

Sheep. Sheep raising in South Carolina is becoming quite profitable. A statement by Mr. Foyner, of that State is published, from which we learn that from a flock of sixty-seven, valued at \$2.50 each, and two bucks at \$10, after deducting every kind of loss sustained, he cleared \$150.00 in a year. A genial climate is best for a delicate animal. An investment of \$177.50 realizes \$150.00. Beats cotton or anything else the farmer can raise in this country away out of sight. What is true of South Carolina as adapted to successful sheep raising is also true of North Carolina which of the two is really the better adapted. But the packs of hungry cubs that run at large and prey upon sheep is the obstacle in the way of successful ventures in that industry. The dogs hold the fort, while farmers annually lose thousands that might be realized if the cubs were out of the way.

A very smart girl. Why Miss Belle Clinton expects to be worth \$25,000 in ten years.

The smartest girl I've met in Iowa I met yesterday at Nevada, Story county, Northwestern Iowa—Miss Belle Clinton. Miss Clinton is a bright-eyed, rosy cheeked girl of about 20, as full of fun and health and vigor as a good girl can be. Two years ago Miss Clinton was a school teacher. Saving up by her teaching about \$160, she last spring borrowed a span of horses from her father, rigged up a "prairie schooner" and, taking her little brother, started for Dakota. Miss Clinton says laughingly to-day, speaking of her trip: "Why, I never lived so nicely in my life, and I never had such an appetite, and such courtesy I received everywhere! Rough, rude men would come to our camp, and after I had talked to them awhile, offer to build my fire and actually bring water to me. We went up through the wheat country, which they call the 'Jim River country.' It's about 100 miles east from the Missouri at Fort Sully. I homesteaded 160 acres of land. Then I took up a timber claim of 120 acres more."

"What is a timber claim?" "Why, I hired a man and we set out acres of trees. This gave me 160 acres more. So I have 320 acres now. But I must tell you about those trees. They were young locust, apple and black walnut sprouts. I sowed a peck of locust beans, a pint of apple seed and two bushels of black walnuts in our garden in Iowa a year ago. These sprouts were little fellows and we could set them out fast—just go along and stick them in the ground. But they are just as good. I believe my 3,000 little black walnut sprouts will be worth \$15 apiece in ten years and \$20 apiece in fifteen. My locust trees will some time fence the whole country."

"Then what did you do?" "We built a shanty and broke up five acres of the land, and this fall we came back to Iowa to spend the winter, and here we are. In the spring I'll go back with more black walnut and locust sprouts, and take up 160 acres more. The trees are just what I want to plant and they'll pay better than any wheat crop that could be raised—only I've got to wait for them ten or twelve years; but I can wait."

Here a girl who owns in her own right 320 acres of splendid black prairie soil now and who will own 480 acres in the spring, every acre of which will bring \$5 within three years and \$10 within five years, and \$20 within ten years. Her black walnut and locust trees will be worth as much more. At thirty she will be worth \$25,000.—Chicago Tribune, Des Moines Letter.

CHRISTMAS CRIMES.

The Christmas holidays, while very quiet here and generally so throughout the State, have been unusually murderously elsewhere. From all directions come reports of homicides and crimes. For the most part we pass them by.—News & Observer. Yes, this accords with our reading. Whiskey turned loose always will bring out the worst. The next scene in the act will be Judge Lynch, rope in hand and masked, saying, "Justice is tardy, the lawyer with his specious pleadings and subterfuge makes it uncertain, the present jury system is a failure and a humbug, the pardoning power of the Governor is autocratic, and the penitentiary is full

of loop-holes of escape, so vengeance is mine, and I will repay an eye for an eye and a tooth for a tooth." Society is shocked, and the man of peace and order stands dumfounded and appalled. We believe that there is, in some degree, a remedy for this and it will be found in remodeling the jury system. We would have juries elected by the people just as they elect magistrates or judges. Let the people send up by election, every two years, the names of fifteen of their best men from each township, whose names shall be drawn from at the court house for each term of the court to serve them as jurors.

Thus capable men, the choice of their fellows, could be had to sit upon and decide fairly and intelligently intricate cases of fact. The professional jurymen could be gotten rid of, and the ignorant, incapable man would not sit where he does not belong. The judge is a judge of law, so the jurymen is a judge of facts, and it is of as much importance to have a judge who is lawyer enough to know the law. Good men are tired and sickened with hearing of crime and countercrime, and it is time the flaws in American justice were being found and dealt with.—Oxford Torchlight.

Discovery of a Concealed Treasure in Alamance County.

In the southern part of this county, in Newlin's township, about ten days ago, Joe Woody contracted with a colored man, Ephraim Alston, to have some rails split. Near a school house Woody had allowed the pupils to cut a tree and use the top for firewood. Ephraim went to work upon the butt out of this tree, splitting it into rails. When it had been quartered, the next thing was to heart each section, as practical rail-splitters understand. In doing the latter act he struck a regular bonanza and twenty-six pieces of glittering gold coin fell, worth ten dollars or more each.

These coins were concealed in an inch and a quarter augur hole, over which the tree had grown, in thickness, about four inches. On the outside no traces of the hole could be seen. From the growth of the tree since the boring of the hole, it is supposed that the coins were put there not later than 1812. In diameter the tree was about two feet, and it is not likely that the concealing dates as far back as revolutionary times. The concealer of this treasure is supposed to have died suddenly without ever revealing his secret.—Alamance Gleaner.

