

MISS MARIA DUCHARME.
Every woman in America is interested in This Young Girl's Experience.

MISS MARIA DUCHARME,
122 St. Elizabeth St.,
Montreal, Can.

PELVIC CATARRH WAS DESTROYING HER LIFE. PE-RU-NA SAVED HER.

Miss Maria Ducharme, 122 St. Elizabeth street, Montreal, Can., writes: "I am satisfied that thousands of women suffer because they do not realize how bad they really need treatment and feel a natural delicacy in consulting a physician. I felt badly for years, had terrible pains, and at times was unable to attend to my daily duties. I tried to cure myself, but finally my attention was caused to an advertisement of Peruna in a similar case to mine, and I decided to give it a trial. My improvement began as soon as I started to use Peruna and soon I was a well woman. I feel that I love my life and my health to your wonderful medicine and gratefully acknowledge this fact."—*Maria Ducharme.*

Botanic Blood Balm for the Blood.
If you suffer from ulcers, eczema, scrofula, blood poison, cancer, eating sores, itching skin, pimples, boils, bone pains, swellings, rheumatism, catarrh, or any blood or skin disease, we advise you to take Botanic Blood Balm (B. B. B.). Especially recommended for old, obstinate, deep-seated cases, cures where all else fails, heals every sore, makes the blood pure and rich, gives the skin the rich glow of health. Druggists, \$1 per large bottle, 3 bottles \$2.50, 6 bottles \$5.00, express prepaid. Sample sent free by writing Blood Balm Co., Atlanta, Ga. Describe trouble and free medical advice sent in sealed letter. Medicine sent at once, prepaid.

Does His Duty Without Fear.

Francis I. Henry, the special United States district attorney who brought Senator Mitchell and others to indictment in Oregon, fears nothing and has a record for absolute integrity. In his early days he practiced law in Arizona. A woman came to him for help in securing a divorce on account of her husband's cruelty, but assured him that her husband threatened to kill any lawyer who would take up his wife's case. "Oh, that is a matter that will come up later," said Henry calmly. He got the woman her divorce and next day met the former husband in the street. The latter took a revolver out of his pocket, whereupon Henry being quicker "on the draw," shot the man dead.

It is a fact that when the city man and boy take a vacation from their toll and the city woman and girl from their home duties they generally want to take what Dr. Adler calls an ethical vacation, too. The country people know and feel this and some of their most conscientious people resent it, declares the New York Mail. They object that city people, let loose in the country, do things which they would not do at home. Hatless and coatless, city girls who are careful of their conduct at home sit saucily on the counter of the mountain grocery store and thump their heels against its boards.

Would Have Divorce Cases Private

A member of the British parliament has announced that he intends to introduce a bill making radical alteration of the procedure in divorce cases. The chief feature will provide that such proceedings shall no longer be held in public. He holds that the public does not benefit materially by having details of divorce cases published in the newspapers, and that, on the other hand, public morality loses a good deal.

Sun Parlor for Baby.

Sunning the baby is the latest thing in baby culture. No householder is too poor to possess one of these patent adjustable sun parlors.

They are made of some kind of hard wood and built by the carpenter to extend beyond the window. The top and sides of the little platform are covered with glass, and strips of carpet are laid on the floor to stop up any cracks there may be. No matter how fiercely the winds may blow or how low the thermometer may sink the sun parlor is always ready for the baby.

A pillow is placed on the carpeted floor, then the baby is warmly dressed and well covered for its morning or afternoon nap. Mothers who have tried this method of sunning the baby are boasting of the gain in weight and health and have the proud satisfaction of knowing they are strictly up to date.

For Systematic Scientific Research

Prof. Pearson, the English scientist, has been considering the suggestion of Prof. Simon Newcomb looking to the systematization of scientific research by organizing investigators into what might be termed battalions. Dr. Pearson says that what science needs at present is to get rid of most of its data and investigators with brains enough to interpret what is left. "At least 50 per cent of the observations made and the data collected," says Prof. Pearson, "is worthless, and no man, however able, could deduce any result from them at all. In engineer's language, we need to 'scrap-heap' about 50 per cent of the products of nineteenth century science."

Put His Will in Rhyme.

"We get some queer wills here," said Deputy Register Stroup of Harrisburg, Pa. "But here is one that beats anything I have ever seen since I have been here."

Mr. Stroup produced a small sheet of paper, which contained:
When my wife's a widow, of me be left.

