MINING. T. K. BRUNER, MANAGER. A NEW MINE is now being opened on R. V. Lanier's property, 3 1/2 miles east of Salisbury. The vein is large and the ores pay splendidly.

Cabarrus Mines. No. 7. The Furness property of 628 acres is owned by the heirs at law of Wm. P. Furness dec'd., of New York city; this property adjoins the Phoenix and Gibb properties, it embraces the Phoenix veins as well as some of the veins which course through the Gibb property.

From the Pulpit. The Minister's Audience Viewed with an Important Eye. Burdette in Cincinnati Enquirer. He falls into the pew and slides easily into the most comfortable corner. He shakes himself down into a comfortable attitude.

THE FIDGET. Whether you look for him or not, you know where he is. He pushes the head-sock away with a long resonant growl of his own. The head-sock he pushes to the front of his shoulders, over the back of his head and bangs on. It is going to sit still this Sunday, if it kills him.

THE WATCHER. His neck is fitted on a globe socket and turns clear around. He sees everything that goes on. The man who comes in late does not escape him, and it is vain for the tenant to think he got that little note to the alto conveyed between the leaves of the hymn book unobserved.

Some Water. The big rain last Monday put a friend of the Dispatch in a thinking notion, and the result was the following calculation based on the annual rain fall in the State.

From "The Times." Editor of the Times - I have been watching the correspondence in your paper for the past few weeks with much interest. Having been in the practice of medicine for many years, I have learned to have some confidence in the many proprietary medicines which are the market for the day.

Mining Situation. The dividends on incorporated Mining Companies stocks for June, this year, amount to only \$499,475, against \$891,900, in 1882, and \$1,370,375 in 1881.

Rutherford College. Her President - A Successful Educator and a Benefactor to His Race. Cor. Journal-Observer. The highest evidence of a great general is in the fact that with the least resources he overcomes the greatest number of his enemies.
