ALLCOCK'S POROUS PLASTERS.

The Original and still the Best!

INSIST ON HAVING ALLCOCK'S, THE ONLY GENUINE POROUS PLASTER.

One of the most remarkable inventions of the present age is ALLCOCK'S POROUS PLASTER. They are the result of years of chemical study, and only time and experience has brought them to their present perfection. Testimonials are received every day of the wonderful cures of Sprains, Weak Back, Rheumatism, Lumbago, Paralysis and hosts of other diseases. Of course the vast sales of ALLCOCK'S POROUS PLASTER have brought before the public what being called porous, would give the world to understand that they were a similar article to the genuine. We would most particularly caution the public against these humbugs. They contain none of the healing ingredients used in ALLCOCK'S, but are simply a combination of lead, red pepper and rubber, and are vaunted in long-winded advertisements as an improvement on ALLCOCK'S POROUS PLASTER. Beware of the hazy and untrue statements and never use any of these so-called porous frauds.

Allcock's Porous Plasters

Relieve Debility and Nervousness.

ALLCOCK'S PLASTERS worn on the region of the kidneys warms the spinal marrow which is a continuation of the brain, imparting new vitality and power to the spine. They strengthen that mighty organ and fill it full of foreign electricity or nervous fluid. Thus they will restore to the busy active brain of man or woman, the energy and ability which has been lost by disease, worry or overwork. They restore vitality where there has been debility and nervousness, and prevent loss of memory and paralysis. Physicians highly recommend them for nervous debility, whether arising from dissipation or overwork. They are now known to be the great regenerators of the nervous system and are invaluable in all cases of hysteria.

Weak Kidneys Cured.
CONTROVERSY, N. H., March 2, 1880.

I have been greatly troubled with Rheumatism and Weak Kidneys. I was advised to try ALLCOCK'S POROUS PLASTER, and used two other kinds of so-called Porous Plasters which gave me no relief, but one of yours has worked like a charm, giving me complete relief, and I have not been troubled with Rheumatism and Kidney Complaint since using them, and I consider myself cured. EDWARD D. BURNHAM.

Bronchial Troubles.
123 C ST., WASHINGTON, D. C., January 7, 1882.

I take great pleasure in recommending ALLCOCK'S POROUS PLASTERS. I was indignant to try them by Mrs. Samuel J. Randall, and I found them everything desired. I used four other kinds of Porous Plasters before procuring ALLCOCK'S; they were perfectly useless. But immediately upon applying two of ALLCOCK'S to my chest my cold and bad cough were at once relieved. I want you to send me one dozen forthwith. JOHN T. INGRAM.

Spinal Disease Cured.
HAMMILL'S HOTEL, ROCKAWAY, BRACH, N. Y., May 19, 1882.

ALLCOCK'S PLASTERS have been of such great service to me and mine that I feel it a duty to state the facts, as briefly as possible, to induce others to use them. My wife for many years was confined to her bed suffering from spinal disease. After spending a thousand dollars in vain effort to cure, she applied three of ALLCOCK'S PLASTERS to the spinal column, one above the other. In a few days all pain left her. She applied fresh plasters every two weeks and in the course of two months she completely recovered her health. At first she could hardly walk across the room; each day she walked a little farther, and now she is able to walk five miles with ease. She still occasionally applies the plasters to her back, but she has been perfectly well for upward of a year. LEWIS L. HAMMILL.

CURE OF SPRAIN.
534 MAIN ST., HARTFORD, CONN., April 26, 1879.

Will you please send me an ALLCOCK'S POROUS PLASTER, 20 inches long by 7 inches wide, to use on my back by reason of a sprain. I have worn them with the best curative effect, for a weak side near the heart, many years—for injury caused by strain and lifting in the army. I could not do my work, and after using the plaster month after month, I use one about every month. I like it all, for it has not the power or strength of ALLCOCK'S POROUS PLASTERS. B. WELLS SPERRY.

"A Blessing in Disguise."
484 ADELPHI ST., BROOKLYN, March 29, 1881.

