BY J. J. BRUNER.

Great Records of a Great War.

The eighteenth volume of the "Rebellion Records" has been completed and is ready for distribution. This work, which was begun by the war department about nine years ago, promises to continue for a good many years before it is completed. The eighteenth volume only takes the history down to early in 1862. When the work is F. A. Olds, of Raleigh, in Auburn, New finished it is estimated that it will fill 127 volumes, and the last volume will probably be published some time in the next century. The copy is very diffi-Commercial Advertiser.

'The ancient and famous city of Daplans for laying railroad lines through its streets. Street cars in a city said would be a startling novelty. The place has 120,000 inhabitants.

Farming as a Profession.

I do not know one educated young man of American birth who thinks of farming as a profession. I have sat for ten minutes over this paper trying to recall an individual who has spoken favorably of agriculture as a vocation to live by. Farming appears to have completely passed out of the thoughts of young men in the castern states as a tesirable care r. Is not this somewhat strange in a nation, the founders and first rulers of which were farmers, almost to a man. According to a recent statement a considerable number of students in our colleges are willing to go into foreign countries as missionand ambitious, excepting, alone, this first and chief of all, the cultivation of the soil.-James Parton in New York Mail and Express.

Talking of eating reminds me of the way the operation is performed by the Arabs: Five of them seat themselves round a large bowl of rice, surmounted by a skinny fowl, all being curried. Two seize the wings with their fingers and two the legs, and simultaneously tearing these off leave the carcass to the fifth, afterward taking out the rice by handfuls and dexterously conveying it to the mouth with a peculiar jerk. One mark of hospitality shown to guests when at table consists in the chief's rolling up some rice into a ball in the palm of his hand and aiming it at his guest's widely distended jaws. On one occasion this piece of civility was shown to myself, but not being anything but what my kind entertainer anticipated, for, independent of being Giving is like a fly-blister. It is a nearly choked, the grains were sca'laughter even from the very grave Arabs. This, of course was the last Men are not always right in the use experiment of the kind tried upon me.
