

Whatever you dislike in another person, take care to correct in yourself by the gentlest reproof.

Fortune is ever seen accompanying industry, and is often trundling in a white barrow as rolling in a coach and six.

On S. H. Farrow's farm, near Charlotte, says the Observer, a rabbit was chased into a hole beneath a clump of roots and the dog thrust his head into the hole, where his neck was so caught that he could not draw back. The dog had been missed from home exactly ten days, when he was accidentally discovered and released from his painful situation so weak and exhausted that he staggered as if drunk. The rabbit was found dead in the bottom of the hole. Having been unable to escape unless it had gone through the dog's mouth it died of starvation in sight of the unfortunate dog.

To Mine Owners and Mining Co's.

The undersigned are prepared to purchase ores of Gold, Silver, Lead, Copper, and Sulphur, in any quantity, to be delivered at nearest railroad station, according to market prices. Cash payments. Contract made in full for one to fifteen years. RICHARDS POWER & COMPANY, London and Swansea, England. All letters should be addressed to Mr. Perry Gosset, Thomasville, Davidson Co., N. C., sole Agent for the United States.

THANKS, THEY COME!

Our Stock Constantly Replenished.

TUTT'S PILLS

TORPID BOWELS, DISORDERED LIVER, AND BILIOUS AFFECTIONS. From these causes arise three-fourths of the diseases of the human race. These symptoms indicate the presence of: Loss of Appetite, Bowels constive, Sick Headache, Fullness after eating, Emission of bile, Irritability of temper, Low spirits, A feeling of having neglected one's duty, Dizziness, Emission of bile, Heart, Boas before the eyes, highly colored urine, Greenish stools, &c. TUTT'S PILLS command the use of a remedy that is directly on the Liver. As Liver medicine TUTT'S PILLS have no equal. Their action on the kidneys and skin is also prompt; removing all impurities through those three "scavengers of the system," producing appetite, sound digestion, regular stools, a clear skin and a vigorous body. TUTT'S PILLS cause no nausea or griping, nor interfere with daily work and are a perfect

ANTIDOTE TO MALARIA.

GRAY HAIR OR WHISKERS dyed instantly to a glossy black by a single application of this hair dye. TUTT'S PILLS, sold every where.

Address SIMMONS & CO., Portland, Maine.

N. C. Experiment Station.

Analyses and Relative Valuations of Commercial Fertilizers.

1884.—I. These reports are sent to all the papers of the State at the same time. They will be issued once a week or as rapidly as the analyses are completed. The relative valuations merely furnish a convenient method of summing up the results of analysis and comparing them. They are not designed to fix the price at which the article shall be sold. It is impossible to give any one set of figures which shall represent the commercial value of those ingredients over our extended territory and throughout the entire year. Since the beginning of 1883 the prices of superphosphates and "ammoniates" have declined considerably, as is well known. We shall, therefore, use the following figures, as reasonably approximate, in calculating these relative valuations during 1884:

Available phosphoric acid 9 cts per lb. Ammonia 20 cts per lb. Potash 6 cts per lb.

The figures before the names are the numbers of the analyses. 2371. Sea Fowl Guano, manufactured by Bradley Fertilizing Co., Boston, Mass., sampled in the C. C. R. R. warehouse, Wilmington, Jan. 9th. Contains: Moisture 15.83, available phosphoric acid 9.68, ammonia 2.94, potash 1.89 per cent. Relative value \$31.45 per 2,000 pounds.

2374. Farmers' Friend, Read & Co., 34 Beaver street, New York, sampled in the C. C. R. R. warehouse, Wilmington, Jan. 9th. Contains: Moisture 16.66, available phosphoric acid 8.51, ammonia 2.51, potash 1.88 per cent. Relative value \$27.61 per 2,000 pounds.

2375. Ammoniated Dissolved Bone, Jno Merryman & Co., Baltimore, Md., sampled in C. C. R. R. warehouse, Wilmington, Jan. 9th. Contains: Moisture 16.66, available phosphoric acid 8.51, ammonia 2.51, potash 1.88 per cent. Relative value \$27.61 per 2,000 pounds.

2346. Lister's Ammoniated Dissolved Bone Phosphate, Lister Bros., Newark, N. J., sampled at Raleigh Jan. 21, lot in hands of Rand & Barbee. Contains: Moisture 14.98, available phosphoric acid 11.62, ammonia 2.72, potash 1.94 per cent. Relative value per 2,000 pounds \$34.12.

