

**THE CAROLINA WATCHMAN.**

WM. H. STEWART, Ed. and Prop.  
Published every Tuesday at 120 West Innis Street.  
Subscription Price: \$1.00 per year; spot cash with order, 75cts.

Entered as second-class matter Jan. 19th, 1905, at the post office at Salisbury, N. C., under the act of Congress of March 3rd, 1879.

SALISBURY, N. C., MAR. 9, 1909.

All of Salisbury, that is to say, the business portion of it, is interested in the treatment accorded the employes at the shops of the Southern in Spencer, both as to the hours worked and the wages received. A large amount of money goes into the tills of our merchants each month, which comes out of the pay the employes at Spencer receive for their work. When the hour of their work is cut down, or when the force is reduced, the effect is felt to a greater or less extent by the business men of the city. We are all glad to note, therefore, that a change for the better went into effect on Monday last and the hope is universal that this condition may continue. THE WATCHMAN does not want to assume the role of advisor, but it believes that one or two suggestions may not be out of place just here. It is not designed to enter into any discussion of the merits or demerits of labor organizations, their attitude in general, of the justice of the demands which have been or may be made by the employes of the Southern. But it does want to emphasize one important fact, which is often ignored entirely in the discussion of these matters which intimately concern the relations between the employer and his employes, and preference is particularly made to these interests when large numbers of men are employed. Men may talk about oppression of the workingman until they grow black in the face, they may howl themselves hoarse yelling for their rights and carefully keep covered the vital principle which lies down at the root of the question, that of sincere, conscientious loyalty to the employer and his interests, whether the employer be a corporation or an individual. Most men, whether they are mechanics or others, generally expect more than they are willing to give, they are often opposed—unconsciously, possibly, to making the concessions they desire themselves, and a condition like this breeds a spirit which is strongly antagonistic to all and everything which savors of genuine loyalty. This is said in a general way and it is not intended to apply alone or specifically to the employes of the Southern. But the fact remains that there is a lukewarmness in the performance of duty, a lack of loyalty where the employer has every right to expect it. If all men who work for wages would study a little more along this line, would allow to sink into their minds what an unswerving loyalty on their part might mean, we venture the assertion that there would soon be a great change along several lines. There are men who would grind and mistreat their employes under any circumstances, provided they possessed the power, but these are but a small majority. The great majority of employes would meet the spirit referred to in a manner which would prove a most gratifying surprise to the men who work for wages.

In sickness, if a certain hidden nerve goes wrong, then the organ that this nerve controls will also surely fail. It may be a Stomach nerve, or it may have given strength and support to the Heart or Kidneys. It was Dr. Shoop that first pointed to this vital truth. Dr. Shoop's Restorative was not made to dose the Stomach nor to temporarily stimulate the Heart or Kidneys. That old fashioned method is all wrong. Dr. Shoop's Restorative goes directly to these failing inside nerves. The remarkable success of the prescription demonstrates the wisdom of treating the actual cause of these failing organs. And it is indeed easy to prove. A simple five or ten days test will surely tell. Try it once, and see! Sold Cornelison & Cook.

D. N. Sigman will leave soon for Florida, where he expects to make his future home. He is an old knight of the throttle and tiring of other business, will return to his seat in an engine cab.

**LOOK AFTER YOUR FENCES.**

Woven Wire For Inclosure the Latest and Best.

The matter of farm fences is one of the principal improvements of the farm. A farm without good fences never is valued very highly, even though the fields be clean and fertile. On a great many farms the fence proposition is always a serious one with the owner. Too many farmers are indifferent regarding the keeping of their fences in repair. There is usually plenty of work to be done on the farm fences. They are continually getting out of repair, and unless looked after they get into bad order and entice the live stock to cross them. The matter of farm fences has already gone through considerable evolution in the last ten years. Very seldom does one ever see the old rail fence, commonly termed the "worm fence." The rail fence is fast becoming obsolete, even in the timber districts. They never were a thing of beauty, but their construction lent a quaintness to many homesteads. Another fence that is passing rapidly is the hedge-row. A hedge fence when properly cared for is one of the beautifying acquisitions of a well kept farm. When it is not properly trimmed and cared for it is an eyesore. Hedge has grown unpopular on account of the large amount of work required to keep it in proper condition and also on account of its drawing the soil fertility from the ground for a considerable distance where planted.

