CURIOUS EXPERIMENT.-Some few months ago I filled a white glass lamp, of a globular shape, with clear spring water and placed it in the window at about ten o'clock of a clear morning, in a position to receive the rays of the sun. In one minute, a piece of black silk which I had placed within half an inch of the glass, and in the focus, became ignited, The rays of the sun pan thus be collected thro' a lody of clear water, and a com mon white glass lamp may be made to serve the purpose of a barning lens. I placed in the same lamp, suspended

by a thread in the water, several colored glass beads. A little distance from the iamp I fixed a sheet of white paper. The ray of the sun passing through the water and the beads, threw upon the surface of the paper a variety of the most beantiful colors that imagination can picture .-Journal.

Here is an item that so inds like the old times. The Beaufort Telephone says : Mr. Rafus Garner, living about two miles from Newport, killed a very large bear on Saturday night. He caught him in a trap he had set in his corn. The bear jumped the fence with the trap hung to his foot and run some forty yards, whenhe became entangled in some undergrowth. Mr. Garner hearing the noise. ran out with his gun to see what was the matter, and soon came up with bruin and shot him twice before he succeeded in killing him.
