The Alliance Fair.

The Alliance fair closed last Thursday and was, taking everything into consideration, a big success for a first fair and on new grounds.

The exhibits were good and the attendance was very fair. Nothing happened to mar the pleasure of either the visitors or exhibitors and the duties of the judges were performed in a business like and satisfactory manner.

Below we give the first premium awards, but in justice to many exhibitors we would add that the managers awarded as first premiums only in those cases where there were two or more exhibits.

This Means Business. Asheville Citizen. It is said that Weldon is to have the largest cotton-factory in the state, and that work will probably commence on it as soon as the canal is completed.

Wadesboro Messenger-Intelligencer: Some extensive additions have recently been made to the plant of the Wadesboro brown stone quarry. Two new gangs of saws and an immense 15-ton derrick have just been placed in position.

For the first twenty days of this month, which means only seventeen working days, W. Duke, Sons & Co., consumed 3,700,000 10's and 100,000 20's cigarette stamps, making a total of 3,800,000 stamps for cigarette, with a valuation of \$18,000.

Charlotte News: There are some big hearted men in Charlotte. It has just leaked out that a warm hearted merchant has been paying the salary of a teacher at the Graham street chapel to teach his factory children. She has had a class of thirty-five. In another part of the city, this merchant has been operating a school for poor children, meeting the entire expenses out of his own pocket. He has not been doing this for an advertisement, for not even the children knew the identity of their benefactor.

Mr. Abner Dawson says the old man is slaying the coons, and from all appearances is enjoying himself finely.

Henderson Tomahawk: We are not a christian and unfeeling enough to want anybody to die, even though they were worse than Drones in our hive, yet it has been stated that three or four first-class funerals here would contribute largely to the growth and prosperity of the town. When the people's minds and souls are drawn into an acorn hull, and ossified, the rattling of their dry bones are of little use to any community, and the skeleton to be missed.

Wilmington Messenger: The meeting in Raleigh, reported by our regular correspondent, looking to an increase of accommodations for the insane, and proposing a change in the Morganton asylum, has so far as to treat imbeciles is of importance. The two most melancholy and unfortunate classes of people are those victims of an insatiable appetite for drink. The one class is smitten of God; the other class is self-immolated on the altar of Bacchus, and both need the saving hand of science and sympathy. Anything that will look to the amelioration of the condition of the insane and the saving of imbeciles deserves the support of philanthropy.

Monday the mother left them playing on the floor in her room together, and went out to attend to her household duties. While she was gone the 3 year old boy went out and got the axe and commenced chopping some kindling on the hearth. The baby drew near to watch the operation, and it wasn't many minutes before the axe came down on his hand, cutting off the first and second fingers of the left hand. Mr. Auton said the little fellow didn't cry until some minutes after the accident, when the mother was washing the blood from its little hand. When she returned to the room she found it playing with the fingers that had been cut off.

Farnell Re-Elected.

LONDON, Nov. 25.—The meeting of the Farnellite members of the House of Commons prior to the reassembling of Parliament, was held to-day. There was an almost complete attendance of the members on this side of the Atlantic.

Mr. Farnell, as he entered was received with repeated cheers, and many of the members darted forward to grasp his hand. He looked calm and self-possessed, and called the meeting to order in his usual tone. He was unanimously re-elected chairman, and speeches were made by Mr. Selton and other expressing the confidence of the Irish party in their leader, and urging him to retain his place in the party in the House of Commons.

Mr. Farnell replied briefly, without any direct allusion to the attacks upon him. He thanked the members for their continued confidence, and said that in obedience to their will and that of the Irish people, he would remain at their head and labor to the best of his ability for the cause of home rule in Ireland. The announcement was received with repeated cheers. The Irish members will deeply resent any assault upon Mr. Farnell in the House, and answer it by allusions to the illegitimate children of the late King William IV and other noted instances of English depravity in high places. The speaker it is understood, will take stringent measure to prevent any allusions of a personal character.

Lowrie Thought to be in the Mountains of Western North Carolina.

WASHINGTON, D. C. Nov. 22.—Attorney Gen'l Miller has decided that a reward be offered for the arrest of Rich Lowrie, who is accused of being an accomplice in the killing last Summer of Col Forsyth then in charge of the Dodge plantation in Georgia which had been the subject of litigation, and finally decided in favor of Dodge. He was an important government witness in the cases arising out of litigation and was shot while sitting with his family. An investigation by the Department of Justice developed the fact, that Lowrie had been hired to kill Forsyth. In the meantime he has fled from the State and is now said to be in North Carolina. Lowrie is said to be the leader of the Lowrie gang in Western North Carolina.

How a Nickel Can be Made to Grow.

Reading Telegram. Some time ago the Ladies' Aid Society agreed to invest a nickel in some kind of article and to sell it at a profit and re-invest it in something else, and so on, to speculate on this capital for two weeks and see how much each one could make. One lady on the same day of the meeting bought a cabbage for a nickel. She carried it home, sold half of it for a nickel. She invested that in vinegar and pickled the remaining half and sold the pickle for 25 cents. She then bought 20 cents worth of cloth and a spool of thread and made it up in three aprons, which she sold for 25 cents each, and took the 75 cents and bought molasses and gave a candy pulling to the children, making them pay 10 cents a plate for the candy. The molasses made 21 plates of candy; so she made \$2.10 on one nickel in two weeks time. How money will grow if properly used.