No family should be without ALLCOCK'S POROUS PLASTERS; their healing powers are wonderful. For years past I have seen and known them to cure and relieve the most obstinate and distressing cases of rheumatism, kidney complaint, bronchitis, neuralgia, lumbago, inflammation of the lungs and throat, paralysis, asthma, spinal disease, and coughs and colds. In my own case they relieved me almost instantly, and permanent relief. My joints are all an invaluable and speedy remedy for all kinds of aches and pains. They are a blessing in disguise; and no wife or mother should be without them if she values her peace and comfort and freedom from nervous exaltation and other ailments. As a strengthening plaster, also for backaches and weakness, they have no equal. I have never yet found a plaster so efficacious and stimulating, or to give so much general satisfaction. Used in connection with BRADFIELD'S universal life-giving and life-healing PILLS, no one need despair of a speedy restoration to good sound health. MRS. E. TOMPKINS.

A SURE CURE FOR BURNS, CUTS, BRUISES AND LANENESS.

West BECKETT, BERRSHIRE CO., MASS., Jan. 23, 1882.

We could not keep house without ALLCOCK'S PLASTERS; for 20 years we have used them and found them most effective for Burns, Cuts and Bruises and all kind of Laneness. JULIA E. SHAW.

Relief for Neuralgia.
HASTINGS MINN., Jan. 8, 1883.

I am troubled with neuralgia in the back of my head, neck and spine, but I find by applying one of your POROUS PLASTERS to the back of my neck and one across the small of my back, these almost always relieve me.

I take pleasure in recommending them to the afflicted for they have helped me much.

J. F. BEEBEE.
Pastor M. E. Church Hastings.

Watching One's Self.

"When I was a boy," said an old man, we had a schoolmaster who had an odd way of catching the idle boys. One day he called out to us, "Boys, I must have closer attention to your books. The first one that sees another idle I want you to inform me, and I will attend to the case."

"Ah," thought I to myself, "there is Joe Simmons that I don't like. I'll watch him, and if I see him look off his book I'll tell. It was not long before I saw Joe look off his book, and immediately I informed the master."

"Indeed," said he, "how did you know he was idle?"

"I saw him," said I.

"You did? And were your eyes on your book when you saw him?"

"I was caught, and I never watched for idle boys again."

If we are sufficiently watchful over our own conduct, we shall have no time to find fault with the conduct of others.

THE WRONG PARENT.—"You know Blank, don't you?" queried a citizen, as he entered a Griswold street office yesterday.

"Yes."

"Have you any influence with him?"

"Well, I may have."

"Then you are the man to go to him. He has a son about sixteen years old?"

"Yes."

"That boy is on the road to ruin because his father is too good-natured and too much wrapped up in business. Seems to me it is your duty to go to that man and tell him in a friendly way that he must exercise more government or his boy will be lost."

"I don't think I'm the man," replied the other, as he chewed at a blotting-pad and gazed out of the window.

"Why not?"

"Well, I've got a boy about the same age, and I'm just going up to the police court to pay a fine of \$20 for his smashing up saloon furniture! Try the next."—*Detroit Free Press.*

It Will Come Back to You.

You have a father? You have a mother? You love them. But once in a while you grow impatient and the meanness of your nature crops out; it wrecks itself on innocent father and mother, perhaps, and they suffer the punishment of a cross word called up by another's annoyance. The hard word is spoken. It may be regretted, forgiven and forgotten, but it can never be recalled. Father and mother will sigh and forgive, but—

Some day it will come back to you.

Yesterday, maybe, a little one ran up to you smilingly, and with the innocent, heaven-born confidence of childhood, clapped its little hands, that would not harm a fly, in your face. The childish action delighted its author, but it annoyed you. You were busy and reproved the little one. Two pearly tears stood in her great blue eyes, her lips faltered, and she turned away from you. The era of childhood, with its happy, fleeting hours, will erase the unkind word, but—

Some day it will come back to you.

Burn the Grape Leaves.

