The Eller Mine.

New find in Montgomery.

Mr. J. D. Munn reports to the Troy Vidette, a new find in Montgomery county. The vein, indicating gold and silver, was discovered on his place, in Hollingsworth township, 9 miles southeast of Troy. It is said that both metals are visible in the pannings, the gold predomi- by side: where virtue is esteemed and

The Russell, Coggins and Steele mines in that county are going at full blast and a larger number of hands are being employed.

Haile Mine.

At the Haile mine, in South Carolina, large amount of work is being done. The new system of Blake crushers and rolls recently introduced are working nicely. They were put in on trial and have not yet been received, but from appearances they will be. They have a large force at work, and they mine and mill 200 tons of ore each 24 hours. They have an immense lode, some 60 feet wide. It is low grade, but uniform and pays well with the present intelligent man-

Big Bonanza.

The crime is a double one and hanging 9 miles south of Salisbury. The vein is from 3 to 5 feet wide, and has been opento the building. There were two young been traced for 1200 feet and cut into at short intervals. The ore is brown free milling quartz, and may go into sulphurets below the water level. The gentlemen now interested will come to a decis-Mr. Editor:- The WATCHMAN makes ion within the next 30 days, which, should its regular appearance at the post office the investigations prove satisfactory, will result in opening the mine on a permanent basis.

Shive Mine.

The Shive mine in Cabarrus county, is under the control of Mr. S. C. Miller, of Salisbury. He has had a new shaft sunk it yielded an average of more than \$13 to Last Monday while Jim Castor was two and a half feet wide, and traceable produces stiffness and distortion of the for a mile. The ore is a brown quartz, and is free milling. Mr. Miller is sanreports that there is good-prospect of the mine being worked regularly. This Be eareful with your jackets. Some test run has proven the value of the masize and length of the lode.

Quality and Cost of Fertilizers for the Five Years Past.

We have made some calculations, based upon the analysis of fertilizers-more than sixty brands for each year-made by this Station for the last six years, and the reported prices for fertilizers for the same years.

The average composition of the ammoniated superphosphate with potash (socalled complete fertilizers,) for each year, was as follows:

AMMONIATED SUPERPHOSPHATES WITH

Average in 1880, 1882, 1883, -1884, 1885

Available phosphoric acid, 2.70 2.60 2.33 2.67 2.65 Valuation on the

1885 basis, \$25.42 28.26 26.96 27.28 29.37

In calculating the valuations the same figures have been applied to the average ing "Even so Father, for so it seems good analysis of each year for the purpose of 3. That a copy of these resolutions be forcibly that there has been a gradual, provided they are honest and upright, but steady improvement in the quality of should have a fair chance in the race of comparing them. These figures prove spread upon our minutes; that a copy be but steady improvement in the quality of ent to the family as expressive of our its kind of fertilizer from 1880 to 1885. life, to gather whatever of honors lie in affection and Christian sympathy, and By the same analyses, the average per their path, it is supremely disgusting to also to the "Carolina Watchman" and cent. of available phosphoric acid has in- note the efforts to promote castes which "North Carolina Herald" with request to creased from 7.40 in 1880 to 9.18 in 1885, would put to the blush the natives of Calthe avesage per cent. of potash has incutta. There should be no such thing as creased from 1.80 in 1880 to 2.34 in 1885, a "first American lady." There are too while the per cent. of ammonia remains many noble mothers, wives, sisters, aunts remarkably near one figure, for all the and even cousins and sweethearts, to admit years, except 1883, when ammoniates were of such a toadying discrimination. All unusally scarce. Thus the valuation of highminded, virtuous American ladies the average fetilizer, using the prices for are the "first ladies of the land," and no Last Saturday week old uncle Jim Pat- 1885 for all analyses alike, has, with a few one lady should carry off the palm alone. terson, a venerable colored man who fluctuations, steadily climbed up from -Raleigh Visitor. lived near Freedman, died at the age of \$25.42 per ton in 1880 to \$29.37 per ton in sixty-seven years. At the funeral on 1885. The most remarkable thing is, Sunday, the preacher paid a high tribute that during this period 1880 to 1885, the to the old man's character as a christian, actual cash prices paid by North Carolina saying that he never heard but one thing farmers for these fertilizers has declined been wasted upon Mormon women is against him and that was that upon one from \$40 to \$30 per ton. to account for a gross difference of \$14 York Star.

per ton, for that is what the difference is between 1880 and 1885 on a fertilizer of the same grade. Manufacturers of fer-

tilizers will tell you and tell you correct-ly, that the true explanation is that competition, or something else in the devel-opment of this great industry, has re-duced the price of fertilizers to the farmers from a price which included big profits to a price which now includes a regular analyses and publication of the composition of fertilizers by the fertilizer

to improve them constantly. These figures scarcely need any explanation or comment. They are sufficiently eloquent.—Ag. Bulletin.

control stations has induced their makers

A Tribute to our Home.

