MANAGERS.

The gold, silver and copper mines of he United States are pouring into this country about \$3,000,000 ever month in actual bullion. North Carolina's portion of this is very small, Why I Not because

we have not the mineral. But because we have not the means of treating our ores by the World's Industrial and Cotton for the several products. Many thousand tons have been worked up as free milling gold ore when - they were known to con-

tain 10 per cent. copper (or \$20 per ton) ans assisting in setting up North 30 per cent. sulphur (or \$10 per ton) 10 per cent. lead or (\$15 per ton) and \$15

in gold. Making a total of \$60 per ton and giving a result of from \$4 to \$8.

by the proper people, North Carolina ip the production of bullion. Thousands

date which if it could be worked up in this State would pay a handsome profit.

The Harding mica mine in Ashe county, has been worked for some time. The average production brings \$3 per lb. this price is according to the size. Some is produced that will trim 12x15 inches, this brings \$8 per lb. They have out a
