#### Allen Water. On the banks of Allen Water,

When the sweet Spring time did fall, Was the miller's lovely daughter Fairest of them all. For his bride a soldier sought her And a winning tongue had he; On the banks of Allen Water

On the banks of Allen Water, When brown Autumn spreads its store, There I saw the miller's daughter, But she smiled no more. For the Summer grief had brought her, An the soldier, false was he, On the banks of Allen Water None so sad as she.

None so gay as she.

On the banks of Allen Water. When the Winter snow fell fast, Still was seen the miller's daughter-Chilling blew the blast. But the miller's lovely daughter Both from cold and care was free: On the banks of Allen Water There a corps lay she.

It is certainly a remarkable thing that the prohibitson leaders ignore the never be entirely effaced, he would fact that the Code contains a local option law which, if taken up and with intelligent zeal, would speedily put an end to the liquor traffic. A similar law did the work in nearly every county in Georgia, and there is RIBBED HOSE FOR CHIL- good reason for believing it would do

it here. The people of North Caralina are as intelligent and virtuous as those of any other State, and on these facts the conclusion is natuaal and just.

TRIPLER AMALGAMATOR! PATENTED. This machine is a combination of silver plates so as to represent a large amalga-

mating surface, working with rapidity and efficacy, which has not hitherto been accomplished. The drawing above represents the machine in working position. It consists of four corrugated plates fitted together, allowing a space between of 1 inch. Two plates are perpendicular, connecting with two horizontally inclined. The pulp passes from the battery and falls perpendicularly through the plates, which gives it a zigzag motion, causing the free gold to impin e on each side, when it passes through the horozontally inclined plates, which act as nifles, catching any escaped gold both on top and bottom. The plates discharge in a circular pan at the end which is given a rotary motion, thus concentrating the heavier portion of the tailings for subsequent treatment if necessary. At the top of the machine is a mercury cup which feeds antomatically any required mercury to keep the plates in active force.

This machine is especially adapted for placer mines. It can be worked with or without water; it requires no mill for pulverization, it only being necessary to sift the sand, which can be done at a triffing cost, so that low grade ore can be worked profitably. This machine has been practically tested and is now on the Herring mine, Randolph county, where it met with such success as to warrant the belief that it will be of geeat value to the mining interest of this State.

This machine has an electrical attachment by which the mercury, should it be sickened by the various causes to which it is liable, can be instantly restored to activity. Inspection is invited. Estimates given for the erection of this machine on placer and other mines; also for all other Mining Machinery by the undersigned,

A. B. TRIPLER. Hannersville, Randolph County, N. C., Or to THE TRIPLER AMALGAMA? OR & MANUFACTURING CO, of Nev York: BENJAMIN LEWIS, Sec'y and Treas., 18' Montague St., Brooklyn, N. Y. tesplat
