The full force of the panic has not been spent, neither will it be until the usual fall request for money is made. If this be a fact, and it is supported by the customs of the past, why then prepare to meet the worst forces of disaster fall accounts. The industrial and farwarning is sounded.

Fred Douglas Excited.

CHICAGO, Aug. 9 .- Old Fred Douglass, the colored orator, was greatly wrought up today in the suffrage congress by Stephen B. Weeks, professor of Trinity College, North Carolina, who read a paper on negro suffrage in the South. The professor said:

Negro suffrage is a failure. It must remain a failure so long as it is not an ally to the white vote. A large percentage of the Southern people are of English descent. They will not subrit to domination. The white man must rule. He seeks to secure this result by fair means. He has respect for law, and for that reason seeks to rule under the law.

When he cannot do that he bulldozes and counts out. No man who has not lived in a negro land knows what negro domination is. It means the destruction of property, ruin and bankruptey.

When Prof. Weeks had finished Douglass, who was on the platform, rose and made an impassioned reply

You are not afraid of negro domination. The negro can never rule this country. He would be out-voted by the political milhons of whites and overwhelmed by their superior intelligence. There is no objection to the negro in the South until he sspires to rise. So long as he is ignorant and lazy no one disturbs. As soon as he aspires to become a lawyer or doctor, he at once becomes an upstart.

A Good Farmer.

D. H. Morris in Western Plowman. A good farmer should never depend upon his neighbor for what he can, by should not borrow tools or vehicles when he can make or buy them, for in going to borrow them and then often take valuable time in taking them back: then there's a waste of the neighbor's time and money by keeping the tools in repair for some one to land than he can cultivate. It is the acres into crops as possible, giving no attention to the matter as to how they are put in; for instance one man will put in fifty or sixty acres of wheat while his neighor will put in thirty and get as many bushels, and perhaps more. Now the farmer should bear in mind that well-tilled land is constantly improving, while half-tilled land is grow-

A physician has written an article to show that dyspepsia is due to a disorder of the head, and not to the stomach. He says: "The numbers of so called dyspeptic that are cured by the disappearance of business, domestic or social annoyace are nearly unlimited. An overdue note i the possession of a beetle nosco and beetle eyed creditor is more productive of dyspepsia than a meal of second hand isbury and Ashevide, and Pullman Sleepers be-tween Washington and Atlanta; and between carpet tacks. In fact, it may be a safe thing to assume that in dyspeosia we had better look in the garret, closet or cellar of the dyspeptic's house or among hi his business or social relations, rather than to his stomach, for the solution o the difficulty."
