Don't Take It for Granted.

Merchants and business men too often take it for granted that they will be found out without telling the public what they have to sell. Don't take too much for granted. Better tell the people you are in business for their trade and not set around waiting for some one to come in.—Burlington News.

Three men were frozen to death near New Bern, a few nights ago. They spent the night on a capsized boat. Another of the party attempted to swim ashore and was drowned. Two others were rescued after being exposed fifteen hours.

If you are ever hit by a bolt of lightning you need not be surprised if you are killed, for a German scientist who has been experimenting says a bolt of lightning strikes with a force of 3,500,000 volts, equal to the concentrated energy of 3,284,182 horses or mules. Imagine that many mules ammingated into one, and that one planting his heels with the aforesaid energy on one poor mortal, and think where and with what celerity he would land in the kingdom come.—Wilmington Star.

Some journalist having started the report that a Missouri girl kneads bread with her gloves on, an estimated cross-roads contemporary rises to remark so do we. We also need it with our shoes on, with our pants on, and with all our clothes on. We need it dog-goned bad, but if our delinquents would pay up, we could buy bread enough to run a baker shop.—Concord Standard.

Maybe, if we did not have so many good North Carolinians building up other States, the fields here would blossom as the rose; maybe if the "dispersed abroad" had been more patient to utilize the advantages of their own State it would be farther on in progress and process of material development. Certain it is that efforts, expended at home, which they have so bravely put forth to build themselves up in a new and untried country would have accomplished much in placing North Carolina in the van of the commonwealths of the Union—where she belongs. In the diversity of soil and its adaptability to the growth of all kinds of products, in the salubrity of climate and in its fortunate geographic position, this State is no whit inferior to the most favored position of the West or the Golden Coast.—Char. Observer.

BUDA PESTH, Jan., 28—Fifty-seven men caught in a coal mine at Tokand Gran, yesterday, escaped by way of a long unused shaft. There are seventy-three men still in the mine. They are beyond all doubt dead, as the whole interior of the mine is a roaring furnace, and it would have been impossible for them to have found shelter from the flames. Two of the volunteers reserves lost their lives. Altogether about one hundred men have perished in the disaster.