Stand by North Carolina. Do what you can to develop her resources, to maintain her honor, restore her prosperty. It is a sweet land in which to dwell and in which

Her's is indeed a goodly heritage—a land of noble men and of pure and lovely women. "The sun as he walks the heavens in his diurnal round" looks down upon no fairer or dearer spot, nor more plessed homes-for here "the glory of his beams is rivalled" the sweet and mel-Go where you may you will find no more delightful home. Seek the world over for a clime more favorable to health, for suns more genial and fructifying, and for nights of more unclouded beauty and splendor and you will seek in vain. "It is a land of corn and wine; it is a land of gold and gems; it is a land of flocks and herds, of orchards and meadows; it is a land of good morals and steady habits," a land where civil liberty is dearly cherished and the laws are obeyed; a land where the school house and church spire stand side honored, old age is reverenced, and the marriage relation is held as sacred; a land of simple manners and frugal habits. where an unpretending but generous hospitality is dispensed and where the people are "not forgetful to entertain strangers. -Wilmington Star.

Interfering with the States.

The advocates of the Blair educational bill vehemently disclaim any desire or purpose to interfere with or control the school system of the several States. They say that the General Government, after appropriating seventy-seven million dollars for schools, desires to follow the money no further than to see to its proper distribution. Yet one of the sections of the bill provides that unless a State raises by taxation as much money as her share under the law, she shall forfeit the difference between the amount of Federal donation and what she appropriates out of her own treasury. The government appropriation may be so high as to make the State taxation under this bill a grievous burden. But the State must raise the money or The Big Bonanza mine, in Rowan coun- forfeit its share of Federal bounty, alty, is just now receiving the attention of a though its people must contribute their lot of moneyed men. The property lies equal proportion to the Federal reven

Another section of this bill forbids the use of any money appropriated by it for ed to a depth of 30 feet. The vein has building school houses. While the erection of more school houses for the enjoyment of this money would be necessary in many States, these States must resort to further taxation to provide the school houses, or else forfeit all right to share in the seventy-seven million dollar appropriation. Still it is pretended that this meas ure does not interfere with the school legislation of the several States. It offers to bribe the States with gifts on the one hand and to coerce and punish them with forfeitures on the other. The whole spirit of the bill is that of a superior toward inferiors and dependents,-Phila, Record

Physicians Have Found out. That a contaminating and foreign element in the blood, developed by indigestion, is the cause of rheumatism. This settles upon the sensitive sub-cutaneous covering of the muscles and ligaments of the joints, causjoints. No fact, which experience has demonstrated in regard to Hostetter's Stomach Bitters, has stronger evidence to support than this, namely, that this medicine of comprehensive uses checks the formidable and atrocious disease, nor is it less positively established that it is preferable to the poisons often used to arrest it, since the medicine contains only salutary ingrethief lifted John Sifford's while he was terial which is abundant as shown by the dients. HOW TO SAVE GOLD

THE TRIPLER AMALGAMATOR

This machine is a combination of silver plates so as to represent a large smallemating surface, working with rapidity and efficacy, which has not hitherto been accomplished. The drawing above represents the machine in working position. It consists other disorders. See that you get the of four corrugated plates fitted together, allowing a space between of 1 inch. Two plates are perpendicular, connecting with two horizontally inclined. The pulp passed from the battery and falls perpendicularly through the plates, which gives it a zigzag motion, causing the free gold to impinge on each side, when it passes through the horozontally inclined plates, which act as riffles, catching any escaped gold both en top and bottom. The plates discharge in a circular pan at the end which is given a rotary motion, thus concentrating the heavier portion of the tailings for subsequent treatment if necessary. At the top of the machine is a mercury cup which feeds automatically any required mercury to keep the plates in active force.

This machine is especially adapted for placer mines. It can be worked with or without water; it requires no mill for pulverization, it only being necessary to sift the sand, which can be done at a triffing cost, so that low grade ore can be worked profitsbly. This machine has been practically tested and is now on the Herring mine, Randolph county, where it met with such success as to warrant the belief that it will be of great value to the mining interest of this State.

This machine has an electrical attachment by which the mercury, should it be sickened by the various causes to which it is liable, can be instantly restored to activity. Inspection is invited. Estimates given for the erection of this machine on places and other mines; also for all other Mining Machinery by the undersigned, A. B. TRIPLER. Hannersville, Randolph County, N. C.,