She shall inherit all I've left;
And when she's finished her career
It then shall go to my daughter dear.
This document was duly attested as a will and was received for probate. It came from the lower end of the county, and will be the guide in settling an estate.—*New York Herald.*

Shoe Lacer for Fat People.

Mrs. Elizabeth Falconer of Louisville, Ky., has just perfected an invention which promises to revolutionize the lacing of shoes by fat people.

The invention enables men or women to lace their shoes without stooping, and although it was not invented primarily for fat men—there are no fat women—it will be utilized as much by them as by the aged and infirm, for whose comfort it was brought into the world. The invention is simple. One lace string is permanent in position, and pulling the top of it laces the shoes. Pulling the bottom string loosens the shoe.

Effective Smoke Consumer.

What is said to have proved an effective smoke consumer has been tried in London. The invention comprises a screen of tubular fire bricks, made of special material built up in the furnace in such a position that all the products of the fire pass through the screen. The latter quickly becomes incandescent, and "flashes" the gases as they pass through, thus preventing the formation of carbon.

Curios Worth Owning.

George H. Rollins of Franklin, N. H., has an old-fashioned rawhide trunk over 200 years old, a rope braided from horsehair, secured during the civil war, a set of blue china over 100 years old, an old lantern, and a chair 150 years old, which was whitened out with a jackknife.

Pointed Paragraphs.

A woman always retains a large corner in her heart for her first love.

About the only reason a woman has for marrying a man is—because.

It takes a spinster to paint an optimistic picture of married life.

FEED YOU MONEY

Feed Your Brain, and It Will Feed You Money and Fame.

"Ever since boyhood I have been especially fond of meats, and I am convinced I ate too rapidly, and failed to masticate my food properly.

"The result was that I found myself, a few years ago, afflicted with ailments of the stomach and kidneys, which interfered seriously with my business.

"At last I took the advice of friends and began to eat Grape-Nuts instead of the heavy meats, etc., that had constituted my former diet.

"I found that I was at once benefited by the change, that I was soon relieved from the heart-burn and the indigestion that used to follow my meals, that the pains in my back from my kidney affection had ceased, showing that those organs had been healed, and that my nerves, which used to be unsteady, and my brain, which was slow and lethargic from a heavy diet of meats and greasy foods, had, not in a moment, but gradually, and none the less surely, been restored to normal efficiency. Now every nerve is steady and my brain and thinking faculties are quicker and more acute than for years past.

"After my old style breakfasts I used to suffer during the forenoon from a feeling of weakness which hindered me seriously in my work, but since I have begun to use Grape-Nuts food I can work till dinner time with all ease and comfort." Name given by Fostum Co., Battle Creek, Mich.

There's a reason.
Read the little book, "The Road to Wellville," in each pkg.

TWO FUTURE KINGS.

The German Crown Prince and little Prince Luitpold, who will one day be King of Bavaria. The little Prince is a grandson of the mad King Otto. The picture was taken at Munich.

A DRAUGHT DETECTOR.

How many times in the week do you hear your parents say: "I believe I feel a draught?" Doubtless a great many, and then there is always an argument

as to where the draught comes from, is there not? And sometimes it is not a draught at all, but just imagination. Still, it is a very simple matter to make a little instrument which will

find the draught if there is one and besides show you pretty nearly where it comes from.

Get a knitting needle, three large corks and four small ones, eight hairpins, four bits of cardboard, and an ordinary button. The diagram shows you so plainly how to put them together that there is no use describing how it is done. The top cork is the only thing which is not perfectly simple.

Make a hole all the way through the top cork from top to bottom. A hairpin will answer to drill this hole with. Now make two or three more holes beside this first one and very near it. Run your hairpin briskly through these holes until their sides are worn away and then form one hole. Now run a small tube of macaroni or a quill-toothpick through the hole. This pierces the top cork and acts as a pivot for it to turn upon will have a loose socket and will permit the cork to move easily.

When any one says "draught," get out this little draught finder, says the Chicago Inter Ocean, and put near the place where the draught is supposed to come from. The slightest breath of air will set the sails in motion and the direction in which they move will indicate pretty clearly where the current of air comes from.

THORNS IN THE CUSHION.

Drawn by Will Owen. The Tatler.

Editor—"How much do you want for those sketches?"
Artist—"Oh, I want ten guineas."
Editor—"Don't slam the door as you go out."

