

PERSONS writing for information on matters advertised in this paper will please say "advertised in the Watchman."

Subscription Rates

The subscription rates of the Carolina Watchman are as follows: 1 year, paid in advance, \$1.50...

The season of lent begins on the 10th inst. Read the new advertisements in this paper.

Tobacco breaks at Hanks' Warehouse this morning. Dealers in fertilizers are zealously pushing their respective brands.

The First National Bank here declared a semi-annual dividend of four per cent. on the 1st inst.

Mr. Jas. D. Heilig is now with M. S. Brown, and will be glad to have his friends call.

J. M. Brown has moved into the brick residence on the corner of Fulton avenue and Fisher street.

"Sweet Consistency"—opposing internal revenue and favoring the Blair grab bill—"thou art truly a jewel!"

The various roads leading into town are said to be in a better condition than is usual at this season of the year.

A tobacco factory, or a factory of any kind is not completed in these days of progress until it is tastefully painted.

The Choral Union will give a public rehearsal to invited friends, at the residence of Dr. Rumble on Tuesday evening, the 9th proximo.

Sunday forenoon beautiful snow flakes fell for several hours, but the sun kept peeping from behind the clouds and drove them away.

Messrs. F. Davidson & Co., of Petersburg, Va., are opening a new Grocery and Provision Store in Bean's building, Main street, nearly opposite Opera Hall.

The lovers of the Scotch bag-pipe had the pleasure of drinking the strains of the "highland fling" and some other airs on Wednesday. A strolling "minstrel" was hugging the leather bag.

During the heavy rains enjoyed (?) here a few weeks ago, the well at the brick livery stable caved in, filling nearly to the top. Mr. E. K. James is having it repaired and says it is about equal to digging a new well.

In view of the fact that more building is to be done this summer than was ever known here in one year, a modern brick machine set up on one of the yards near town, would be an investment that would pay handsomely.

The residence of James Johnson, Esq., near Farmington, in Davie county, was burned last week. But little of the furniture saved. No insurance. Mr. James Johnson is the father of Mr. Eugene Johnson, a resident of this town.

Mr. Greene a tobaccoist, from Yadkin College, has signified his intention to work tobacco here this year, provided he can secure a suitable building for a factory. Steps are being taken to build him just what is desired in a convenient place.

Mr. J. A. Kennedy has a trained cat. At the word of command: "ready, aim, fire," it falls as though it were killed, and lies motionless on the floor. Then at command it will turn and roll on the floor, &c. He is looking for somebody with a cat to beat his at tricks.

Dr. Armstrong, of Salem, Va., spent several days here last week, the guest of Mr. Paul Heilig. It is understood that he desires a more southern situation, and one of his objects in this direction was to find a new home. He is said to be a good physician and a gentleman of high standing. Hope he was pleased with our town and will return.

Several communications have been sent to the WATCHMAN without the writer's name. They are no good. Others have been received which deal in personalities not suitable for publication, nor of general interest to any class of readers. When you write tell of something that your neighbors will be interested in learning.

Mr. J. Allen Brown, the "boss" insurance agent, has just paid in full the losses on the Salisbury Woolen Mill, recently burned. He is to settle soon the losses on the machinery, etc., which was embraced in another policy. The payment was made promptly, and the company did not claim the usual sixty days. The risk was carried by the Virginia Fire and Marine Insurance Co.

He says the losses on the Stewart residence will be paid soon. The delay is not the fault of the company.

It has been suggested that the factories to be built, being located near the thickly settled part of town, and only one and a half squares from the public square, should be covered with metal roofs. A shingled surface as large as they will be, could not, after becoming thoroughly dry, be expected to escape a fire should one occur in the vicinity. But build the factories! though they be covered with clap-boards undressed, and kept in place in the old time way, by placing a log across to weight them down. Better accommodations in the way of houses will come as the business increases. Ten years hence there will not be a wooden tobacco factory or warehouse in Salisbury.

The Boston Star Concert Company, may stop here on their way north, and give a concert under the auspices of the Choral Union. Should they conclude to do so the WATCHMAN will have something to say in their favor.

