The New Silk Industry. The Result of the Competition for the Silk Culture Premiums.

From Philadelphia Inquirer, May 2, '84. The chief attraction at the silk culture exhibition at Horticultural Hall last night was the awarding of premiums by Strawbridge & Clothier.

Mr. Clarkson Clothier, in awarding the premiums, said: I come forward this evening to announce the award of the third annual premium, offered by Strawbridge & Clothier to the silk culturists of the United States.

It is but fair to assume that the growth of silk culture is to be measured by these figures, and the astonishing development of this industry in the last three years is, indeed, wonderful.

The industry has developed wonderfully in California, to which State the first premium was awarded last year, and in the South and East many are taking hold of the work.

This is a state of affairs that is especially gratifying to every citizen, and while we measure the importance of these results thus far attained, it must not be forgotten that to the fostering care and patient work of the members of the Women's Silk Culture Association the result is largely due.

First premium, of \$100, to Miss E. Woolston, Pemberton, N. J. There were 160 cocoons to the quarter pound, and the yield in reeling, 121-100 ounces of silk, and 279-100 ounces of waste.

Nine other premiums were awarded—one of \$75, one of \$65, two of \$50, and on down to \$10. The worms fed on the leaves of the Osage Orange, did not quite equal those fed on the White mulberry; and there was considerable variability in the number of cocoons to make an ounce.

The association has prepared a memorial to Congress indorsing the act providing for the creation of a silk culture bureau and establishing silk culture stations under the direction of the National Government.

Some people can hardly make a living, and some lay up money. Why is it? Into a village of a few hundred inhabitants, a young man came and was employed as a clerk in the store; he lived there fifty years and laid up \$100,000.

three forms. Those who succeed best are those who understand the best what they do and how to do it. Maria Rouse.

MCKESVILLE, May 7.—Dear Mr. Bruner: The following paragraph is on its road in the papers: ATLANTA, April 13.—Maria Rouse, an aged negroess from Liberia, was carried for at the city prison last night.

The above reported statement of Maria Rouse relative to Liberia contains just fact enough to give it the semblance of truth only. Nearly all the 70 emigrants who went with Maria in 1878 were from Currituck county, N. C., are alive, and on the strength of letters from them mailed direct to relatives and acquaintances that twenty-one persons embarked on Barque Monrovia, from the same county, with others, which vessel sailed from New York for Liberia on the 15th of April last.

This woman lived forty years in the United States so poor as to go to Liberia at the expense of the American Colonization Society. After some five years residence in the young African Republic, she is able to pay her way back to New York!

The number of those who have returned from Africa by reason of dissatisfaction or for any other cause does not exceed three per cent of the 3,657 persons sent to Liberia by the Society since the close of the late war, and the deaths during the first year's residence, from a l. c. s., have not been quite three per cent.

Persons at all cleanly in their habits have no occasion to fear the "Jigger." Where they are two lazy to wash their feet and bodies even once a week or a month, they may expect to suffer for neglect and indifference to their health and limbs, though no one but Maria Rouse, has ever heard of any person in Liberia losing by amputation or other cause a foot or a limb from "jiggers."

Ample evidence can be adduced to show that industrious, enterprising, thorough going and cleanly negroes do much better in Liberia than they can do in the United States. Read the following from Jack Smith.

A LETTER FROM LIBERIA.—Jack Smith, of Montgomery, Ala., went to Liberia last year, taking his wife and children with him. He is living at Brewerville and has written a letter to some of his folks, in which he says: "You need not listen to the many lies you hear about Africa saying that yellow people cannot live; it is all false; they do as well as black ones. The citizens say they do better. Be you assured that Africa is the home of the negro, and you will solve the problem one time or another. Here we have our 200,000,000 of native population, which needs all of your negroes to civilize them. You will please remember that we are not worrying over the thoughts of a civil rights bill, or any other bill. But we are in our own free country, where we have all the benefits of the law and citizenship. I am in Africa. I have land enough to make my money off of when I want to come to America. My five children each have their ten acres of land and my wife and I have twenty-five, which suffices us."

Need of Economy. One of the hardest lessons in life for young people to learn is to practice economy. It is a harder duty for a young man to accumulate and save his first \$1,000 than his next \$10,000. A man can be economical without being mean, and it is one of his solemn duties to lay up sufficient in his days of strength and prosperity to provide for himself and those who are or may be dependent upon him in days of sickness or misfortune.

One of the greatest evils of the present age is the undermining and overturning the loftiest and best principles that should be retained and held sacred in society. It is annually sending thousands of young men and young women to ruin and misfortune.

Cultivate, then, sober and industrious habits; acquire the art of putting a little aside every day and for your future necessities; avoid all unnecessary and foolish expenditures. Spend your time only in such a manner as shall bring you profit and enjoyment, and your money for such things as you actually need for your comfort and happiness, and you will prosper in your lives, your business, and will win and retain the respect and honor of all worthy and substantial people.

Horrible! Whole Families Poisoned. The heart's blood curdles and the brain grows dizzy as the poisoned monster hunts down the father, prostrates the gentle mother, and destroys daughter and son.

BLOOD & BONES. Before one bottle has been used, it contains no mercury or other mineral or vegetable poison, and is the only speedy Blood Purifier remedy known. One bottle proves its magical effects in the quick cure of Scrofula, Syphilis, and cutaneous diseases.
