cane sugar crystallizes readily, but

Department of Agriculture we have

the "analytical and other work done

on sorghum and cornstalks, by the

chemical division of the department,

July to December 1880." Dr. Collier,

chemist of the department, establishes

here certain points, from which we

may make our own inferences. One of

the chief objects he had in view was

to ascertain the actual and the rela-

tive quantities of sucrose and glucose

contained in the juice of the sorghum

during the successing stages of its

growth. This was done carefully and

continuously and with extreme accu-

racy. The laws of increase and of di-

minution were ascertained as fully as

the work of a single season would al-

low, and in the report he was able to

redresent these results in a series of

"graphical plates" which show at a

glance the proportions of sucrose and

for though no two agreed fully, as

agreed in the main features, and they

Commencing in the late days of

July, we see that the glucose exceeds

the sucrose in quantity, but this con-

dition ceases by about the first of

August. From this time the sucrose

increases rapidly though not uniform-

ly, partial retrogressions occurring, of brief duration. When the seeds

begin to harden, say about the mid-

dle of September, the increase is

checked until the seed is nearly ripe;

then it goes on, and at the full matu-

rity of the seed it has reached its

maximum, which it maintains with

only at the most a small waste. The

these is in about the quantity and the

proportions in which it exists in

average sugar cane. We may there-

fore infer that it will yield a return

perhaps it would not.

And with the difference in their com- only reward,

ent relations they sustain to the laws The Turnip Crop. and force of crystallization. We have long been familiar with the fact that this number. The turnip crop is one of the most important in our system of farm rothat grape sugar in its ordinary states tation, but it is one that is more genwill not crystallize at all. We have in chief part a solution of glucose in water, and that because of the presence of this uncrystallizable sugar we ailed to obtain any crystals, though we were well aware that sucrose was also present. This may be fairly stated cooked and mixed with other food, the soil. We use the Acme harrow as about the extent of our practical knowledge, three years ago. The fact remained that no one could tell what a given lot of sorghum sirup would do; perhaps it would crystallize are not deficient in bulk when com surface feeders. pared with many other crops. In the special report No. 33 of the

The most essential feature connected with the cultivation of turnips is to make the seed bed fine. The seeds are very small, and must not be deepy covered, and no lumps or other obstructions should be tolerated on the location intended for them. In procuring seed get that which has matured this season, and use it liberally, as this plant is often attacked by the turnip fly, which is very destructive. Turnips may be sown broadcast on the ground that has been cultivated and kept clean and free from grass and weeds the previous year; but they should never follow corn, experience having demonstrated that such rotation does not result well.

The seed may be sown in drillsthe drills to be of such a distance apart as serves best for either the hoe or cultivator. When high enough to thin out an ordinary hoe will cut As recognized by the Laws of the United of glucose at the dates given. One of away all that are not desired, leaving these may serve for all very correctly the most vigorous plants; and handpicking is sometimes necessary to thin might have been expected, yet all out the stools that are left. During Wheat all stages of growth the crop should Shelled Corn be kept free from intrusion of weeds Corn in the ear and grass, as turnips are sometimes Outs overtaken by drought, during which Barley time it is absolutely essential not on- Irish Potatoes ly to keep down weeds but also to keep the soil loose by frequent culti

Best in the World. Brandreth's Pills have stood the test of forty-

five years of use by the American people. They are entirely Vegetable. They are absolutely universal, for there is no disease they will not cure, if taken in time. They are safe for infants and adults. They aim to accomplish three things: first, to parify the blood; second, to cleanse and regulate the stomach and bowels; third, to stimulate the kidneys and liver and purge away the ashes of the system and diseased matters of the body. By pur- RUBBERS FOR JARS ging with these Pills constantly, a new body can be built up from fresh, healthy food in a few months. In this way, gout and rheumatism, ulcers and fever sores can be eradicated 56 in a few weeks. The worst cases of dyspepsia 32 and costiveness can be cured by taking one or Scarr's Fruit Preservative! two pills every night for a month. In cases of twenty years' standing, gentlemen have been Without the use of Scaled Cans. The cured by taking one pill a night for a year. CHEAPEST AND ONLY SURE KIND Brandreth's Pills give to the human body, no KNOWN. PERFECTLY HARMLESS, Cal matter how worn or decayed, the recuperative powers of youth. In their action, they imitate and try it. the rapid changes of the youthful body. We all wish to die of o'l age. A hundred years is

the natural limit of life, which can only be reached by purging and purification. In general debility, nervous tremor, and mental depression Brandreth's Pills have a marvelous effect. They have won the confidence of millions in all parts of the civilized world. Constitutions shaken by long residence 20 in unwholesome climates, or by sedentary habits, are wonderfully renovated by a course of 55 this extraordinary medicine, which, powerful 30 as is its action on the whole system, is perfectly harmless to the tenderest frame, The Pills 55 are composed of rare balsams, without the admixture of a grain of any mineral whatever, or of any other deleterious substance. They operate directly, powerfully, and beneficially upon the whole mass of blood; nor can we question the fact when we see indigestion cured, liver complaints arrested, the oppressed lungs brought into healthful play, and every physical function renewed and strengthened by their agency.

Letter from a Gontlemen Ninety Years Old .- Long Life from Use of Brandreth's Pills.

PRAIRIE DU CHIEN, WIS., Feb. 11, 1882. I am in the nineticth year of my eatrhly pilgrimage, and before passing to another, and I trust, a better world, I wish to bear testimony to the great virtues of Brandreth's Pills as a household remedy. They are the best blood tents of which are equal to 2150.4 cubic purifiers and cleansers of the stomach and bowels in the world. I have raised a family of 10 children, been blessed with three wives, and my family experience reaches over seventy years. other substances, one-fifth must be add- For over forty-five years I have known and believed in Brandreth's Pills, They have cured me of indigestion, costiveness, dyspepsia: and the females of my family have found them usual practice is to "heap the measure." invaluable at all times. I also wish to say that I have found Allcock's Porous Plas-TERS very useful in breast pains, backache ALFRED BRUNSON, A.M., D.D.

CURE OF NEURALGIA. Taken as a "Forlorn Hope," Brandreth's

Pills Effect a Magical Cure. - Small-Pox Cured. Schenck Ave., East New York, April 12, 1880.

I most cordially give my testimony as to the great value of Brandreth's, Pills, verified by eighteen years' experience in my mother's (the late Mrs, Dr. Geo M Browne) family and my own, They were at first taken as a "for- & A.R.R. with all points South and Southers lorn hope," for the cure of a very severe case of Neuralgia of several years' standing, the patient being completely prostrated by disease and the excessive use of opium, taken to dead en the pain (by advice of her physician.) The effects were almost magical; in one month she was able to be up and walk around freely, and the disease has never returned. My mother was also cured of an attack of Inflamatory Rhumatism by the same means, About six years ago I was taken with what appeared to be a bad cold, but in a short time, symtoms of confluent Small Pox were developed, causing us much alarm. I determined to try Brandreth's Pills as a remedy, and their efficacy was soon apparent. I was well much sooner than was expected, and without receiving a single mark or trouble of any kind. It is my firm belief, judging from the severity of the case, that had I gone through the regular routine prescribed by physicians, I should have died, I know of many other instances of the value of Brandreth's Pills in disease and sickness, which I will be happy to give to any one who will apply to me.