There were several Lutheran divines here on Monday, attending a meeting held in the new church of that denomination. Their church edifice does them great credit, and should make the congregation feel more like praising God for his bounties than ever before. The matters touched only included questions of discipline in the church. A false rumor is afloat to the effect that charges were preferred against the pastor, such is not the case.

Hix Crowell belonged to Capt. John A. Ramsay's battery of artillery during the war, and he was an expert gunner. To plant a ball on a given point a mile distant the first shot was no uncommon thing for him to do. He never failed with the second shot. In the latter part of the "trouble" he used an improved gun—caught from the other side you know. He now makes a first class boot or shoe, or will prospect a gold field, having been a practical miner.

Escaped Convict Seen.—One of the WATCHMAN's correspondents says: "I would state to you that there was a white man seen by some negro children, near Elmwood, Iredell county, with ball and chain on him, supposed to be some escaped convict." Search was afterwards made, but the man could not be found. Keep a lookout for him.

Public Roads.—This is not the season for making public roads good; but it is the season when good roads are needed. Now is the time for farmers to put in their time selling their produce and doing their marketing. But there is not a road leading to Salisbury good enough condition for taking on half a load of produce. One horse on a good macadamized road could draw a heavier load than the best two horses in the county can through mud and deep ruts.

New Tobacco Factory.—It turns out that there was a hitch in the factory business as reported last week, and Messrs. Martin and Ford about to abandon their project of establishing a factory here. Capt. T. B. Beall, who has ever been a leading spirit in the tobacco trade here, learning the facts, put his shoulder to the wheel, and succeeded in organizing a joint stock company for the purpose of building a 2-story factory building. The site chosen is on the old Long property, recently purchased by Swink & Thomason, and will front on Council street. The joint stock company is composed of the very best and most influential business men of Salisbury, and they deserve the thanks of the town for their enterprise in going into an outside scheme purely for the purpose of helping the town. Capt. Beall deserves especial thanks for his untiring efforts in this direction.

County Affairs.—The County Commissioners met as usual, the first Monday in the month. The usual allowances were made to the poor, amounting to some \$35. Adam Brown, keeper of the poor reported 24 paupers for the month of February, 10 whites and 14 negroes. He produced an itemized statement of expenses amounting to \$18.15.

Chairman Sumner was ordered to inspect the new house built at the poor house and if found to come up to all the items of the contract, to accept it and order balance due for its construction to be paid.

No plank for use on bridges over small branches, ditches, etc., is to be paid for in the future unless ordered by a member of the board.

A committee was appointed to contract for the painting of the court house roof. Two coats are to be put on.

The supervisors of China Grove township were directed to appoint an overseer for, and to have a new road cut out, leading from Alex. Deal's in Atwell township to Beattie's ford road, near China Grove. A number of accounts were presented, approved and ordered to be paid, most of which were costs in State cases of the last court.

The affairs of the county are in good condition.

Plant Trees.—Now is the time to do this kind of work if not already done. People often think—well, next year I will set out fruit or shade trees, currents, raspberries, grape vines, or something of the kind; but the proper season for doing it slips by before they are aware of it, and the work is deferred to the next year. This is designed as a reminder to any who may have had such good purpose. The time is at hand. Do you want fine fruit trees? Wm. B. Fraley can supply some very choice peaches, and other trees also, we think. Do you want some choice grapes? Wm. Murdoch can supply them. And you can buy from these gentlemen at low prices.

This paragraph is for the public good, not to benefit, especially, either Mr. Fraley or Mr. Murdoch, neither of whom know of it unless they happen to see it in this paper.

Now is also a good time to start a walnut nursery, if you have the nuts at hand. Plow the ground deep and drop the nuts in rows. They do not require to be covered with soil. All you need do is to walk over them and press them down into the soft plowed ground. Like the acorn they will send down their tap root and throw out the leaf stock very nearly together; and in rich ground make considerable growth the first year. Under favorable circumstances the walnut will attain the dimensions of 18 or 20 inches

diameter in 25 or 30 years. A farmer having spare lands might thus provide at trifling cost, a rich inheritance for his children; for the price of walnut lumber is steadily on the rise because of its growing scarcity.

Let every man or woman owning a piece of land plant a tree, vine or flower—something to care for and look after during the pleasant days of spring and summer. Time thus spent will amply repay in moral influence, though you may never taste the fruit or inhale the fragrance of the flowers.

