The "Object Lesson."

The Democracy, it seems to us, has had enough of evidence, to say nothing of the country's experience from the effects of an extravagant administration of the government, that the bad laws on the patens statute books should be repealed as one of the first measures to relieve the people. In regard to President Cleveland's views on this line the New York World refers to the "Object Lesson" enforced by the recent financial stringency as follows:

"The Republican journals profess to be very much shocked at the report that President Cleveland finds a hope of Congressional relief from the financial difficulties which beset the Treasury and disturb the country in the 'object-lesson' enforced by the recent financial stringency as follows:

"The country has had for the past six months an object-lesson in the wrong and the danger of national extravagance. A squandered surplus and an empty Treasury enforced this lesson some time before the end of the Harrison Administration that encouraged and approved the waste.

"Another object-lesson is read in the operations of the Sherman Silver law. No amount of argument would have convinced the supporters of this measure that it would depreciate the price of silver and fail to afford any relief to people who clamor for 'more money' without offering a satisfactory equivalent.

"The object lesson as to the combined folly and robbery of the McKinley tariff was so clear last year that the people voted for its repeal.

"President Cleveland has good reason for hoping that the unpleasant events and experiences of the present year will tend to secure remedial legislation by Congress."

During the past two weeks several of the most prominent banks of England have failed with heavy liabilities.

Last Monday the Raleigh Chronicle and its franchise, books, etc., was sold at auction, to satisfy a mortgage, and only brought \$2,000, which, according to the News and Observer, was a remarkably low price, as the outfit was comparatively new.

It is stated that Gen. Clarkson has come to the conclusion that the young men of this country have become tired of dead issues and have therefore gone into the Democratic party. The young men who believe in a future state and personal responsibility for their actions in this world could not do otherwise. The Republican party is no place for them.

Maj. W. A. Guthrie, of Durham, has informed the Commissioner of Agriculture, at Raleigh, that a valuable coal discovery has been made on the line of the Glendon and Gulf railroad, twelve miles from Egypt, in Chatham county. He reports two seams, one four and a half, and the other just below it, four feet thick.

The Supreme Court of the United States, on Monday last affirmed the Constitutionality of the Chinese exclusion act of Congress, known as the "Geary act." Under this act the Chinese who have failed to register as a bona fide resident of this country, becomes subject to deportation, and it is therefore feared that a good deal of trouble is likely to be had with them. They have shown little disposition to register, and as the amount of the appropriation, \$100,000, is thought to be insufficient to carry out the provisions of the act in arresting and transporting them back to China, the government will find itself unable to execute the law as the act provides.

At Warren, Mass., last Thursday, Warren G. Butterworth committed suicide by shooting himself in the mouth. His daughter, Emma, who was trying to prevent her father from taking his life, received the bullet in her brain after it had passed through his head. She lived about an hour.

Mr. Gladstone offered the place of poet laureate of England, made vacant by the death of Lord Tennyson to art Critic John Ruskin.

A Weldon special to the Wilmington Messenger says the State farms near there were damaged \$15,000 by the recent freshet.

Maj. John W. Graham is an applicant for the attorneyship of the western district.

The Cape Fear and Yadkin valley Railroad depot at Walnut Cove with contents were destroyed by fire last Monday.

The New York Press, Rep., says what this country wants is one hour of John Sherman. This country has had about thirty years of John Sherman, and that is pretty much the matter with it.

Wilmington Star: Mrs. Mary Ellen Leese, of Kansas, has entered the field of prophecy, and disposes of Chicago by predicting that the waters of the lake will crawl up and submerge the wicked town in 1893. In that case Chicago will be well washed for once. In the meantime she will continue to enjoy her fortune and her wickedness, regardless of the liquid prophecies of Mary Ellen.

The champion juvenile thief lives up in Brooklyn, N. Y. He is a twelve-year-old who slipped the coat off his dead father and pawned it for a few nickels.

Secretary Carlisle on the 15th, awarded the silver life-saving medal of honor to Benj. Hewlett, of Wilmington, N. C., for rescuing two girls from drowning on the 7th of August, 1892, on Wrightsville Sound, N. C. Hewlett displayed exceptional courage, taking both girls at the same time from the channel where the water was twelve feet deep.

London, May 16.—The central part of the Episcopal Palace at the Bishop's court, near Douglas, Isle of Mann, the seat of the Anglican Bishop of Sodor and Man, was destroyed by fire. The Bishop's Court was a handsome structure, much resorted to by visitors to the island. The conflagration broke out suddenly and spread so swiftly that the servants narrowly escaped with their lives.

