however, it will be seen that this objec-

water for themselves; and with due re-

gard to risks, insurance, etc., frequently, as

a preliminary step, invite the attention of

insurance companies to what they pro-

pose to do, and ask of them suggestions

as to the necessary means of obtaining

insurance at minimum rates. It is not an

expensive addition to any large establish-

ment to have a water tank put into their

building to be supplied from the water

source employed to feed their steam boil-

ers, and if suitably arranged, it is far

more efficient than any outside depen-

dence could possibly be. With hose at-

tachments to a tank in the upper story,

buildings so provided can be flooded with

water in a few minutes. In this view of

the case, whilst it might be desirable to

have such additional facilities for com-

bating tire as might be supplied from city

water works, it certainly cannot be re-

garded as of sufficient importance to out-

weigh other advantages attaching to this

locality as inducements to those who

propose to erect manufacturing establish-

ments. We have railroads running ont

of the great mineral belt, which, starting

in Virginia, extends into Northern Geor-

mate, soil and resources for almost any

enterprise, and but little if anything can

reside in thinly settled portions. This

We have just receved from our old friend and fellow townsman, Dr. Ashbel Smith, a "Report of the Regents of the University" of Texas. A cursory glance at this pamphlet shows that Dr. Smith is Chairman of the Board of Regents; that the University is located at Austin, and is in its second year; that it employs fourteen Professors and Instructors; that above 200 students are in attendance, some of them young ladies; and that the co-education of the sexes is a feature. Altogether the Report is flattering to so usual reports are heard from them. Very

young an institution. The world moves, and Texas the Empire State of the Union-thirty-five times spring. as large as Massachusetts-goes with it. May her University add yet more to the radiant glory of the Lone Star.

A BRIGHT DAY,-By common consent Saturday has become specially observed in this county as a trading day. It has: been becoming more and more so apparently of late, so that on that day a large crowd is now almost confidently expected in town. Last Saturday, under a mild, spring-like temperature and a bright sun, the streets were thronged with people on errands of business and pleasure. It was difficult in places to pass on the sidewalks without jostling others or being jostled. Every store was crowded with people, buying talking, and selling. Farm products, it is true, are generally very cheap, but so also are almost every description of merchandise; so that after all, farmers get quite as much in goods now as when their products brought higher prices. Now and then it may happen that disproportions are more marked; but as a general thing trade equalizes itbut not yearly so much so to those who ound of complaint on any side.

Third Creek Items.

Perhaps an item or two from this place may interest some of the readers of your paper, who like to know what's going on around them. Our place is slowly imway. We have but one vacant house, and it isn't haunted.

Our Academy is in successful operation with a good teacher at its head, and by subscription we are going to make it a first-class institution. There is room for a few more scholars, and good, cheap board had if early application is made.

Farmers haven't room to boast of wheat out a dozen-perhaps more-in town claims that he can by the use of it, point the seed. This is especially the case in might last week. What is to be done out within a few inches the spot of earth red lands; and those who can are plough

My neighbors, I think, will sow a great deal of clover this spring. As an experiment, the writer has sown three wagon - all without breaking the surface with bodytuls of clover-seed, hulls and allspade or pick. If this be true, the intramped as fine as possible by horses, and then sown broadcast over fourteen acres. If successful in obtaining a good crop, I shall report. 3RD CREEK.

MINING DEPARTMENT.

R. M. BAMES, JR., M. MANAGERS.

The Russell mine in Montgovery county, that has recently been purchased by an English company, is at present a scene of activity. They are mining ore and getting the 30 stamp mill in readiness to work by the summer.

At the Coltrain mine near Ashboro, in Randolph county, they have struck a vein 35 foot in width, and have erected a 5 stamp mill for working it.

At the Crowell mine in Stanly county they have out about 150 tons of ore and will begin to mill it in a short time.

Mining in the State is very dull a present. The regular producers have settled down to steady work and no unfew new enterprises are on hand athough it is said there will be some in the boys of this period; for, as a matter of Litaker to Miss Emma R. Brown.

Protection of Plant Beds and the Lately Issued "patent.

From the Western Tobacco Journal.

In speaking to a number of planters the past week in reference to the use cloth for covering Tobacco plant beds, every one of them declared they had used this material for half a dozen years or down at the table without striking it friends to mourn over their sad bereavemore for protecting their young plants and jarring the dishes, as well as the ment. from the ever varying weather incident to early spring, and from the pestiferous not cross a room without stumbling over insects that have often depleted plant or against some piece of furniture, or beds and compelled their preparation the close a door without slamming it. In the lot but what emphatically declared a boys are intolerable; but I hope to see, Wheat, 75@80; Flour per sack, \$1.75@ Lugs, good to fine, determination to resist the payment of a not many years hence, a big reforma- \$1.90; Western bulk meats, 8@10; Lard, Lugs, fine to fancy, royalty, if any one attempted to collect, but few of them thought the matter serious enough to cause any agitation as to the possibility of the "patent" being

One gentleman in particular, Mr. J. B. Cobb, of Lusby's Mill's, Owen county, the morning (ditto for myself,) Ky., was quite amused as to the claims self so nearly as to leave little or no of the "patentee," and guaranteed that he or his agents would get all the royalty they wished, and more, too, if they vontured in his section, but of a kind that is not usually sought after by money-mak- readers the essence of what "my lady' ing people. Mr. Cobb informed us that learned of the "manners and customs" fully ten years ago he canvassed his To- of the aristocrats of Vienna, while soproving. Three new buildings were built bacco plant beds for the first time, and journing in that Austrian city. this winter, and two others are on the as he does not claim the origination of the idea, it is probable that it was in use considered hightoned or properly eduprevious to that time.

Now, as Mr. Garrard, to whom the patent" was grated, has not originated the idea, or can not claim any transfer of rights from the gentleman or gentlemen who first put the idea into practical and oats prospects. Judging from pres- use, as relating to Tobacco plant beds, ent appearances some fields won't make and as this custom has prevailed more the matter is brought to the attention of royalty. There should be no quibbling in this matter, but every planter that desires to grow Tobacco, and afford protection to his young plants, should use cloth to cover his plant beds, if he thinks it is an effective means-which we think has been demonstrated conclusively in any claims of royalty. If the "patentee" him attempt it, and let the planters com- der? bine to prove the fallacy of his claim and the worthlessness of his "patent." We think this is an easy matter.

Wrappers, fancy,-none offered. New tobacco breaks for the past week have been light. Prices stiff for all grades. Good, rich, waxy fillers, smooth cutters and lug smokers are in great demand and prices a shade stiffer than the quotation. . Wrap-Tobacco, sales every day and prices pers of all classes are high and cagerig sought after. Planters would do well by putting some of their good tobaccos on the market at this time.

> TWO DANGEROUS SEASONS. -Spring and fall are times when so many people get sick The changes in the veather are severe on feeble persons, and even those naturally strong are apt, as they say, "to be feeling miserable." Then they are just in condition to be struck down with some kind of fever. A bottle or two perfect order, and prevent more serious attacks. Why suffer, and perhaps, die, when so simple a medicine will cure you? Good for both sexes and all ages.
