the commissioner to inquire into facts concerning their connecting lines. They say that if any discrinations have occurred on the Western Road they were by accident, and not intended: it having been all the while, and is now, the purpose and intention of the management to strictly observe the law.

The commissioners, in their record of their proceedings, says: After considering the complaints and the answers of the management (of the Western N. C. Rail road), the commissioners find as a fact that there have been discriminations by the management of the Western North Caroling Railroad Company in violation of the act of sale. But as some of them had been already corrected since the commissioners began their investigation, and the managers professed their willingness to correct all and guard against their occurrence in the future, the commissioners deem it proper to take no further action for the present, reserving the right to do so hereafter should it become nec-

This is a point of great importance, for great compression is necessary when the cotton must be transported a long distance, and the manufacturers have regarded this as a necessary injury, and buyers have refrained from it whenriment is corroborated by others, the ex planation will most likely be found in the results of some experiments that have been made at the Massachusetts Institute of Technology to determine the size and strength of the fibre of cotton. The diameter of a single fibre varies from one twelve hundredth to one fourteen hundreth of an inch, and is stronger than iron of the same weight. It may be that no amount of compression can break or weaken so small and so strong a fibre. The results of these experiments will be looked to with interest by manufacturers. -News & Observer.

HARD ON THE LAWYER .- It is related of George Clarke, the celebrated negro minstrel, that being examined as a witness he was severely interrogated by the attorney, who wished to break down his evidence.

"You are in the negro minstrel busiiess. I believe ?" inquired the lawyer.

"Yes sir," was the prompt reply. "Isn't that rather a low calling ?" demanded the lawyer.

"I den't know but what it is, sir," replied the minstrel; "but it is so much better than my father's that I am proud of
