T. K. Bruner : Dear Sir: At your request I will give you an account of our doings lately at this mine. In order to obtain a steadier in our pumps. When completed we shall have a much larger supply of water and consequently shall be able to move much more ground with results increasing in proportion. The appearance of the mine is steadily improving under the influence of continual prospecting. Our latest strike shows well in comparison with the best Gold Hill road, pyrite; chalcopyrite; on the mine, the grit being of the nature and in the position from which good results have always been obtained. We have already obtained some very pretty gold from the vicinity including one 30 dwt. piece. In fact from what we have done this winter with imperfect machinery and a limited supply of water we will certainly do something startling this summer with perfect machinery, and plenty of water, both of which are now assured to us. Our 150 dwt. piece which I showed you in Salisbury has already be-

Wil Southern Belle—Southern Belle mining liamson, in the 34th year of her age, feel asleep. Her life, so busy to the close, so earnest in purpose, so full of self-denial, knowing only the duties that thickened around her, as one child after another was clasped close in her motherly arms, was one of christian bearing and fortitude. Six little children are left, and what a loss they have sustained! The circle seems desolate, and but for the converse of the picture, all would be gloom. With the wife, mother, there can be no more sorrow, for God will wipe all tears away ; no more weary days of pain; no more sleepless nights of woe. She breathes the fragrance that is "wafted through the streets of the city immortal." Alas! for places that knew her gentle presence, the circle of friends, the church, of which she was a devoted and consistent member. She is gone; but faithful here, she is safely at home in the Paradise of