Eagle, The Mail Robber Caught.

The readers of the WATCHMAN remember the story of young Eagle's many "hair breadths" escapes from the hands of the law. He has again been caught, and this time with small hopes of escape. The following from the Charlotte Observer tells the tale:

Special agent Troy, of the United States Postal Department, alighted from the Air Line train, upon its arrival in this city last night, with a youthful looking prisoner in handcuffs. The prisoner proved to be the lad Eagle, who robbed the mail between Salisbury and Albemarle, last summer. Eagle, it will be remembered, fled to the West, and was arrested, but while being brought back home, escaped from the cars. Special agent Troy captured him at Okolona, Mississippi.

Eagle was placed in the jail here last night, where he will remain until the July term of the Federal court, when he will be tried before Judge Dick, while being brought back home, escaped from the cars. Special agent Troy captured him at Okolona, Mississippi.

An Engineer's Heart.—Dr. Rumble, in illustrating a subject in his sermon on last Sunday morning told a touching story of how an engineer's heart probably saved his life. The incident occurred on the Western North Carolina road. The engineer was bringing a train down the mountains when some distance ahead he saw a lamb on the track and its mother trying to get it off. But the lamb would not. The distress of the mother became apparent as the train neared the spot and she did all she could to get the lamb off the track, but it would not leave the track.

The heart of the engineer was touched and he stopped his train and sent the fireman forward to remove the lamb. It was a kind act and showed a tender, gentle nature in the man of iron nerve. But just as he had started on his journey down the mountain and before he had gotten under way the engine slowly turned a curve and revealed a little distance ahead, obstructions on the track which would have hurled the engine and train many feet in a dreadful gorge below. It was an easy matter to stop the train now, but had he not paused to save a helpless lamb tottering on the track, his own and other lives might have been lost in the frightful wreck which would have followed the precipitation of the train to the bottom of that deep ravine. The incident illustrated the simple means God uses to protect his people.

Building and Loan.—The stockholders of the Building and Loan Association met according to appointment on last Thursday night, over Klutz's drug store. The only business to be transacted was the election of ten directors. The election was harmonious and resulted in the following gentlemen being chosen: Wm. Smithdale, J. D. Gaskill, W. L. Klutz, Alex. Parker, J. Allen Brown, D. A. Atwell, P. P. Meroney, R. Eames, E. B. Neave and J. J. Bruner. Theo. F. Klutz, president, and B. H. Marsh, vice-president, are also members of the board of directors.

The directors met on Friday evening and ordered the Secretary, Rev. F. J. Murdoch, to have the Association incorporated under the laws of the State, which was done, under the name and title of "The Perpetual Building and Loan Association of Salisbury, N. C."

The regular place for the meeting of directors will be at Mr. J. Allen Brown's office, which has been generously tendered for this purpose. The next meeting of directors will be on Friday afternoon at 4 p. m.

The regular place for taking weekly collections will be in the counting room of Klutz's drug store, which room has also been tendered the Association, rent free. The first payments are to be made on Saturday the 6th of March. The hours selected by the Secretary are from 4 to 6 p. m. and (after tea) from 7 to 8 p. m. This is to be the regular order every week.

So the Association is under head way. The WATCHMAN flings an old shoe, and leaves it to build up the waste places of the town.

Florida Lots.—Lots of our citizens are into the Florida lot trap. It was a cunningly devised trap, baited with orange groves and cheap, pleasant winter homes. It was a case of ask no questions. No one seemed to care to know anything more than the urban agent freely told. One man who says his wife had the fever in its worst form states his case so: I saw his advertisement in the New York World and I wrote him stating that I had clipped his advertisement and enclosed he would find stamps for his book. In a few days I went down to the post office and there was a whole mail full of books, plats of lands and maps. I took 'em home and me and the old woman studied the thing out. The map was all marked up with green spots; they were sold you know. The old woman's fever got hotter. Then the man pressed me. He said by the 1st of Feb., and after that date, land would go up to \$20 a lot instead of the present price of \$10 a lot. The old woman was terribly excited about it and she insisted on going right ahead and buy-