A Californian who tied one end of a rope around his waist and lassoed a cow with the other, reports that "t first he thought he had the cow, but at the end of the first half mile he became convinced that the cow had him."

The new freight steamer West Point, of the Richmond and York River line, was wrecked at West Point, Va., on Monday of last week by a terrible explosion, which caused the death of nineteen persons and the serious injury of others.

The Color and Lustre of Youth are restored to faded or gray hair by the use of Parker's Hair Balsam, a harmless dressing highly esteemed for its perfume and purity. Oct 19-Nov 13

PRINTERS THE PROGRESSIVE PRINTER is a new book, full of information by an old printer, and gives samples of new Job Printing. The colored plate is a fine feature, and is worth the price of the 75c. S. Whybrew, Pub. Rochester, N. Y.

## GOOD COFFEE.

Everybody wants it, but very few get it, because most people do not know how to select coffee, or it is spoiled in the roasting or making. To obviate these difficulties has been our study. Thurber's package Coffees are selected by an expert who understands the art of blending various flavors. They are roasted in the most perfect manner (it is impossible to roast well in small quantities), then put in pound packages (in the best, not ground), bearing our signature as a guarantee of genuineness, and each package contains the Thurber recipe for making good Coffee. We pack two kinds, Thurber's "No. 34," strong and pungent, Thurber's "No. 41," mild and rich. One or the other will suit every taste. They have the three great points, good quality, honest quantity, reasonable price. Ask your Grocer for Thurber's roasted Coffee in pound packages, "No. 34" or "No. 41." Do not be put off with any other kind—your own palate will tell you what is best. Where persons desire it we also furnish the "Ideal" Coffee-pot, the simplest, best and cheapest coffee-pot in existence. Grocers who sell our Coffee keep them. Ask for descriptive circular. Respectfully, H. K. & F. B. THURBER & CO., Importers, Wholesale Grocers and Coffee Roasters, New York.

P. S.—As the largest dealers in food products in the world, we consider it our interest to manufacture only pure and wholesome goods and pack them in a tidy and satisfactory manner. All goods bearing our name are guaranteed to be of superior quality, pure and wholesome, and dealers are authorized to refund the purchase price in any case where customers have cause for dissatisfaction. It is therefore to the interest of both dealers and consumers to use Thurber's brands.

Dec. 17, 3m

NOTICE! JOHN F. EAGLE, FASHIONABLE BOOT AND SHOE MAKER.

Invites your attention to his shop, opposite Meyer's Office. Repairs neatly and promptly done. All grades of goods made to order Oct. 1st, '81:4t

## ALLOCOCK'S POROUS PLASTER

A Curative Host in Itself. Thirty years' experience has firmly rooted Allocock's Porous Plaster in public estimation. Their wonderful adaptability to the various symptoms of disease is a marvel to medical men of all schools. For nervous persons and lamed sleep when opiates, even hydrate of chloral, had been of little service. Now, when one cannot sleep, it is the common practice to apply a Plaster to the back. You scarcely touch the pillow before you are sound asleep.

Allocock's Porous Plaster has the curative effect of the Spanish fly blisters, yet make no sore, and never affect the kidney; are convenient for all ages and conditions, usually only producing a "blush" on the skin, and more certainly curative than liniments or blisters, and without prostration or pain of the latter. This is true even in Croup, Quinsy, Pleurisy, Lung and Throat Inflammation, and the utility of this singular invention has been warmly welcomed. They are largely sold in every part of the world, and it is believed that not less than five hundred thousand persons are well, and attending to the duties of life, free from pain, who have an Allocock's Porous Plaster somewhere about them, and who, but for the said plaster, would be prostrate upon a bed of agony. Besides, a peculiar piny, pleasant odor, halo, or atmosphere exhaled from them by the warmth of the body, imperceptible to the eye, but which envelops the person in a cloud of thin vapor, through which contagion cannot penetrate. In fact, Allocock's Plasters supply an atmosphere like that from balsam or pine woods, and no doubt attract ozone. When contagious or infectious diseases are about, they should be worn on the test or back as preventives.

THE ALLOCOCK'S POROUS PLASTER soothes pain, reanimates torpid limbs, seems, in many cases, to revive the powers of life. The great demand proves them to be used as a universal remedy. They are convenient of application, and safe for all, being incapable of producing any injury to a child of thin vapor, and for pains, because of their counter-irritant qualities, usually at once giving ease. Local weakness of the back, breast and side, always benefited, thus curing lumbago in a few hours, sometimes in a few minutes. In serious heart and chest affections their use causes an absorption or evaporation of water, by which dropsy of the heart and hydrothorax have undoubtedly been cured. They appear to have a peculiar effect upon the nervous system, allaying irritability while supplying warmth to the system, and increasing electricity, and aid the circulation of the blood through the part where applied, by which healthy actions are induced.

The Porous Plasters are flexible, and found of great help to those who have weak backs or pains in the side. Especially are they valuable to those who have neglected cases. They are often preventives of consumption; nay, they are believed to have loosened the grasp of this terrible affliction, and had been mainly instrumental in effecting a cure. In variable climates they should be worn on the breast, or between the shoulders, or over the kidneys, by those who are subject to take cold easily. This simple plan will soon produce constitutional vigor that will enable one to resist extraordinary changes of temperature. Experience has proved the Porous Plaster to be a blessing to the consumptively inclined, invariably producing the most remarkable abatement of the worst symptoms. Principal Agency, 294 Canal Street New York City; and for Sale by all Druggists. 20ly 1-d.