2390. "Bos" Ammoniated Superphosphate, Wm. Davidson & Co., Box 136, Baltimore, Md., sampled at Goldsboro, with B M Privett & Co., Jan. 14. Contains: Moisture 13.14, available phosphoric acid 8.42, ammonia 2.44, potash 2.23 per cent. Relative commercial value per ton (2,000 pounds) \$27.59.

2391. Stone Acid Phosphate, Stone Phosphate Co., Charleston, S. C., sampled with Williamson & Upchurch, Raleigh, Jan. 18th. Contains: Moisture 15.00, available phosphoric acid 10.57, potash 1.82 per cent. Relative value per ton (2,000 pounds) \$21.21.

2406. High Grade Acid Phosphate, Royster & Strudwick, Norfolk, Va., sampled at A & N. R. R. warehouse, Morehead, City, Jan. 23d. Contains: Moisture 17.22, available phosphoric acid 12.11 per cent. Relative value per ton (2,000 pounds) \$21.80.

2410. Lazaretto Acid Phosphate, L. Chemical Fertilizer Works, Baltimore, Md., sampled with M T Norris & Bro., Raleigh, N. C., Jan. 29th. Contains: Moisture 16.01, available phosphoric acid 10.51, potash 2.14 per cent. Relative value \$21.49 per ton (2,000 pounds).

Curious Occupations.

Odd Methods of Making a Living in New York.

There is a bright looking fellow perambulating the streets of New York with a huge sack on his shoulder who styles himself the "omnibus buyer." By this term, says a correspondent, he means that he deals in everything. He buys old hats, old bonnets, old clothes, old hooks; also canes, umbrellas, old gloves, wigs, and in fact almost every old thing about a house. The value of these things is very small and yet when people find that they can get something for them, how rapidly they save them for the buyer. The latter knows just what can be done with each article. He sorts his stock in his garret and disposes of them at a nice profit, and if he can clear ten dollars a week he is doing well. Another class of petty dealers which one finds among the poor are the "time peddlers," as they are called. They visit poor families and second-hand dresses, second-hand shoes and similar articles, taking pay in instalments, and as they afford good bargains, they have a good run of business. These dresses are bought at pawnbrokers' sales at a mere song, and hence pay a large profit. The "time peddler" expects to lose occasionally, but he charges an extra rate, which enables him to meet the loss. There are hundreds of poor women who are clothed decently in this manner at a very small expense. There is a man here who deals in nothing but second-hand harness. He calls on the livery stables and buys anything that may be offered cheap. He re-

pairs and cleans these articles, which he sells to the wagon peddlers and others who use second-hand work. Another makes a business of starting toy vendors on the sidewalk. Any one who passes up Broadway will notice the number of men selling amusing toys. These fellows are started by a man who makes purchases and then divides them up. If he has a dozen salesmen and makes a quarter of a dollar a day on each, he is doing a good business. The small amount of capital required is also a noticeable feature. Many of these street vendors have from \$1 to \$3 invested, and yet they contrive to get a living out of it. Another curious "lay" is found in the bird fortune-tellers, who do better than most of the street traffickers, since they work on curiosity, which is always a powerful element. The pretty little fortune tellers are certainly interesting and you only pay a nickel for their service. The only secret of their penetration is found in the fact that they are kept hungry at least during business hours and a few seeds being placed in each envelope they are always ready to pick one out for their patrons. The seeds are cunningly dropped when the envelope is opened and the birds thus get their reward. If you should follow up the owners of these canaries you would find them living well on the profits, since sometimes they take in five dollars per day. Another business of small figures but large amounts is the five cent eating house, where every dish is limited to a nickel, and where hundreds are fed in a decent manner. The five cent lodging house is another institution which New York finds indispensable. The proprietor has a basement or a loft which he hires for four dollars per week. He will sleep fifty to seventy-five every night, and will clear \$10 per week on a capital of \$25. The bedding consists of straw pallets laid on a wooden platform, and the covering is carpets and old bed-clothes from auction. The one who cannot pay for such a lodging goes to the station house, which during the cold weather, is always full. This is commonly termed "taking the plank" since nothing is given but the privilege of full length on the floor. The interior of a station house affords a sad spectacle, which becomes still worse as one sees these wrecks of humanity turned out in the morning to take the chances of another cold day.

