A. H. BOYDEN.

Miss Annie J. Viree, who has spent a portion of this place, returned to her home at Salisbury, this morning.

Tuesday night was severely windy. We were out on some citizens who were so tired they could not sleep. Not a word was heard of it.

There were at least two cases in this town of persons freezing to death during the night in December. One was an old man in this place, and the other a young man in Guilford county who got frost-bitten and fell by the road side.

It is possible for ice to be more slippery than another, that of the morning was the most so of the season. It was dangerous for old and heavy persons, to go out.

Mr. J. L. Lathrop of Worcester county, N. C., is stopping here for the winter, looking around at lands and other interests, with reference to a possible purchase of some of the same.

Mr. J. M. McCorkle is still in this town, slowly improving. Mr. West had another bad cold since our last.

Mr. J. Smith was very ill Tuesday night, but much improved yesterday.

John L. Lathrop, usually one of the best of the Western N. C. Railroad, was and is a very sick man.

These of our citizens who are going to visit the Exposition at Raleigh are advised that there is no objection in getting everything ready. The drivers' strike and bad preparation of some important details, and the preparations to a considerable extent, so that those who delay their visit for a few weeks, are not to be disappointed. The greatest mistake was in opening before all was ready.

**MINING DEPARTMENT.**

**MANAGERS.**  
 T. K. BRUNER. E. M. EAMES, JR., M. F.

Hoover Hill continues to produce the regular amount of gold each month. They are putting in a new pump and taking out enough ore to keep the 20 stamp mill pounding day and night. We regret to learn of the illness of T. H. Stillhouse, one of the mill men, so well and favorably known in mining circles.

Ivy and Crowell continue to run their five stamp mill on ore from the Biles mine. They report the finding of many beautiful specimens of white quartz with crystallized gold in it.

The Howland mill at the Hammett mine was run 4 days on ore taken from the Bat hill 25 foot vein. The result was 336 dwts. of gold. The work of milling and mining goes on daily and the owners feel satisfied with results.

Capt. James McCausland informs us that he has seven men employed at the Dams Mountain mine preparing to work again on a large scale.

By the 2nd Capt. Stewart will have the shaft at the Roman down 100 feet when they will begin to stop and hand the ore to the Oldham works near this place.

Mr. J. M. McCorkle is still in this town, slowly improving. Mr. West had another bad cold since our last.

huge 10 foot horn. This latter requires one to bear it, another to blow it. I remember seeing one about this length which had some eight or more mouth pieces and that number of people performing. Your old-fashioned "squeak-dunk," as the boys used to call that horrible instrument of torture, pales into a sweet and tranquil calm when compared with this device of the arch fiend. Do not for a moment imagine that I am extravagant when I say that there were no less than 5000 of these horns, on Canal Street alone, rending the air with their hideous discordant blasts. There were drums, and brass bands and firecrackers, but they were as nothing. Boys certainly all the boys were playing tin horns, and most lustily did they blow. Surely you don't mean grown men? Yes, I mean to say that scores of grown men, with long flowing beards, and some whose heads were tinged with grey, were blowing for dear life. And they were not alone; for whole droves of pretty girls appeared as much intoxicated with the delights of horn blowing as the men. But mind you, I do not call a halt here. There were older girls—some hanging on the arms of brothers, or other attendants—blowing, blowing, blowing. Fireworks of all descriptions were piercing the dark vault of heaven far above where the penetrating rays of the electric light could reach or pale their brilliancy. Such a scene! It continued till the "wee sma' hours. Christmas dawned with a leaden sky, and a gentle mist began falling about midday. My duties were at the Exposition grounds, thitherward I wended my way, putting in a good day's work. At night there was a grand Christmas tree lighted on the stage in the m. i. building. It is reported that there were thousands of children present to see it.

The holidays are passing here with only a small increase among the visitors at the exposition. There seems to be lots of bridal couples among the visitors, or else these are the most affectionate and at the same time most demonstrative people I have ever met. I have seen these couples so much absorbed that in passing, for instance, our splendid and exhibition, and gazing for a while at the beautiful colored fish in the aquarium, one would exclaim, "See they don't you?" and then they would kiss. It does seem to me that some people are more demonstrative than others.

I have a opportunity of knowing how the holidays are spent outside of the spacious halls of the World's Exposition. I know something, however, which has proven a great inconvenience, and has done harm in many ways; and that is a strike among the car drivers. It began last Saturday evening, at 10 o'clock Sunday the suspension was general. Sunday evening the owners of the cars were trying to run them with non-union men. The regulars were boarding the cars and beating the new drivers. The principal streets were crowded with people, and the police—inefficient as in most cities, and by the way, this is about the only thing New Orleans has in common with other cities—are trying to protect non-union drivers. From the present outlook, there must be some trouble, as the car companies are holding out with a determination of employing other drivers. While this strike keeps up there is walking for the people. Its effect on the attendance at the Exposition is perceptible.

