Beset on all Sides.

Bymalaria, how shall we escape the dread infection? is the question which the denizens of fever and ague districts ask themselves. The answer comes from former sufferers who for years have escaped the visitations of the periodic scourge, through the protecting influence of Hostetter's Stomach Bitters. When the necessity for using preventive measures arises, use this means of prevention at once. It regulates the liver, facilitates digestion, and liberates impurities from the system, when such exist, by promoting healthful action of the bowels and kidneys. Act early. In all regions where miasmatic vapors breed disease, it is absolutely necessary to be provided with a safe-guard, and this is true, though a sojourn in such localities is destined to be brief. No one can afford to breathe malaria for a short time. The Bitters is a sovereign specific for rheumatism, debility and nervousness.
