Another Hanging.

Two little white boys, and a little negro, (all names withheld) who witnessed the hanging of the negro Frank Gaston, determined to have a small one of their own. The little negro consented to be hung. The gallows was rigged up with forked sticks supporting a cross bar, to which the rope was suspended. The scaffold was built up of boxes and the little negro climed into position with some difficulty. When ready, and before the black cap was adjusted, he was asked if he cared to make a speech. He talked a few moments, repeating nearly Rev. F. J. Murdoch and family have exactly the words of Gaston and wound the cap and rope and knocked the boxes from under him. A negro woman passing in de lane" and cut him down. He would have died in a short time but for this timely rescue. It was a boyish "toy hanging," which came near being fatal,

Maj. Cole grounds for encouragement. Mr. C. E. has made many contributions to the Hawley, M. E., of Washington city, is in Smithsonian Institute, and has furnished charge of the property and Mr. J. C. Horsomethings entirely new to the Archæolo- ton, is superintendent in charge of the gists of America. These have not yet work. The locality is different from the been reported upon by the experts who general auriferous deposits of the State are making a study of them, when they and later on something more will be found THE VEIN MOUNTAIN MINE.

The Vein Mountain mine, located in know of aboriginal life; of their hunting, east from Marion, is in active operation. mens of clay vessels spoken of above are from no very great depth. They have a the gift of the Smithsonian to Maj. Cole, ten stamp battery, which works from 7 partly in recognition of his contributions to 8 tons per day very easily. Supt. to that Institution, and partly in compli- Gaden was not present when the writer ment to his enthusiasm in all matters visited the mine, and his opportunity for gaining propper information was, in consequence, very limited. The mill man furnished the above, and, in speaking of the yield, said that after a recent run of nine days, 1,100 pennyweights was the result of the clean up. This will give

an idea of the value of the ore. HOLTSHOUSER MINE. A recent visit to the Holtshouser mine, in this county, which is being opened by Workmen are tearing away the fronts that he will be missed in the mercantile Burton Craige, in 1830-33. He moved Prof. J. M. Tiernan, shows that considerof some of Maj. Cole's buildings on the branch of our trade, but all will agree to Alabama when a young man, and for able work has been done. Prof. Tiernan ble rates. The "Carolina Oiled Oak" Chair, finishwho has a great deal of practical knowledge mixed with scientific lore, has left them his finger marks on all the surroundings. He has sunk, say from , 200 to 250 feet apart, prospect shafts along the outcrop of the vein, to the depth of 65 to 85 feet In this way he has opened nearly half a Since the above was in type copies of a mile of the vein, which is a bold lode, Livingston, Alabama, paper have been averaging four feet along this entire length. This gives him in sight an ore body say half mile long, by 85 feet deep After giving up his position as editor he was by 4 feet wide. When he had thus demonstrated his ground, he began sinking for securing the peace and gaiet of the town, a main working shaft, which at present exercising his authority with dignified firmness has reached a depth of 70 feet. This

shaft is a model of good workmanship, and is located so as to give ample fall for transporting the ores by gravity to the site of the stamp mill. The entire plant built for the Bullion mine (but which was milling ores changed into heavy sulphides and so discouraged the owners as to cause them to abandon the work,) has been bought by Prof. Tiernan and is now being moved into position. This plant boilers, large pumps, steam hoister, ore chinery of all kinds, also Mabreaker and set of blacksmith tools. This machinery is to be added to as occasion principles gained here, which wrought out | may require. The property gives great for him an enviable position in the esteem promise of becoming a regular producer, and confidence of his fellow citizens. Few and if it does not, under the present intelligent and careful management, it may as well be permanently abandoned. There is, however, so far as the writer is able to judge, no reason for predicting other