I have had the pleasure of meeting some North Carolinians who for years have been residing in the Southwest. Notably among them was Capt. Coite, whom our citizens know as the son-in-law of Dr. J. J. Sumner. Rev. Albert Coite, well known in Salisbury when a school boy, and brother of Capt. Coite, also called. Among the ladies was Mrs. Harry Love. She is the wife of the gay, jolly Harry, so well known and liked by the older set of young men in Salisbury. It is quite a pleasure to have these people make themselves known, and your correspondent enjoys meeting them very much. More anon.

**TRIBUTE OF RESPECT.**

Whereas, THE GREAT I AM, in his unfathomable wisdom, hath seen fit to remove by death a much appreciated and highly esteemed fellow citizen—

Resolved, That we sincerely and deeply feel that in the death of DR. MARCELLUS WHITEHEAD, our State has lost one of its most prominent citizens—a Physician of rare culture and scientific knowledge, and a man beloved and respected by all. His family have lost an affectionate and loving husband and father, and our town one of its most gifted, highest cultured and most worthy members of society; whose pleasant smile and cheerful voice so often brought hope to the despondent, and whose place will not be easily filled.

Resolved, That we bear witness to his unselfish devotion to his profession. His carriage was seen as often at the entrance of the humble cottage of the poor as at the mansion of the rich.

Resolved, That we tender to his bereaved family our heart-felt sympathies, and humbly ask that he who promised to be "a father to the fatherless, and the widow's God" may sustain, comfort, and watch over them.

Resolved, That these resolutions be spread upon the Minutes of the Commissioners of the town of Salisbury, and that a page of the same be set apart as a memorial to his worth; and that his name, birth, and death, and age, be inscribed thereon; and that copies of these resolutions be furnished to the faculty of our late town and college, and to the newspapers of the town for publication.

**Make Destruction by Earthquakes.**

MADRID, JAN. 7.—A church and convent and fifty houses were destroyed at Motric by earthquake shocks Monday evening. There was a great procession at Granada today. One thousand two hundred people, headed by priests bearing the image of the Virgin, marched through the streets chanting and praying for deliverance from further earthquakes.

**SCROFULA CURED.**

ATLANTA, GA., AUGUST, 1883.  
 My six year old son has had a terrible sloughing Scrofulous Ulcer of the neck for three years, attended with blindness, loss of hair, great emaciation, and general prostration. Physicians and various blood remedies were resorted to without benefit. The N. S. Medical College treated him for three months, but his condition grew worse.

I was urged to try the efficacy of B. B. B. and to the astonishment of myself friends and neighbors, one single bottle effected an entire cure. Ulcers of the neck entirely healed; eyesight restored, and the hair commenced growing on his head again. I live at 345 Jones Street, and my boy is there to be seen.  
 FRANK JOSEPH.

**A Case Without Hope.**

Jan. R. Booker, of Macon, Ga., writes: "In 1876, I was attacked by the most ravaging sore, the most cancerous sore, that ate great holes into my flesh and spread rapidly over my body. I received the very best medical attention; was dosed with mercury and potash until I was so crippled with mercurial rheumatism so that I could scarcely hobble about; my throat and mouth were badly ulcerated; my hair began to fall out. So wretched was my general health, that I became a physical ruin and my life was a burden. For a long time I was bed-ridden, and my suffering was intense that I craved for death as a relief. I exhausted the whole catalogue of patent medicines, in each case following the directions religiously. Each in turn seemed to aggravate the malady, and none of them benefited me in any way. When life was apparently hopeless I commenced taking S. S. S. To this specific I owe my life. In ten days I commenced improving, and in a short time was well. My hair has grown out thick; my health and strength have returned; the ulcers in my throat and mouth are entirely cured; my appetite has returned, and for the first time in years I enjoy my food. Every sore has disappeared from my body. I weigh as much as I ever did in my life, and am perfectly healthy in every way. The germs of the cancerous affliction are destroyed. Not only is the terrible malady that was preying on my life, entirely cured, but I am also relieved of the bad effects of the mercury and potash mixtures that I was fed on for years."

Beware of Potash and Mercury mixtures, gotten up to imitate our specific, they are dangerous.

Whether riding, driving or walking, always turn to the right on meeting another in the way.

**ROYAL BAKING POWDER**  
 Absolutely Pure.

This powder never varies. A marvel of purity, strength, and wholesomeness. More economical than the ordinary kind, and cannot be sold in competition with the multitude of low test, short weight, alum or phosphate powders. Sold only in cans. ROYAL BAKING POWDER CO., 109 Wall St. N. Y.

**WASHED OUT HAIR**—There is a sort of pallid, chalky complexion which the novelist call a "washed out complexion." It is ghastly enough, and no mistake. Washed out, faded, discolored, or part colored hair is almost as repulsive and melancholy. Parker's Hair Balsam will restore your hair to its original color, whatever it was: brown, auburn or black. Why wear moss on your head, when you may easily have lively, shining hair.

**TWO DANGEROUS SEASONS.**

Spring and fall are times when so many people get sick. The changes in the weather are severe on feeble persons, and even those naturally strong are apt, as they say, "to be feeling miserable." Then they are just in condition to be struck down with some kind of fever. A bottle or two of Parker's Tonic will invigorate the digestion, put the liver, kidneys and blood in perfect order, and prevent more serious attacks. Why suffer, and perhaps die, when so simple a medicine will cure you? Good for both sexes and all ages.