An Englishman footing it through Scotland came upon a tiny loch, just proper for fish to inhabit. Patiently he fished for three hours, with no success. At last he accosted a boy who had stood for ten minutes watching him. "My little lad," said the Englishman, "can you tell me whether there are any fish in this pond?" "If there are, they must be vera wee ones, sir," returned the boy, "for there was nae water here until it rained yesterday."

Mental Suggestion.
A Macon young man took his girl to a show recently and soon after the curtain was raised she complained of feeling faint. The young man took something out of his pocket and whispered, "Put this tablet in your mouth." She quickly placed it under her tongue, but it would not dissolve. However, she soon felt much better. When the show was over she slipped the tablet into her glove. When she removed the glove at home she found the tablet was a button.—*Kansas City Journal.*

NEW IDEAS in TOILETTES

New York City.—Late spring and early summer always bring a demand for pretty dresses suited to commencement day, and here is one that is

charming in the extreme, yet quite simple. In the illustration it is shown with the half low neck and elbow sleeves that are so pretty and so fashionable, but it can be made high and with long sleeves if preferred. It would be effective made from alba-

can be opened, panels of velvet, silk or of another material with lines of braid may be inserted, and the required width may thus be obtained quite easily. Although the newest models of skirts are much fuller around the hips, there are two or three exceedingly attractive designs with comparatively little fullness, the latter being given by the sweeping flounce. A last year's plain skirt may be renovated and made up to date by pleats narrow at the top and gradually widening out towards the foot, and with narrow side pleats between and above the side-pleating bands of braid.—*Harper's Bazar.*

Fa-c's Shirred Eton.

The shirred Eton is one of the best liked of the season for the fashionable soft materials, and is always graceful and attractive worn by the women to whom it is suited. This one includes the new belt, which is shaped to give the waistcoat effect, and is exceptionally desirable. In the case of the model the material is pearl gray chiffon veiling, with banding that shows bits of Oriental embroidery, the color contrast being a most effective one. It is, however, adapted to almost all seasonable materials, while the possibilities of variation are very nearly numberless. In this instance the belt is of taffeta in the same shade, but it can be of any contrasting material and the trimming any banding applied, either after the manner suggested or on straight lines as may be liked. The sleeves are the new ones that are full, gathered into puffs and finished with becoming cuffs at the wrists.

A Late Design by May Manton.

cross, voile or any similar material, but, as illustrated, is of white organdie with bandings and frills of embroidery, while other similar materials also can be utilized.

The dress is an exceptionally graceful one, and is adapted to general wear as well as to the special occasions mentioned. The waist is full below the shallow yoke, while the berth, supported by the puffed sleeves, gives breadth to the figure. The skirt is made in three pieces, the front gore, with circular side and back portions that are shirred at their upper edges.

For a girl of twelve years of age will be required six yards twenty-seven, five and a half yards thirty-two or four yards forty-four inches wide, with ten yards of embroidery and eleven yards of insertion to trim as illustrated.

For the Young Folks.

Pretty blouse waists, simply made, are among the latest models for the school girls, many of them made of plain material, worn with plaid skirts, or vice versa. Straps on the shoulder seams give a pretty effect. Russian dresses are still holding their own in popularity, being suited to many fabrics, and especially wash materials. The long-waisted effect given by the belt being pushed down and held in place by straps is very desirable. Many combinations are seen.

Renovated Gowns.

Shirred bands of taffeta, velvet or satin ribbon and braid of all kinds are extremely popular, and, thanks to their kindly aid, it is possible to renovate a last year's gown. If the skirt be narrow, then the seams toward the front

Waterproofs That Are Dreams.

The passion for elaborate rain coats has been cultivated and catered to so largely that the line of distinction between the fashionable ulster and the swell waterproof would be difficult to find. Imported rain coats, for instance, are a dream. These filmy things of silk, laid over gauzy rubber, are garments of elegance, in addition to being coverings intended to keep one's clothes dry. They come in deep blues and rich scarlet tones, as soft underneath as the

The Eton is made with fronts and back only, shirred at the shoulders and again above the belt, and is arranged over a plain lining and joined to the belt. The sleeves also are held in position by plain linings, to which the shirrings are attached.

The quantity of material required for the medium size is four and three-

quarter yards twenty-one, three and three-quarter yards twenty-seven or two and a half yards forty-four inches wide.

A Wee Macgregor.

As quaint and pretty as possible is a new hat called the Wee Macgregor. It's a mere scrap of headgear, of the shape so familiar on the Scotch laddie. This means that it is long, narrow, inclined to be dented lengthwise, and follows the shape of the head with a downward droop at the back. It is suited for wear with a low coiffure.