the lot. The man said if I would select a lot number and if it is taken up when your letter gets here I will reserve you the one nearest to it. The lots are going off like hot cakes in the North. So I left home with the understanding that I was to get a lot that very day. But when I got up town I run across the "Florida fraud." This made me slow up. I did not bite. Think I, I'll lay low to the old woman, and see what she will do. I folded up the "Florida fraud" paper and stuck it in my coat. When I went home that night the old woman said she had got her arrangements for startin' pretty well under way. She had sold the cubbard to Mrs. —, and had got a basque done all except the buttons. Says I: what are you going to do with that basque? says she: I'm going to wear it to Florida, and there's lots of things here we can sell to the neighbors, and—old woman, says I, let lemme read you a few pints. I read the "Florida fraud" to her plain and distinct and when I got through she jus thewed the awfullest sigh and said disappointed-like: "I reckon we wont go, old man." I told her we would not. She was "hope up" in one respect when I told her Mrs. —, had bought the lot next the prospect, Presbyterian church. Then she kinder revived and said she could get the buttons for the basque any other time—twant no hurry no way. Then I asked her if there was any hurry about the cubbard, and she—but you know about how it must have been. Cubbards are now never mentioned in the house for reasons best known to the family.

Kansas.—It may astonish readers in this section to learn that the comparatively new State of Kansas produces more wheat and corn than the State of Missouri; more than the famed grain growing State of Illinois; more than Iowa, Minnesota, Nebraska, and more even than the great State of Texas. The total value of farm products, in Kansas in 1884, is officially given at \$160,907,636.

Suicides.—Willie D. Gifford, a young man, 26 years of age, suicided in Charlotte on the 28th of February. He was a clerk in the grocery store of A. R. & W. B. Nisbet. No cause is assigned for the self-destruction, outside of a vague rumor of an affected mind, produced by a fall gotten several years since. Another suicide is reported from Guilford county. Mr. Berry Kimry, an old man suicided by shooting himself with a rifle. No reason is assigned in his case. It seems like Judas Iscariot is to have lots of company.

LIST OF LETTERS.—List of letters remaining in post office at Salisbury, N. C. for the week ending Feb. 27th, 1886.

Laura E. Barger, Sallie Lockeol, Mary J. Basinger, Lizzie Miller, W. M. Bostick, Rev. Thos. Sumner, R. W. Culbertson, Mary Shuener, J. C. Earnheart, Jennie Sanders, Miss N. J. Edwards, E. T. Wyatt, B. L. Gillis, Barry G. Wilson, Judy Graham.

Please say advertised when the above letters are called for.

A. H. BOYDEN, P. M.

General Agents Notes.—Preaching at St. Mary's church next Sunday afternoon, at 3 o'clock.

Col. T. J. Sumner, of Locke, has the finest field of wheat yet seen in the county.

Sam'l Sloan, of Thyatira, one of our most prominent citizens, died Saturday morning last of blood poison from Bright's disease.

A second batch of notes arrived, but too late for this paper.

Heilig's Mills Letter.—Editor Watchman.—Plowing, garden-making and sowing oats has been occupying the time of the farmers for the last week. Wheat and oats seems to have a bad stand, caused by the hard freeze last winter.

J. A. Smith's engine house was destroyed by fire last Monday. It caught fire while all were absent from the place, and when discovered, the roof was falling in. The gin house narrowly escaped destruction.

Jerry Powless killed an 18 pound wild turkey last week.

Mr. Dan'l Barger is in a very critical condition, suffering with several large carbuncles.

Nimrod Barber, who moved to Concord some time since has returned to his old home.

There was a social dance at George Fisher's last Tuesday night. Your correspondent cannot give the particulars.

A FARMER.

Lee Monument.—It's to be hoped that the proposed monument to be erected at Richmond, Va., to the immortal and peerless Robert Edward Lee will be worthy of his fame and character. The whole South ought to have a hand in that pile. What true Southern would not be glad to give something to erect a monument to Lee—Wilmington Star.