Barbed wire is also another thing that is meeting with disfavour with the most progressive farmers. It is a very cheap and durable fence, but if it is not kept in perfect condition it is the most dangerous thing about the farm, especially where live stock is kept. On a great many farms barbed wire fences have cost the owner many times more than what it cost to construct them in the same done to live stock. Many a valuable cow or horse has been rendered practically worthless by it. The damage done to cattle has not been so great, but there are instances where many valuable dairy cows have had their udders practically ruined by barbed wire.

The coming fence—in fact, it is already here—is the woven wire. It has everything to commend it. It is slightly when properly put up and does not permit of grassy or weedy fence corners. Wire fences take up very little land and permit a very high degree of farming. Crops will grow right up by the side of it, and the keeping of the fence rows clean is little labor. Bad fences are often responsible for bad feeling between neighbors. Woven wire fences are the easiest of all fences to keep in repair. If they are put up right they are nearly always in good condition. A little attention paid to them once in awhile is all that is necessary to keep them in first class order. The best way to maintain a woven wire fence is to have a barbed wire stretched on top of the posts. This prevents the stock, especially horses, from throwing their heads over the fence or breaking down the wire.

**Portable Fence For a Chicken Yard.**  
A simple portable fence, a good thing for the chicken yard, can be made by nailing laths on the edge of 1 by 3 stringers. Where it is possible to obtain them, lengths of old gas pipes may be driven in the ground the right distances about to pass through the holes boxed in the ends of the

stringers. The height of the fence is governed by the size of chickens to be yarded. Ordinary wooden lath is four feet long, and it may project six inches above the upper stringer and six inches below the lower stringer, which would bring the stringers three feet apart for a fence four feet high. Three-quarter inch gas pipe is one inch outside diameter, which would require one and one-eighth inch holes through the stringers. Cut the gas pipes five or six feet long, according to the soil. It will be necessary to put the fence in place and drive the gas pipes through the holes, because after the stakes are driven once or twice they become battered on top, or you can saw through from the ends of the stringers and mortise out to form an open seat.

**Fertilizing the Orchard.**  
It might be said that it is always reasonable to fertilize the orchard or garden. Manure placed on this soil this winter will partially decay and its riches soak into the soil for the use of the plants next year. It not only serves as a fertilizer in the orchard, but in winter it acts as a soil protector and regulates sudden freezing and thawing. On hilly land it checks soil erosion.

**KILL THE COUGH AND CURE THE LUNGS**  
WITH **Dr. King's New Discovery**  
FOR COUGHS, COLDS, AND ALL THROAT AND LUNG TROUBLES.  
GUARANTEED SATISFACTORY OR MONEY REFUNDED.

**Given a Year's Sentence.**

Winston-Salem, March 6.—T. K. Renigar, who conducted a saloon here for many years up to the time prohibition went into effect, was to-day sentenced to the county roads for twelve months, after the recorder had adjudged him guilty in the city court of the charge of retailing liquor. Renigar gave bond in the sum of \$250 and appealed through his counsel.

The conviction and sentence caused a good deal of talk about town to-day. Renigar's well known and is reputed to be very well-to-do. He has been conducting a soft drink place and restaurant. It is said that Renigar will fight the case thoroughly and has every legal means to prevent the execution of the sentence.

The evidence against him was given by John Riger who swore that he bought for \$1.50 a quart of liquor from Renigar on March 4th, saying that the defendant got it from a case in a rear room of his place.

Renigar took the stand and swore that he did not sell Riger the liquor, and that he was not in the place at the time of the alleged sale.—Special to Charlotte Observer.

Rich or poor alike are habitually constipated. It slays its victims by thousands, although some other name goes into the death certificate. Drugs will not cure. Eat daily.

**DR. PRICE'S WHEAT FLAKE CELERY FOOD**  
which is of a laxative nature.

**Notice to Non Resident.**  
North Carolina, In Superior Court—Rowan County, May Term, 1909.

Bertha Martin vs. Charles Martin. Summons.  
The defendant above named will be notified that the plaintiff has commenced this action against him for the purpose of being freed and separated from the bonds of matrimony by grounds of fornication and desertion and that he is required to appear on May 5th at the court house in Salisbury, N. C., to answer or demur to the complaint of the plaintiff or the relief therein demanded will be granted. This March 5th, 1909. J. F. McCOBBINS, clerk Superior Court, Rowan Co.

