> New York, March 31.—One of the greatest reforms ever inaugurated in the railway passenger service of this country was consummated at a meeting of a joint committee of the Trunk lines and the Central Traffic Association held at Commissioner Fink's office yesterday. A unanimous agreement was reached which will abolish absolutely and forever the payment of ticket commissions by railway companies to agents of connecting lines for the sale of passenger tickets. This abuse, which was begun more than thirty-five years ago, has grown to such enormous proportions that it is intimated that it is now costing the railways of the United States, directly and indirectly, at the rate of more than \$5,000,000 annually and has to a great extent been the means by which ticket scalpers have been built up. The Central Traffic Association has been at work for over a year in endeavoring to reach an agreement for the abolition of this system of bribery, but not unti now have the lines been able to reach unanimous agreement. A circular announcing this agreement was given to the public yesterday. It is addressed to all ticket agents and ticket sellers in the United States and Canada.

The vast importance of this move ment may be estimated when it is understood that the various associations east of Chicago and St. Louis and west So you see, Mr. White, that this is of the western terminus of the trunk line; the lines of trunk lines, a terrino place to rob trains. ## A FATAL MISTAKE.

THE Cleveland (Ohio) Press, of February 23d, 1883, published an account of a fatal surgical operation which caused a great commotion among medical men throughout the whole country, Dr. Thayer, the most eminent surgeon in Cleveland, pronouncing it scandalous. It appears that a Mrs. King had been suffering for many years from some disease of the stomach, which had resisted the treatment of all the physicians in attendance. The disease commenced with a slight derangement of the digestion, with a poor appetite, followed by a peculiar indescribable distress in the stomach, a feeling that has been described as a faint "all gone" sensation, a sticky slime collecting about the teeth, causing a disagreeable taste. This sensation was not removed by food, but, on

the contrary, it was increased. After a while the hands and feet became cold and stickya cold perspiration. There was a constant tired and languid feeling. Then followed a dreadful nervousness, with gloomy forebodings. Finally the patient was unable to re-