New York World: The report that China will retaliate if the Geary Exclusion act is carried out by our Government, as under the decision of the Supreme Court it must be, is not surprising. Chiamen are no more unpopular here than Americans or any foreigners are in China. The Celestials are a patient race, but the proverbial last straw may prove too much for them. If exclusion is a right and proper policy towards Chinese in this country, how can we complain if it should be adopted towards Americans in China?

The people are getting tired of Butler's nonsense. If he knows of any Democrats who used fraud at the polls, let him name them, have them arrested and produce witnesses to prove the charges. There is a law to punish all people guilty of suppressing the suffrages of their fellowmen. Have the guilty parties brought to the bar of justice or stop your ranting.—Sanford Express.

The members of the State Press Association appear to have abandoned the idea of getting free passes to Chicago during the fair, and if they get there will have to go as individuals.

Faith and adherence in Democratic principles have been growing upon the people steadily with the progress of civilization all over the world and especially in the United States, and we feel confident that the number of citizens who have an intelligent conviction of the necessity of Democracy is larger now, even in the South, than ever before.—Mechlenburg Times.

A Washington special to the Charlotte Observer says: "No formal written resignation has been tendered by District Attorney Price. He has merely signified to the Attorney General his intention to resign. His resignation, I understand, is to take effect the first of June."

Our esteemed contemporary, the News and Observer thinks we do, that the Civil Service Commission is very much of a humbug. They have made a rule that appointments made from their lists must be reported to them within three days, and not long ago a man named Pulaski, having passed his examination, was notified by them as eligible and was duly appointed to a place in Washington postoffice. But the postmaster failed to notify their royal highnesses within three days, and so when they found it out, they required Pulaski to be dropped. Pulaski has now sued the Commission, and will without doubt be reinstated by the court, the three great Moguls to the contrary notwithstanding. The whole system is a humbug!

Congressman Grady hopes to soon have a change made in the postmaster's office at Fayetteville, N. C. and the indication are he will have the negro Republican removed. Mr. Bissell "bluffed him" as some of the North Carolinians put it, because there were no charges preferred against the incumbent; and he also complained that the congressman had not submitted the name of a Democrat to be appointed. The charges are to be preferred right off, and Mr. Grady has his man picked out, but he says he will hold back the name until he is certain the Republicans are to be removed.—Charlotte News.

In some respects North Carolina may not be the equal of some of the Western and Southwestern States, but take it all she is the equal of any of them and the superior of many. They may have larger cities, numerous railways, fertile and cheap lands, and wide ranges for pasturage of cattle and sheep but they have blizzards, cyclones, floods, droughts and various other visitations that we know little of in North Carolina, where if they come at all it is only at rare intervals and in mild form compared with the Western and Southwestern states.—Wilmington Star.

The State executive committee of the Kolb faction of the Democratic party in Alabama met at Birmingham last week and submitted a proposition to the regular Democratic convention through a joint primary to be held next April, on the white men to be allowed to participate.

THE GREAT FAST MAIL.

Two New Fast Trains by the R. and D. New Railroads. New Trains.

Fast Time.

The fastest time seems to be the motto of the day in railroad circles of the New South, and the Richmond & Danville, it appears, has reached the climax. Since January, 1891, that company has been operating three (3) through passenger trains between New York, Atlanta, and New Orleans, one of these being the justly celebrated "Washington and Southwestern Vestibule," making the run from New York to Atlanta, Ga., a distance by its line 912 miles, in 23 hours, or an average of about forty miles per hour. The New York and Chicago Limited of the Pennsylvania railroad makes the run from New York to Chicago, a distance by its rails of 875 miles, in 24 hours; thus you see "the greatest southern system" (the R. & D.) is giving the "New South" a service that is equal to that of the standard railroad of America (the Pennsylvania railroad). But with the spring changes comes the second wonder—the establishment of the R. & D.'s great fast mail, composed of new and elegant postal cars, complete postoffices on wheels, and luxurious coaches and magnificent Pullman palace vestibule sleepers. The south bound train (No. 35) leaves Washington every morning at 11:10 o'clock, with New York, Philadelphia, Baltimore and Washington papers of same date, and distributes them in the Virginia, North and South Carolina the same day of issue, putting them into Atlanta at 6 o'clock a. m. the morning after issue and distributing them through Georgia, Alabama and Mississippi through the medium of the seven railroads radiating from Atlanta by noon of the day after publication, which is by many hours the quickest and most complete service ever given the United States mail to and from the South.