Milk Diet in Bright's Disease. Since we know not at present any drug that possesses therapeutic value to any marked extent in this terrible and fatal disease, and since it is daily making sad havoc among human beings, and principally among the class who, by reason of their valuable public labors, are particularly necessary to the welfare of the world, therefore, it becomes a medical question of paramount interest that we should discover some potent method of combating this very prevalent disease. Some years since Carel first called attention to the treatment of Bright's disease by the use of a milk diet, and since then Duncan, as well as many other prominent physicians, has written on this subject.

We have ourselves seen some remarkable results follow this treatment, while Dr. S. Weir Mitchell, of our city, is now quite an enthusiast on this subject. This method of treating a formidable disease has received sufficient distinguished indorsement to recommend it seriously to our notice. We would, therefore, ask all physicians who read this article to try this method of treatment and to furnish us with their experiences, which we will publish. The milk is used thoroughly skimmed and entirely freed from butter. To procure the best results, it has been advised that the patient shall restrict himself absolutely to milk and continue the treatment for a long time. If it disagrees with the stomach (as it will in some cases,) Dr. Mitchell advises that the patient be put to bed and the treatment commenced with table-spoonful doses, to which lime water is added, until the stomach tolerates the milk, when from eight to ten pints daily should be taken, and absolutely nothing else. The sanction of such a distinguished physician as Dr. Mitchell forces us to seriously consider the merits of this treatment, and we trust to receive the experience of all readers of this journal who may have cases of Bright's disease to treat.

Man and the Sun. One hundred years ago the diameter of the sun was four miles greater than it is at present. Ten thousand years ago the diameter of the sun was forty miles greater than it is now. The advent of man upon the earth took place no doubt a long time ago, but in the history of the earth it is a comparatively recent phenomenon. Yet it seems certain that when man first trod our planet the diameter of the sun must have been many hundreds, perhaps thousands of miles greater than at present. We must not, however, overestimate the significance of this statement. The diameter of the sun is at present 860,000 miles, so that a diminution of 10,000 miles would be a little more than a hundredth part of its diameter. If the diameter of the sun were to shrink tomorrow to the extent of 10,000 miles the change would not be appreciable

to common observation, though even a much smaller change would not elude delicate astronomical measurement. The world on which the primitive man trod was certainly illuminated by a larger sun than that which now shines upon us. It does not necessarily follow that the climate must have been hotter then than now. The question of warmth depends upon other matters as well as sunbeams, so that we must be cautious in any inferences drawn in this way, nor are such inferences needed for present purposes.—Logman's.

Letters of introduction are not always successful to get a man into society, any more than eloquent obituaries to get a man into heaven.

SIMMONS' LIVER REGULATOR

For Dyspepsia, Costiveness, Sick Headache, Chronic Diarrhoea, Jaundice, Impurity of the Blood, Fever and Ague, Malaria, and all Diseases caused by Derangement of Liver, Bowels and Kidneys.

Persons Traveling or Living in Unhealthy Localities, by taking a dose occasionally to keep the Liver in healthy action, will avoid all Malaria, Bilious attacks, Dizziness, Nausea, Dropsical, Depression of Spirits, etc. It is equally useful in cases of wine, but is no intoxicating beverage.

If you have eaten anything hard of digestion, or feel heavy after meals, or sleepless at night, take a dose and you will be relieved. Time and Doctors' Bills will be saved by always keeping the Regulator in the House!

It is PURELY VEGETABLE. And has all the power and efficacy of Colman's Mustard, without any of the injurious after effects.

A Governor's Testimony. Simmons' Liver Regulator has been in use in my family for some time, and I am satisfied it is a valuable addition to the medical science.

Dr. T. W. Mason says: From actual experience in the use of Simmons' Liver Regulator in my practice I have been and am satisfied to use and prescribe it as a purgative medicine.

The Old Mullein Plant.

While nature has been giving us an abundance of her valuable medicinal plants, she has by an All-wise provision been generous in the prolific distribution of such vegetation she has given for medicinal purposes, and science in its eager search for the rare ones, has overlooked this fact. How many of us seeing the common Mullein plant in the old fields and waste places; the beautiful Sweet Gum tree bordering our country lanes; thought that in each of them was a principle of the very highest medicinal virtue. It is true that the Cherokee Indians knew of this plant long ago, but not until recently has it begun to attract the attention of the Medical world, and now the long forgotten Mullein plant ranks among the first, and all the medical journals are heralding its grand effects.
