A Suggestion to Farmers.

We call attention to the following letter written by our State Geologist, in the last monthly Bulletin of the Agricultural Department. It opens up another field for the farmer, which promises to be far more valuable than cotton.

BY virtue of a decree of the Superior Court of Rowan county in the special proceeding entitled George Kluttz and others, the undersigned will sell on Monday the 29th day of May, 1882, at the Court House door in Salisbury, about Salisbury, Salisbury We call attention to the following valuable than cotton.

clear and beautiful; also instructions for producing a luxuriant growth of hair on a bald head or smooth face. Address, inclosing 3 c. stamp, BEN. VANDELF & Co., 12 Barclay St., N. Y. whole of this sum might be kept at for sugar not less than \$500,000. The Mecklenburg -Cha. Observer. home. It is only within a generation that France has learned how to make her own supply, and she has even become an exporter of sugar. Numerous and seemingly insuperable difficulties were overcome, in working up through two generations to this result. One of the first and greate t difficul culties was the development of a beet which would vield a sufficient per centage of sugar. A common result now is 10 per cent, and 12 is frequently reached, and sometimes 14. Ten per cent, pays. The French produce sugar at a cost of 3 to 4 cents a has become one of the great national industries, developed from nothing by science, skill and persistent enter-

> prise and energy. Germany preceded France in the inauguration of this industry, and has at least kept pace with her in its deof Europe are following these examples, and their production is every year approximating their consump-

This country alone has been willing of life, and to pay for it a sum which Genuine Porus Plaster. bears a large proportion to the entire national revenues.

ting a foothold in three or four

The climate of this State is notably provinces of France. An experiment seed, resulted in a crop yielding 16.1 T REDUCED PRICES AT per cent. of sugar. Seeds were again procured in 1876 and distributed, with instructions, to a number of counties, but too late for a fair ex periment. The instructions cover the selection of the soil, its preparation, Sweet Oil, Tanner's Oil, the kind and quantity and mode of fertilizer, cultivation, time and method of gathering and shipping; and all these points are important, and several of them essential to a large per centage of sugar. For example, of Orange, one in August, the other in This April 29th, 1882. September, the per centage of sugar BIRDS AND CAGES in the former was more than double. And it is safe to say that the instructions were not fully carried out in one tried again the following year, but the season was very unfavorablefirst too dry, then too wet. And notwithstan ling all these drawbacks, samples from half a dozen counties exceeded 10 per cent., and some of hem nearly reached 12.

I hold it demonstrated, therefore, that as soon as we choose, we can add this great industry to our agriculture, ind aid in supplying a product, for which this country expends nearly \$100,000,000 per annum.

And there are capital reasons to induce farmers to pursue the experiments begun by the Department. The sugar beet has a very high value \$ as food for stock, and contributes largely to the improvement of the soil, and rapidly elevates the whole character of the agriculture of a coun-

try. The product per acre is tons where we make bushels of cereals. and as soon as we will produce the beets, capitalists are ready to put up sugar on a large scale. One party, industrious. Men, women, boys and girls wanted everywhere to work for us. Now is the time. You can work in spare time only or give four whole time to the business. You can live at home and do the work. No other business will pay you nearly as well. No one can fall to make enormous pay by engaging at once. Costly outlit and terms free. Money made fast, easily and honorably. Address

True & Co., Augusta, Maine.

Sugar on a large scale. One party, who has already made large investments in the State, made this proposing in the State, made this proposing in 1876, in consequence of the Raleigh experiment of the previous true & Co., Augusta, Maine. year, referred to above."

W. C. KERR.

Nuggets from the Mines.

Sheriff M. E. Alexander has sold his gold mine to a New York and Boston company, who have already begun preparations to work it on a large scale, in the purchasing of engines, hoisters, crushers and other necessary machinery. This mine is located near the old Capps mine, about six miles from the city and is said to be a fine gold producer.

Capt. John Wilkes is now working the old Capps mine, with good re-