A writer in the Country Gentleman calls attention of its readers to the necessity of burning grape leaves to prevent mildew: There is a second kind of spore (or seed) formed in autumn within the substance of the foliage, and is designed to remain in a dormant condition until spring, when liberated from the leaves by decay, it germinates and introduces the mildew for another season of destructive work. These winter spores, as they may well be called, have thick coverings provided for them, and will not be destroyed if the grape leaves are used for litter or placed in the compost heap. An disposition like this would only aid the spores in their escape from the inner substance of the grape leaves, and also help to distribute them far and wide. The only thing is to gather the leaves after they have fallen from the vines and burn them. This is a small amount of work, and only needs to be done once in a season. The use of flour of sulphur in the early part of the season is of great importance in arresting the progress of the pest; but the burning of the leaves is the preventive, while the use of sulphur is the cure. The killing of one spore may mean the prevention of a whole leaf patch of mildew, which might have grown from it the following season. Fruit-growing needs to be done with much forethought.

The Evil of Landlordism.

In England there is more land lying idle in sporting grounds, game preserves and landlords' parks, than the whole kingdom of Belgium, which supports and happiness and prosperity 6,000,000 people and sends large quantities of exports to London. An income of £175,000,000 a year is received by 8,000 landlords as rent on 46,500,000 acres of land. They do work, but recall Carlyle's picture of the French marquis, perfumed and petted, who sat at his castle window and watching a poor woman gathering nettles in the rain, received one nettle of three, as his rent. If England were cultivated as closely and as thoroughly as Jersey it would not only supply its present population but 50,000,000 besides. So vast are its tracts of idle land, however, that

It is Time for a Change.

We sleep in Northern beds and on spring mattresses, adorned with Yankee furniture, and our eyes open upon Yankee luxuries. We eat out of Yankee plates with Yankee knives and forks. We are placed in Northern or Western coffins and deposited in a grave dug with an Ames shovel and spade. We make for sale only cotton with which we expect to pay for the thousand and one things we buy from the West and North.

We have our smoke houses and corn cribs in the West, and buy our flour from other sections because we raise cotton and nothing but cotton to sell. The negroes are free yet we

are slaves to King Cotton. To-day we see in our stores Northern apples, although we live near Buncombe county. To-day our merchants sell cabbage from Baltimore as cheap as our culture. To-day we use oleomargarine and Goshen butter, although we have fine grazing lands well adapted for the dairy and cattle raising. At the Shelby depot 200 huge walnut logs are awaiting transportation North, because we have not the pluck and push and machinery to make all self walnut furniture.

When we build railroads we send North for iron and engines, while we furnish the money and curse the Yankee, whose pluck and energy we so much need. Whetstone Mountains divide Cleveland from Gaston county, yet we enterprising (?) tarheels send to Connecticut for whetstones. In Western North Carolina the projected railroad will run over a road bed of two miles of beautiful variegated marble in Cherokee county, yet our tombstones and monuments are imported from Vermont.—*Shelby Aurora.*

An Acre.

One acre of ground in lawn and garden is sufficient to maintain a family cow in any village or rural locality. One who knows how it is done, and has done it for several years, describes the methods by which it is accomplished: A quarter of an acre is in garden—strawberries, currants, grapes, raspberries, blackberries and gooseberries. There are six apple trees and fourteen pear trees. All but the garden is in grass, chiefly orchard grass. I am already feeding down a small piece of orchard grass under some apple trees the third time by tethering the cows upon it. Some of the grass I have just cut the second time, and some give a third cutting. Fifty rows of sweet corn for table use are now beginning to yield boiling ears, and the stalks and husks go to the cow. There are pea vines, bean vines, beet tops, small potatoes and other wastes to help feed the cow luxuriously, and in this way the family cow may be kept in abundance throughout the year upon one acre, while her manure will keep the whole acre growing richer every year, and will provide a liberal quantity for the flower beds and the shrubs and dwarf pears on the lawn. A very large quantity of the best manure is made by throwing the weeds with all the soil attached to them, and leaves that are raked up, and the wood ashes from the house, together with as much soil as may be needed, into a shallow pit in the cow-yard and leading the draining from the manure gutter into it. If a farm were only managed like the garden, every acre might easily pay \$100; but the labor is not to be had, and one pair of hands cannot do it for more than five or six acres. But the time will come when it must be done; when the land becomes fully occupied, and this great country has its 500,000,000 of inhabitants, a number which it can sustain with the greatest ease, with a thorough system of cultivation.—*The Dairy.*

The Old Mullein Plant.

