Hypocrisy in Polities.

Correspondence of the Watchman.

Mr. EDITOR: - As we go quietly about our every day affairs of life not meddling in politics or other people's business, how we wish others would let us alone, but no; every little cross-road rooster of a politician has to ask us we go by, "What about polities? Are you going to take in with the new party?" Then if you don't come square out and say you are going to vote for Cleveland, against the force-bill, and for white supremacy, we may look out to have our polling places guarded by l'eleral officers and negoes to rale over us. Even some quiet citizens put such questions, but are too sorry to say they are led blindly by the hypocritical politicians. would think they could be appropria ately with a class referred to in a German proverb which reads thus: "He who knows not and knows not that he

knows not is a foel; shun him." When we think about things for a moment we are led to exclaim, "What hypocrisy!" And then we are led to believe that that passage of Scripture found in Revelation 20th chapter, 7 and 8 verses has come to pass and is being practiced upon men. It reads: "Satan shall be loosed out of his prison and shall go out to deceive the nations which are in the four corners of the earth," etc. It does seem like if ever the devil was turned loose and the people were deceived it is now, for of all deception that has ever been practiced upon a p oble it does e m that the most deceptive deception is now being practiced and dealt out by the politicians of our country, and our people are. being led captive at their will. But how about the force-bill? Let's look into it a little. Suppose the government were to send armed men down here to guard our polling places: Hesn't the government sense enough, yes, and even those who say such will be the case, to know that our people will not submit to any such. And then are you going to get enough men to lose their vote to come down here and watch us? No, and every one of you hypocrites who offer up such know out too well that it will never be done. The election for President has to be done. The election for president has to be held all over the United States on the same day and unless the coustitution were changed a great part of us would be deprived of voting unless men in the same township should be appointed, which we think would be about the way of it any way. We heard a prominent Democrat say a few lays ago that all the talk about the orce bill was bosh; that the Republie ans did not want it themselves, and that it would never be passed even if they had the power, and there is truth from an honest Democrat, and would all the rest say what they believe would

say the same. But no, any kind of

they believe there are no white men in the Republican party that would and could rule? The best element of the Republican party is in favor of white and will no more submit to negro rule than Democrats. Don't understand us to be a Republican for we are not and have never cast a Republican vote, but are cut loose from party prejudices and telling things just as we see them. Now to all you Democrats who are always crying "nigger" to scare people back into line we have one question to quietly and honestly submit: If the Republican party is the negro party please tell us how how and why it is that in every single S ate where the negro is in the majority or even near the equal of the waites in population, that those States always never fad to go Democratic? Is not this so? Well then there is one of two things evident, the negro votes the Democratic ticket or ele he is cheated out of his vote. Now is this not evident? If the Democrats are getting their majorities from sipelas sets in, followed by meningitis the negroes in these States, they have no ight on earth to say "nigger" to any one else, but with hamiliation should ook at home. If the negro is being cheated out of his vote then you need the force-bill or some other law to make you count his vote right. What do you say Mr. Democrat? These are some of the things which puzzle us, and we can't understand them otherwise. They know that it's all stuff, but as there is no issue between the old parties except to heat, they must have something to harp upon, so we suppose John P. St. John, the great Prohibitionist of Kansas, said in speech at Charlotte that the only difference between the old parties was that the For Fevers, Chills and Debility, take Democrats were in favor of tariff reform and the Republicans were in favor or reforming the tariff, and we thin. that he hat it. What an amount of lying will have to start out. There is work for you. Yours for better politics,
