of Virginia and North Carolina, who have used it from one to eight years-all going to establish it as a fact that, all things considered, it is Equal to any and Surpassed by none.

We offer it with great confidence for use on the TOBACCO, COTTON, and CORN cross to be planted in 1882, with the assurance that it is in all respects fully equal to what it has been in the past. Knowing the materials which enter into its composition, and manufacturing it under our personal supervision, we Guarantee the Standard.

It has been the aim of all connected with this Guano to produce the best possible fertilizer at the lowest possible cost, and claim that our extended experience and unusual resources and facilities have enabled us to approach this more mearly than has been done in any other fertilizer with which we are acquainted. Those who have been using it unite in the opinion that

By its Use the Consumer Gets the Greatest Benefit from the Smallest Outlay.

An ordinary application of this Guano will cause an increase of 100 to 200 per cent. in quanity-at the same time improving the quality and hastening the maturity of the crop. It is especially adapted to

TOBACCO PLANT-BEDS.

Its use promotes growth, prevents the attacks of the "fly," and makes healthy, stocky plants with thick leaves and an abundance of roots, which bear transplanting much better than those raised with Perusian Guano.

ALLISON & ADDISON, Manufacturers, Richmond, Val

For sale by J. ALLEN BROWN, Salisbury; R. M. ROSEBORO, Rowan Mills; C.F. LOWE, Lexington, and by agents at all important points in Virginia, North Carolina, South Carolina, and Georgia, at prices as low and on as liberal terms as any other standard highgrade fertilizer. We solicit your confidence and patronage.

made of same metal, and of sufficient weight. This Roller gathers the air while passing back and forth over the clothes, forcing air and water through the fabric. At same time the steam is thrown up through the perforated pipes underneath from the bottom of the tank. There are wooden strips between the pipes so as to protect them and form a smooth bottom in the tank.

The process is simple : any one can operate the machine. First, soap the clothes and distribute them evenly about four or five inches thick in the tank. Turn on enough water to cover them-turn on steam, and move the Roller back and forth until the water is colored. Turn the valve and let the water pass off. Add fresh water, and repeat this three or four times, and you find the clothes are thoroughly washed without the slightest injury, for there is no rubbing process employed, the Roller having rounded edges so as to prevent any wear or cutting. A lace handkerchief can be washed as well as a bed quilt. This Machine is in operation at Meroney & Bros. Machine Shop, where they will be manufactured at as small a cost as possible. Any one having a steam boiler in operation can use one of my machines at small cost and with satisfactory results. One person can do the work of ten wash women in one day and do the work better.

It is a splendid thing for boiling grain and vegetables for stock.

It is also a good wool-washer.

State and County rights for sale by the Inventor.