While nature has overlooked search for the rare ones, has overlooked this fact. How many of us seeing the common Mullein plant in the old fields and waste places; the beautiful Sweet Gum tree bordering our swamps, have thought that in each there was a principle of the very highest medicinal virtue. It is true that the Cherokee Indians knew of this years ago, but not until recently has it begun to attract the attention of the Medical world, and now the long forsaken Mullein plant ranks among the first and all the medical journals are heralding its grand effects. In TAYLOR'S CHEROKEE REMEDY OF SWEET GUM AND MULLEIN, the mullein tea is combined with the Sweet Gum, and by its use Consumptives are relieved of their coughs and all suffering from Lung and Bronchial diseases are troubled no more. For further information, call on J. W. McKENZIE, Agent, and \$1.00 per Bottle. Manufactured by WALTER A. TAYLOR, Atlanta, Ga., Proprietor Taylor's Premium Cologne. Cash paid for Sweet Gum. Dec. 13--96m.

The Valley Mutual Life Association OF VIRGINIA.
—HOME OFFICE, STAUNTON, VA.—

The Cheapest, Safest, and Most Reliable Life Insurance now offered the public is found in the Valley Mutual, which enables you to carry a \$1,000 policy at an actual average cost of \$5.00 per annum. For further information, call on or address J. W. McKENZIE, Agent. MAY 29, 1883. SALISBURY, N. C.

A Great Water-Power FOR SALE!

The most extraordinary unimproved Water Power on the Yadkin River is for sale at low figures. It is situated at the head of the Narrows in Stanly county, 8 miles from Albemarle, the county seat; 13 miles from Gold Hill, and about 28 miles from Salisbury. It is one mile from the public highway leading to Salisbury, from which road it is easily accessible down to the water's edge. The peculiar feature of this property is that it is a natural stone dam which makes about a six foot head of available water. The dam runs at an angle of about 20 or 25 deg. up the river nearly all the way across, gradually diminishing in height as it approaches the opposite shore. A race of 100 feet in length will add from 12 to 14 additional feet of head, making the grand power of 18 or 20 feet. There is any quantity of building stone and slate of excellent quality, on the premises, easily transported by water.

This excellent power may be used for GRIST AND FLOURING MILLS, COTTON & WOOLEN FACTORIES, REDUCTION MILL FOR SULPHUR RETED ORES.

It is conveniently near the mines of Monticouery, Stanly, parts of Cabarrus, Rowan and Davidson Counties to make it a custom built, for the reduction of ores, with the great advantage of being at the centre of the mining districts named above. The ores within easy reach could not be worked out in a century.

This water power with 10 acres attached is offered at \$2,500, with the option of 100 acres at \$3,500. The lands are valuable for farming purposes, the situation healthy, the society good, and church and school advantages very good. Persons wishing further information may address "Water Power," Salisbury, or Mr. J. R. Littleton, Albemarle, N. C. (Map of place furnished on application.) 3:tf.

\$150,000,000 a year is sent out of England annually to buy food. It is with such arguments as these that the land-hunger of the poorer English classes is sharpened by the leaders of the radical movement.

A Paragraph for the Boys.

When the writer of these lines went to Charlotte, eleven years ago, to take the position of city editor on the *Daily Observer*, he found on the paper as a compositor, a little black-haired, pale faced, thoughtful looking boy. He was always the first at the case in the morning and about the last to leave the next morning between midnight and daybreak. He never talked, except when talked to, he did not drink, nor use tobacco, nor swear. He never frolicked and he never spent an idle moment; when not at work he was always reading something, and it got to be a matter of surprise, in the course of years, with reporters and editorial writers, what a range of questions that boy could answer—political, historical, theological, arithmetical and what not. When the books were not convenient or the time for research not at hand, that boy was consulted on vexed questions. A few years ago he went North. Last Saturday night we picked up *The Commercial*, a large, handsome, eight page weekly, published in Washington City, and read that W. R. Capps had acquired the proprietorship of it. That was the name of the quiet, thoughtful-looking boy. For some time he has been manager of the paper and now he has succeeded to the editorship of a prosperous, successful paper at the national capital. Braas alone have not carried him alone, but brains added to pluck and vim and steady habits and ambition.—*Statesville Landmark.*