These fast mail trains make the run from Washington to Atlanta, southbound, in eighteen hours, and fifty minutes, while the corresponding northbound train, No. 36, leaves Atlanta at 7:30 p. m., arrives in Washington 2:55 p. m. following day, making close connection for Baltimore, Philadelphia, New York and New England, arriving in New York at Philadelphia 6:40 p. m., New York 9:10 p. m., next day and Boston 7:30 a. m. Time to Washington nineteen hours and twenty-five minutes and to New York twenty-five hours.

The fast time, splendid equipment and magnificent service of the R. & D. is greatly appreciated by the traveling public, as is manifested daily by their very large and constantly increasing passenger travel. The management of the company is entrusted to men of intelligence and high character—broad and liberal in their views, strictly businesslike in their methods and rules of conduct, just and reasonable toward all patrons, showing no favoritism, making no promises to be broken, guaranteeing nothing they cannot accomplish. Such a system, with such a management, is justly the pride of the people it serves and the reason through which passes.—The Republic.

Raleigh Sentinel to be Preserved.

The Baltimore Sun of Saturday says: A number of native North Carolinians resident in Baltimore have formed an association to purchase and preserve the land on Roanoke Island, North Carolina, where Sir Walter Raleigh, in the year 1584, planted the first English colony in New World. The tract includes about two hundred and fifty acres on the northeast corner of the island; and on it stands the ruins of the original fort, built by Raleigh. The whole can now be bought for \$1,500, and the committee propose to organize a company, which will issue 600 shares of stock at \$25 per share. This will leave a small annual income with which to preserve and protect the property. The committee include Prof. Edward Graham Daves, Francis White, City Solicitor Bryan, Prof. A. Marshall Elliott, Bartlett S. Johnson and Thomas J. Boykin.

Quarantine and Disinfection.

Dr. Richard Lewis, Secretary of the State Board of Health, in a recent public circular utters the following warning: "We are seriously threatened during the summer months with the invasion of the most dreaded of all the contagious and infectious diseases.—Cholera."

"Most people know the value to health of cleanliness of person, premises, food and air, and isolation of those sick of infectious diseases, and more especially the necessity for the preservation and protection of the patient and his effects after his recovery. As nothing is so convincing as facts, I will give some of the results obtained in the State of Michigan, where sanitary regulations are carried out, certainly as well as, if not better than, anywhere else in the country: The number of deaths from scarlet fever in that State before the Board of Health undertook its restriction was 4.85 for every 10,000 inhabitants—after 2.45 of small-pox before, 85 per 10,000—after, 10. One of the diagrams to be exhibited by that Board at the Columbian Exposition indicated that lives saved: from scarlet fever, 7,265; from small-pox, 1,921, and from typhoid fever, 1,671." The administration of health laws even in Michigan is still very, very far from perfect, and yet see the great saving of life wrought about by their partial application. What has been done there can be done here—and ought to be done, every one must admit."

Trinity College Commencement—Durham—June 7-8.

This year's commencement of Trinity College, Durham, will occur June 7, and include the following important features: 1. Baccalaureate sermon by Rev. Dr. R. N. Siedel, Richmond, Va., at 11 a. m., Wednesday, 7th, in the Main street Methodist Church. 2. Literary Society by Hon. A. M. Waddell, of Wilmington, N. C., at 4 p. m., Wednesday, 7th, in Stoke's Hall. 3. Annual Address before the Alumni Association, by Walter P. Andrews, of Atlanta, Ga., at 8 p. m. in Stoke's Hall, Wednesday, 7th, in Stoke's Hall. 4. Graduating Exercises at 11 a. m., Thursday, 8th, in the Globe Warehouse. Reduced rates have been applied for over all railroads in the State.

State Horticultural Society.

Greenboro Record. A meeting of the executive committee of the North Carolina State Horticultural Society was held in the rooms of the Chamber of Commerce to-day.

The President was empowered to select time and place for holding the State Horticultural Fair.

A committee of three, hereafter to be selected by the President, is to visit the United States Agricultural Department in the interest of the fruit raisers of the State and render a report to the annual meeting.

Children Cry for Pitcher's Castoria.

An Important Ecclesiastical Council.

The General Assembly of the Presbyterian Church in the United States, generally spoken of as the Northern General Assembly, which is soon to meet in Washington City, will be one of the most important Church councils which has ever assembled in this country. It is to decide for the Presbyterian Church of America the authority of the Scriptures, the authority of the Holy Bible.