A Refined Objection.—An unusually refined objection to the Blair bill is the following, which we find in a valued exchange. We publish it as one of the links in the chain of reasoning whereby the arguments of the friends of the bill are expected to be confuted: "If two States get each, say, the same large slice on the first year, and if one State squanders the money and teaches nobody, and the other State really does encourage education and begins the good work of instruction, then, at the second distribution, the State which has begun the good work will get less money to carry it on with, while the State which has gone backward will get even more than at first. This is simply paying a premium for delay, malfeasance, and neglect of work. The less got for the money, the more money to be got for that."—Enquirer & Express.

MINING DEPARTMENT.

T. K. BRUNER, EDITOR.

Mr. Robert Shell, of Caldwell county reports the discovery of a rich mica mine, near Glenburnie, P. O. in that county.

Winningham Mine.—In Randolph county, owned by Messrs. Horne & Bartrun, has seen many changes for the better since they took hold. They started their new ten stamp mill under the most favorable circumstances. The mine is said to be a perfect one in every respect. They patronized a North Carolina manufacturer—their mill being made by Mr. John Wilkes of Charlotte.

The Uwharris Mine.—also of Randolph county, is being worked, and some ore has been shipped north recently, for what purpose is not stated, but it is said to be a fine mine. They are now making arrangements to put up all the necessary machinery for a first class mine, and it is to be put into practical operation at once.

Specimens for Nat. Museum.—Mr. J. J. Newman, of the Dutch Creek Mines, who never fails to respond when he can do anything for the good of the State, has sent to the WATCHMAN office 30 specimens of standard ores, from many localities. This is an important work, and as it only costs the trouble of bringing the specimens to town, it is hoped that others who would like to forward their ores to be shown in the National Museum at Washington will now bring them along, they will be forwarded free of charge. Remember that there is comparatively nothing from this State in the National Collection.

Shuford Gold Mine.—The Shuford Gold Mine, in Catawba county, is likely to become active again. Superintendent Myser has just returned from a trip North and has gone to the mine. His first work will be the shipping of the old hydraulic machinery formerly used back North, where it was sold for a fair price. He will then confine prospecting for veins. The property was worked for a long time with profit as a placer, but the pond has filled up from the settlements of the often used water of the old hydraulic machinery. The inclinations point to veins rich in precious metal, and it is for these that search is to be made. The hill has been much worked in a petty way—"gophered," the miners call it—for a long time. The small pits were made in following rich seams of quartz. These holes or shafts are from 3 to 40 feet in depth, but are not protected by the usual timbering. Mr. Myser is also interested in a valuable property adjoining Hoover Hill, in Randolph county, which will probably be opened this spring or summer.

The Steele Mine.—in Montgomery county, recently purchased by some gentlemen from New York, has, under the influence of their money and energy undergone many changes for the better. A stamp mill is in course of erection, and it is expected that by the first of April it will be active. The mine is to be thoroughly equipped with improved and necessary hoisting machinery, as well as appliances for treating the ore.

Few mines have produced richer ore than the Steele. Ores worth as much as \$2,500 to the ton has been taken from the mine. At one time there was a "seam" or "streak" in the lode which carried free gold nearly one-fourth of an inch thick. This was about the time the property was worked by Ex-State Treasurer, Jonathan Worth. The ore is of a complex character, and embraces free gold, galenite and the sulphides of copper and iron. The mine has not been worked to any great depth, and it is confidently expected that very rich ore will be found below the old workings.

Coggins or Appalachian Mine, already mentioned in these columns, is one of the properties from which much is expected. It is in the hands of practical Englishmen who are determined to get all there is to be gotten by the most approved methods. The property, from present indications, will astonish the mining world with its output, and tend to enhance interest in mining in this section. The ore body is immense. It is traceable for more than 2000 feet and is from 7 to 15 feet in width. The ore is a talco-argillaceous slate and quartz, the latter predominating, encaused in the Huronian slates common to the district. Tests on both stamps and chilian mills show a high average, reaching sometimes, \$25 to \$28 to the ton. The deepest shaft is but 70 feet, and neither of the other two exceed 50 feet in depth, but all show the same quality and quantity of ore. With even these shallow shafts, the amount of ore in sight is very large, and were it only worth from five to eight dollars to the ton it would be a veritable bonanza. Prospectors have discovered two other veins of great richness parallel to the main lode, one carrying free gold visible to the natural eye.