**Pale, Thin, Nervous?**

Then your blood must be in a very bad condition. You certainly know what to take, then take it—Ayer's Sarsaparilla. If you doubt, then consult your doctor. We know what he will say about this grand old family medicine.

Made by J. C. Ayer Co., Lowell, Mass. Also manufacturers of HAIR VIGOR, AYER'S CURE, CHERRY PECTORAL.  
**Ayer's**  
We have no secrets! We publish the formulae of all our medicines.

The work of excavating for the foundation of the Confederate monument, was completed last week.

**Rheumatism**

I have found a tried and tested cure for Rheumatism! Not a remedy that will straighten the distorted limbs of chronic cripples, nor turn hoary growths back to flesh again. That is impossible. But I can now surely kill the pains and pang of this deplorable disease.  
In Germany—a Chemist in the City of Darmstadt—I found the last ingredient with which Dr. Shoop's Rheumatic Remedy was made a perfected, dependable prescription. Without that last ingredient, I successfully treated many, many cases of Rheumatism; but now, at last, I can surely cure all curable cases of this horrid, much dreaded disease. These acid-like granular wastes, found in Rheumatic Blood, seem to dissolve and pass away under the action of this remedy as surely as does sugar when added to pure water. And then, when dissolved, these poisonous wastes are gone forever. There is now no real need—no actual excuse for suffering longer without help. We sell, and in confidence recommend

**Dr. Shoop's Rheumatic Remedy**  
CORNELISON & COOK.

Notice to Creditors—Persons indebted to the late Dr. A. H. Bowers, are notified to call on J. W. Honeycutt, postmaster at Gum Hill, or the undersigned and pay the same at once and no longer. 2t sow J. C. LINDERS.

Eggs—I will sell a few sets of the famous Lakenwee birds are prize winners. Beautiful and the very best. MAGGIE McLAUGHLIN, Salisbury, N. C.  
Correspondence—The Standard Sewing Machine Co. will sell or exchange for something useful. This is a splendid opportunity for one in need of more education. J. F. McCOBBINS, PROCTOR, Salisbury, N. C.

**Bigg's Seven-ear Prolific Corn!**  
Over 100 Bushels per Acre.  
SEED FOR SALE.

Bigg's Seven-ear Prolific Corn is one of the wonders in the agricultural world to-day. Last year the undersigned planted 20 acres in this variety and secured a wonderful result. In looking over the field not a single stalk was found that bore less than three ears, and many were found that had four, five, six, eight and ten. The 20 acres produced just 2,140 bushels of good, hard corn, making an average of 107 bushels to the acre. This is claimed to be the largest yield ever heard of in this section of the State. The seed for this planting was bought of L. A. Carr, Durham, N. C., who produced an average of 139 1/2 bushels per acre.

When the Farmers' Institute was held in Salisbury last August and a car load of machinery was used in demonstration work on land adjoining the above, Mr. Maecham, superintendent of the State's test farm in Iredell county, stated to those present: Sam Carter, Joe Hall, Rev. J. M. L. Lyerly and others, that he had not seen any better corn in the State.

Col. J. S. Cunningham, of Cunningham, N. C., a member of the State Board of Agriculture, and one of the best farmers in the State, came to Salisbury last December, and, after seeing this field, stated that he had never seen better corn, and that it was well worth one cent per grain. He sold several ears of it, at the railroad station in Salisbury, at \$1.00 per ear.

The above is given to show the extra high quality and value of this variety of corn and this lot in particular. It is the very best, most prolific and most profitable corn that can be raised anywhere. A quantity of this corn has been set aside for seed and is offered to progressive farmers for only 75c a bushel, \$1.50 per half bushel and \$2.50 per bushel. F. O. B. Salisbury. Money order or check to accompany order. Address, **M. L. JACKSON,** Salisbury, N. C.

**Seeds, Seeds, Seeds.**  
Here is the place to get all kinds of "Wood's" garden and field seeds which you know are the best to plant, and as we handle in large quantities we are prepared to sell you cheap. Come and see us and let us interest you in the seed question. We make a specialty of seeds.