The matter will come up as the appeal to the Assembly of the prosecutors of Dr. Briggs, who was acquitted of heresy by the New York Presbytery. One of the charges against Dr. Briggs is that he rejects the long-esteemed authority of the books of the Bible, and holds that that sacred book is a collection of Jewish writings of unknown and undiscoverable origin. Dr. Briggs thinks that the authors were probably unknown scribes, who edited the records of their race, falsely attributing the authorship to prominent leaders of the Jews, in order to impose upon the credulity of the people.

The exciting question is: What view will the General Assembly take of this question? Can it afford to sanction the theory that the revelation of the Eternal Being to mankind was started upon its human existence through trickery and fraud? The decision of the Assembly will have widespread results. If Dr. Briggs is upheld it will forever cut off any hope of the union of the Northern and Southern General Assemblies, which split at the beginning of the war, but in favor of which a rapidly growing sentiment is being formed in the South—the Northern Assembly has long been beckoning back its Southern neighbors, and again, it will probably cause a disruption of the present Northern Assembly.

But it is not probable that Dr. Briggs will be sustained. The Northern Presbyterians have not much of that conservatism which is found among the Southern members of this faith, who are very much like the strict Scotch Presbyterians, but even the progressive Northern branch of the Church is hardly prepared to go as far as Dr. Briggs has gone. The future accountability of man is another important question this Assembly is to pronounce upon. These vital questions will render it second in importance only to the great Westminster body that adopted the Confession of Faith, the question of the revision of which Confession will probably be relegated to the next account of the great interest centered in the case of Dr. Briggs.

A Jury Rebuked.

Asheville, N. C., May 13.—Special.—Frank and John Jewell, father and son, who were indicted for the murder of Marshall, Chas. B. Brokers last February were acquitted today in the criminal court by the jury rendering a verdict of not guilty. Judge Carter severely rebuked the jury, saying "Well I must say that that verdict is a gross miscarriage of justice, nothing less. (Instantly 300 necks were craned to take in every word of the court) and more it is a personal disgrace to every man on the jury."

"I did not submit the question of self defense, but thought you could in no way consider it a case of killing in self defense. It was certainly a case of murder in the second degree, if not in the first degree. I am thoroughly ashamed of the verdict; let the jury be discharged and the prisoners as well."

The State Motto.

Prof. Alexander in Wilmington Messenger. You like to go to the bottom of things. So I call your attention to the fact that Cicero's "Esse quam videri" is it all a quotation from Plato, who (in the Gorgias) says that a man must take good care not to seem to be good but to be good, as well in public as in private life.

At last the wasted energy of Niagara Falls is to be utilized. The tunnel constructed at a cost of nearly five million dollars has just been completed, and it is proposed to transmit electric power, generated by water passing through the tunnel, to Albany, N. Y., and intermediate cities, and possibly to New York City.

Mr. Carl Schurz called upon Mr. Carlisle a few days ago and had, considering the circumstances, quite a protracted interview with the Secretary. His object was to preach Mugwumpism and civil service reform. No sooner says the Post, had the distinguished visitor taken his departure, than Mr. Carlisle demanded the resignation of five heads of divisions in his department. Carlisle is a trump and a Democratic trump that counts.

The Democratic party cannot afford to acquiesce in the position taken by Postmaster General Bissell in the matter of the postoffice at Fayetteville. There is no use of mincing words about it. The Democrats have a right to demand the appointment of a Democrat. If there is any difference in the principles of the Democratic party and the principles of the Republican party (and there certainly is) and if the Democratic principles are right and the Republican principles are wrong, then those who fought for the right should have a hearing in preference to those who fought for the wrong, and it is a strange thing to us that those who have been placed in power should refuse for a moment to heed the wishes of those who placed them there.—Ex.

A correspondent writing to the News and Observer from Henderson, N. C., says: Dr. F. S. Harris, President of the North Carolina Dental Association, is in receipt of a letter from his mother, who is spending some time at Maxton, in which she details some curious history of that section. The letter is dated May 9th, and I am kindly permitted to use the following extract: "We went last Friday and spent the day with Mrs. Margaret Hines Melville, and had a pleasant day. They live in a very old-fashioned house that was built seventy of eighty years ago. It has been in their family sixty years. Two old ladies live in the house. They tell me that a rich family named Stewart lived there before they bought it. Mrs. Stewart died and was buried in the graveyard.