Improved hoisting works have been erected, and also, some dwellings for miners, smithing shops, &c. The main or 70 foot shaft, is being sunk, and when sufficient depth has been attained levels will be run in two directions for the purpose of demonstrating the strength and continuity of the lode at such depth. The company have provided for the erection of a 40 stamp mill. This is hardly adequate for the amount of ore to be worked. 250 stamps would come nearer filling the bill. Part of the above information is from the Montgomery Vidette.

J. ROWAN DAVIS of Blackmer has received his splendid stock of Hardware consisting of everything useful on a farm from a Plow Point Bolt, up. Why run to town in the mud but deep when you can get first class goods at town prices for cash or barter at Davises? Highest market prices paid for Produce, at all times, at Davises. 18-4t

WASHINGTON LETTER.

(From Our Regular Correspondent.)

WASHINGTON, March 15, 1886. Congress is detaching itself to politics now instead of business. The discussion between the Senate and the Administration, forced by the Republican caucus resolutions on official papers, beams to-day. An exciting debate is expected, and the Senate galleries will be crowded so long as the fight lasts.

When the discussion is fairly under way, Senator Morgan will complicate matters by calling up his own independent resolutions to the effect that the whole proceeding is out of order. The Edmund's resolutions should not have been received. The only legal procedure for the Judiciary Committee was to have summoned Attorney General Garland before the bar of the Senate, and to have impeached this alleged violator of law, who refused to give up his private papers.

A number of Republican Senators do not follow Mr. Edmund's lead in this matter with much zeal. It is pretty well understood that the Vermont statesmen made this "much ado about nothing" because there was not much to do about anything and he was under the necessity of impressing the Vermont Republicans with his greatness and indispensability. The Vermont legislature, which elects a U. S. Senator to fill the seat now occupied by this would be chieftain, is to be chosen next fall. Until then Mr. Edmunds may be expected to be as offensively prominent in the Senate as possible. He wants to stay in Washington, where he has just built a superb residence, and he has reason to fear the Green Mountain boys are arranging his retirement to private life when his present term expires.

The House of Representatives, this week, does not offer such attractions to visitors as the Senate. Nothing but silver may be heard from it for some time. The financial debate beginning there regularly to-morrow. Ten days have been set apart for the subject and sixty members have prepared speeches on it. At the close of this discussion the House will refuse to suspend the silver coinage by an overwhelming vote, and that is all that this forth-coming election will accomplish. If all this time and talk could be given to an issue that promised results, it would be well enough, but it is agreed all around that this debate will lead to nothing in the way of legislation and that not a single vote will be changed by the talk.

The telephone affair has taken a party turn in the House. The House and the Senate resolutions of inquiry into the Pan Electric has been met by another set of resolutions under Democratic management, asking for a broader and more thorough investigation, an investigation of newspapers as well as officials.

Congressman Gibson, of West Virginia, opposed the investigation on the ground that there was nothing to investigate in as much as no charge had been made against Attorney General Garland or other officials who are alleged to be implicated. "Why," said he, "what will the committee report will they report that the gentlemen got stock without paying for it who will say that was wrong? I see men all around me who hold railroad stock and national bank stock voting with the stock in their pockets, and no outcry is made against it.

Mr. Gibson also attacked Representative Pulitzer of the N. Y. World, who, he said, instead of making complaint against the Attorney General in an open, manly way like a Representative should have done, had retreated behind the irresponsible columns of his newspaper to create a scandal. Mr. Gibson conceded that the idea was to turn the rascals out but said his special

desire then was to stop the rascals from talking.

Mr. Reed, of Maine, who tries to be witty every day, said something about appreciating the feelings of solemnity that had recently fallen on the Democratic party, and gave its assurances of his respectful consideration in its present situation. The Democrats laughed at this as well as the Republicans, and Mr. Morrison replied that the gentlemen were mistaken in supposing that the Democratic party was in any trouble. "We propose to investigate charges against our own people," said Mr. Morrison, "as well as those against yours, and we trust, if we find them guilty, we will not be found, as the Republicans have been found, attempting to shield them."

