THURSDAY, JUNE 1, 1882.

NEW TERMS. From and after the 1st day of January 1882, the subscription price of the Watch man will be as follows: One year, paid in advance, payment delayed 3 months, 2,00

Bring in specimens of your gold ores.

Ripe peaches from Georgia are reported

The Graded School give an entertainment in Meroney's Hall on Friday night.

The young gentlemen of the city give a ball this evening at the Boyden House, to visiting young ladies.

The storm yesterday blew down several trees in the city, also demolished the guano warehouse of Mr. J. Allen Brown.

The Western R. R. Shops at this place, have turned out two dandsome observation cars for the use of the summer travel on that road.

The Salisbury Pleasure Club gave a very pleasant Hop at the Mt. Vernor Hotel last Friday evening to visiting young ladies.

The Comic "4" Minstrels came to an untimely end here last night. This was not the kind of an end that the end men contemplated.

The next meeting of Teacher's Association is to be held in this city, the 2nd a carriage. Saturday in June. A full attendance is

There were only a few brawls among the negroes on the 30th. A good many imbided two much, but behaved better than usual on such occasions.

"Rowan Mine."

Mr. L. Graf, of New Ark, N. J., bas bought and consolidated the Bame and Holtshouser mines in this county, and has christened the property, as above. These two tracts of land which comprise the Rowan Mine, lie twelve miles Southeast of Salisbury, a little to the right of the Stokes ferry road, and next adjoining to the . Dutch Creek and Atlas mines, containing nearly 200 acres, about half der woodland-the timbers being mostly pine, oak, hickory, poplar and walnut. The face of the country is undulating, swelling into successive hills and dales, as if designed by nature for anything else than to be burrowed into for the yellow metal contained in the many veins of quartz, which in color, almost vie with the butterfly which gaily floats its gaudy colors on the breeze.

The ores of this property, are mostly quartz colored by oxides and carbonates, which carry free gold; brown ores-dccomposed pyrite-very rich in free gold; Sulphurets of iron and copper (pyrite, chalcopyrite-the former in abundance, the latter, rarely) which have not been disintegrated by oxidation, but which carry large per cents of gold. All the sands or grit found in or near the vein matter are auriferous, and occasionally tering, ranging from \$10. to \$500. and one assay reaching as high as \$2,000. of ascertaining more correctly what NORTH STATE MINING COMP'NY!