Miss Cleveland gave another large luncheon on Saturday afternoon to the wives of fifty Senators and Representatives. She has at last solved a problem which had been unsuccessfully dealt with by each Presidential family since the time of Andrew Johnson. That President accomplished the feat of inviting to dinner each Senator and each Representative and his wife at least once during the two years of each Congress. But since then Congress has grown to be a body of such formidable proportions in numbers that each President has fallen shorter and shorter of getting all around even in two seasons. Miss Cleveland began a series of lunch parties at which she hopes to entertain all the wives of Senators and Representatives while the President will dine only their husbands.

The recently announced discoveries of gold in Honduras may, it is said, rival in importance of California, made in 1849, and those of Australia, which came a little later. They were made by two Americans—two citizens of the United States, we mean to say—and companies have been organized to take up the whole gold territory. The find is in placer mines like those of the early California discoveries and prospectors from this country are hurrying to the new Dorado, which is on or near the little river Guayape. It would be interesting, should the expectations of these latest gold-hunters be realized, to observe how, as gold would depreciate and silver appreciate in value by reason of the increased supply of the former metal, the bondholders of the United States would insist that the honor of the country was bound up in the payment of the bonds in silver. Wouldn't it?—News and Observer.

Every reader of the WATCHMAN can have DIXIE, the elegantly printed and illustrated Southern magazine, for the balance of this year—ten months—for \$1.00, but to secure it you must send your name, post office, county and state, plainly written, with money, on or before April 1, 1886, and you must mention this paper when you write. Address, "DIXIE," Atlanta, Ga.

SALISBURY MARKET

Corn, (not much offering, 50 to 55  
Meal, wanted, 50 to 55  
Cotton, 8 9  
Chickens, in demand, 15 to 25  
Butter, 15 to 20  
Eggs, freely at 10 to 10  
Flour, common family, \$2.00 to 2.75  
extra fine, 3.00 to 3.10  
Hay, good, 40 to 50  
Lard, country made, 9 to 10  
Oats, 45 to 50  
Pork, 6 00 to 6.50  
Potatoes, Irish, 75 to 90

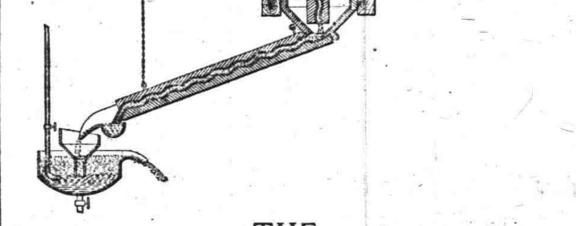

JOHNSON'S ANODYNE LINIMENT

FOR INTERNAL AND EXTERNAL USE.

PARSONS' MAKE NEW, RICH BLOOD PILLS

MAKE HENS LAY

HOW TO SAVE GOLD

THE TRIPLER ALGAMATOR

This machine is a combination of silver plates so as to represent a large amalgamating surface, working with rapidity and efficiency, which has not hitherto been accomplished. The drawing above represents the machine in working position. It consists of four corrugated plates fitted together, allowing a space between of 1/4 inch. Two plates are perpendicular, connecting with two horizontally inclined. The pulp passes from the battery and falls perpendicularly through the plates, which give it a zigzag motion, causing the free gold to impinge on each side, when it passes through the horizontally-lined plates, which act as riffles, catching any escaped gold both on top and bottom. The plates discharge in a circular pan at the end which is given a rotary motion, thus concentrating the heavier portion of the tailings for subsequent treatment if necessary. At the top of the machine is a mercury cup which feeds automatically any required mercury to keep the plates in active force.

This machine is especially adapted for placer mines. It can be worked with or without water; it requires no mill for pulverization, it only being necessary to sift the sand, which can be done at a trifling cost, so that low grade ore can be worked profitably. This machine has been practically tested and it now on the Herring mine, N. C. It has been given such success as to warrant the belief that it will be of great value to the mining interest of this State.

This machine has an electrical attachment by which the mercury should be reclaimed by the various causes to which it is liable, can be instantly restored to activity. Inspection is invited. Estimates given for the erection of this machine on placer and other mines; also for all other Mining Machinery by A. R. TRIPLER, Hanesville, Iredell Co., N. C. or to THE TRIPLER ALGAMATOR & MANUFACTURING CO. of New York. BENJAMIN LEWIS, Sec'y and Treas., 187 Montague St., Brooklyn, N. Y. 18-4t
